

# CONTENTS

CHAPTER 1.	PROLOGUE .....	1
1.1	Objective of the Study .....	1
1.2	Survey of the Study .....	3
CHAPTER 2.	VECTOR STOCHASTIC PROCESSES .....	6
2.1	Discrete-Time, Stationary Vector Stochastic Processes .....	6
2.1.1	General Assumptions .....	6
2.1.2	The Wold or Moving Average Representation .....	8
2.1.3	Autoregressive Representation .....	10
2.1.4	Spectral Representation .....	12
2.2	Nonstationary Processes .....	14
2.3	Vector Autoregressive Moving Average Processes .....	16
2.3.1	Stationary Processes .....	16
2.3.2	Nonstationary Processes .....	20
2.4	Estimation .....	21
2.4.1	Maximum Likelihood Estimation of Stationary Gaussian Vector ARMA Processes of Known Order ..	21
2.4.2	Estimation of Vector Autoregressive Processes of Known Order .....	23
2.4.3	Multivariate Least Squares Estimation of AR Processes With Unknown Order .....	32
2.4.4	Nonstationary Processes .....	36
2.5	Model Specification .....	36
2.5.1	AR Order Determination .....	36
2.5.2	Subset Autoregressions .....	41
2.5.3	The Box-Jenkins Approach .....	47
2.6	Summary .....	47
CHAPTER 3.	FORECASTING VECTOR STOCHASTIC PROCESSES .....	49
3.1	Forecasting Known Processes .....	50
3.1.1	Predictors Based on the Moving Average Representation .....	50
3.1.2	Predictors Based on the Autoregressive Representation .....	54
3.1.3	Forecasting Known Vector ARMA Processes .....	57
3.2	Forecasting Vector ARMA Processes With Estimated Coefficients .....	58
3.2.1	The General Case .....	58
3.2.2	Finite Order AR Processes .....	65

3.3	Forecasting Autoregressive Processes of Unknown Order	73
3.3.1	The Asymptotic MSE Matrix .....	74
3.3.2	Proof of Proposition 3.2 .....	77
3.4	Forecasting Nonstationary Processes .....	85
3.4.1	Known Processes .....	86
3.4.2	Estimated Coefficients .....	92
3.4.3	Unknown Order .....	94
3.5	Comparing Forecasts .....	94
3.6	Summary .....	95
CHAPTER 4.	FORECASTING CONTEMPORANEOUSLY AGGREGATED KNOWN PROCESSES .....	97
4.1	Linear Transformations of Vector Stochastic Processes	98
4.2	Forecasting Linearly Transformed Stationary Vector Stochastic Processes .....	100
4.2.1	The Predictors .....	100
4.2.2	Comparison of the Predictors .....	104
4.2.3	Equality of the Predictors .....	105
4.2.4	Granger-Causality .....	108
4.3	Forecasting Linearly Transformed Nonstationary Processes .....	110
4.4	Linearly Transformed Vector ARMA Processes .....	113
4.4.1	Finite Order MA Processes .....	113
4.4.2	ARMA Processes .....	114
4.5	Summary and Comments .....	117
CHAPTER 5.	FORECASTING CONTEMPORANEOUSLY AGGREGATED ESTIMATED PROCESSES .....	119
5.1	Summary of Assumptions and Predictors .....	120
5.2	Estimated Coefficients .....	121
5.2.1	Comparison of $\hat{Y}_t^O(h)$ and $\hat{Y}_t^A(h)$ .....	123
5.2.2	Comparison of $\hat{Y}_t^O(h)$ and $\hat{Y}_t^U(h)$ .....	127
5.3	Unknown Orders and Estimated Coefficients .....	129
5.4	Nonstationary Processes .....	132
5.5	Small Sample Results .....	133
5.5.1	Design of the Monte Carlo Experiment .....	133
5.5.2	Simulation Results for AR Process I .....	134
5.5.3	Simulation Results for AR Process II .....	139
5.5.4	Simulation Results for MA Process I .....	142
5.5.5	Simulation Results for MA Process II .....	145
5.5.6	Simulation Results for MA Process III .....	147
5.6	An Empirical Example .....	149
5.7	Conclusions .....	158

