Introduction

Chapter 1	Introduction	
	1.1 The Importance of Copper	1
	1.2 Objectives and Overview	2
	1.3 Notes	4

Part I: Structure of the World Copper Market

Chapter 2	Production	
	2.1 Metallurgical Background	6
	2.2 Mine Production	7
	2.3 Mine Production Capacities	11
	2.4 Smelter and Refined Production	15
	2.5 Scrap	19
	2.6 Notes	22

Chapter 3	Consumption	
	3.1 Basic Facts	25
	3.2 Copper Consumption	26
	3.3 Substitution	28
	3.4 Notes	34

Chapter 4	Trade and Prices	
	4.1 Trade	36
	4.2 The Council of Copper Exporting Countries	40
	4.3 Prices	48
	4.4 Conclusions	55
	4.5 Notes	55

Chapter 5	Reserves and Resources	
	5.1 Copper Deposits	60
	5.2 Perspectives of Copper Availability	65
	5.3 Implications	69
	5.4 Notes	71

Part II: Econometric Model of the World Copper Market

Chapter 6	Copper Market Models	
	6.1 Econometric Models	74
	6.2 Other Copper Industry Models	79
	6.3 A New Econometric Model	81
	6.4 Notes	82
Chapter 7	Mine Production and Capacities	
	7.1 Overview	85
	7.2 Primary Supply: Theory	86
	7.3 Primary Supply: Estimation	88
	7.4 Mine Production Capacity: Theory	91
	7.5 Mine Production Capacity: Estimation	95
	7.6 Notes	98
Chapter 8	Demand	
	8.1 Overview	100
	8.2 Consumption: Theory	101
	8.3 Consumption: Estimation	102
	8.4 Demand for Storage: Theory	104
	8.5 Demand for Storage: Estimation	107
	8.6 Notes	109
Chapter 9	Other Equations	
	9.1 Overview	110
	9.2 Secondary Supply	110
	9.3 Prices	112
	9.4 Closing the Model	114
Chapter 10	Historical Dynamic Solution and Sensitivity Analysis	
	10.1 Overview	117
	10.2 Historical Dynamic Simulation	118
	10.3 Multiplier Simulation Experiments	128
	10.4 Concluding Remarks	131
	10.5 Notes	134
Appendices and Bibliography		
Appendix I	General Remarks on Methodology and Data	135
Appendix II	List of Variables	138
Appendix III	Estimated Equations	148
Bibliography		161