CHAPTER 6.	FORECASTING TEMPORALLY AND CONTEMPORANEOUSLY AGGREGATED KNOWN PROCESSES .....	161
6.1	Macro Processes .....	163
6.2	Six Predictors .....	166
6.3	Comparison of Predictors .....	173
6.4	Nonstationary Processes .....	179
	6.4.1 Differencing to Obtain Stationarity .....	179
	6.4.2 Forecasting Aggregated Nonstationary Processes .....	181
6.5	Temporally and Contemporaneously Aggregated Vector ARMA Processes .....	182
6.6	Conclusions and Comments .....	186
CHAPTER 7.	TEMPORAL AGGREGATION OF STOCK VARIABLES - SYSTEMATICALLY MISSING OBSERVATIONS .....	187
7.1	Forecasting Known Processes With Systematically Missing Observations .....	189
7.2	Processes With Estimated Coefficients .....	192
7.3	Processes With Unknown Orders and Estimated Coefficients .....	198
7.4	Nonstationary Time Series With Systematically Missing Observations .....	200
7.5	Monte Carlo Results .....	203
	7.5.1 Univariate AR Processes .....	203
	7.5.2 Bivariate AR Process .....	206
	7.5.3 MA(m) Processes .....	208
	7.5.4 Univariate MA(1) Process .....	211
	7.5.5 Summary of Small Sample Results .....	215
7.6	Empirical Examples .....	215
	7.6.1 Consumption Expenditures .....	216
	7.6.2 Investment .....	219
7.7	Concluding Remarks .....	220
7.A	Appendix: Proof of Relation (7.2.18) .....	222
CHAPTER 8.	TEMPORAL AGGREGATION OF FLOW VARIABLES .....	224
8.1	Forecasting With Known Processes .....	225
8.2	Forecasts Based on Processes With Estimated Coefficients .....	230
8.3	Forecasting With Autoregressive Processes of Unknown Order .....	236
8.4	Temporally Aggregated Nonstationary Processes .....	238
8.5	Small Sample Comparison .....	240
	8.5.1 A Univariate AR Process .....	240
	8.5.2 A Univariate MA(2) Process .....	242
	8.5.3 A Univariate MA(3) Process .....	244
	8.5.4 A Bivariate MA Process .....	246
	8.5.5 A System With a Stock and a Flow Variable .....	248

8.6	Examples .....	250
	8.6.1 Consumption .....	250
	8.6.2 Investment .....	253
8.7	Summary and Conclusions .....	255
8.A	Appendix: Proof of Relation (8.2.23) .....	256
CHAPTER 9.	JOINT TEMPORAL AND CONTEMPORANEOUS AGGREGATION .....	258
9.1	Summary of Processes and Predictors .....	259
9.2	Prediction Based on Processes With Estimated Coefficients .....	263
	9.2.1 General Results .....	263
	9.2.2 An Example .....	267
	9.2.3 Conclusions for Processes With Estimated Coefficients .....	274
9.3	Prediction Based on Estimated Processes With Unknown Orders .....	275
	9.3.1 General Comments .....	275
	9.3.2 Comparison of MSEs .....	278
	9.3.3 Summary and Discussion of Results for Processes With Unknown Orders .....	280
9.4	Monte Carlo Comparison of Predictors .....	281
	9.4.1 Simulation Results for AR Process .....	282
	9.4.2 Simulation Results for MA Process .....	289
	9.4.3 Discussion of Small Sample Results .....	296
9.5	Forecasts of U.S. Gross Private Domestic Investment ..	299
	9.5.1 First Differences of Investment Data .....	299
	9.5.2 Aggregation of Original Investment Data .....	303
9.6	Summary and Conclusions .....	304
CHAPTER 10.	EPILOGUE .....	309
10.1	Summary and Conclusions .....	309
10.2	Some Remaining Problems .....	311
APPENDIX.	DATA USED FOR EXAMPLES .....	313
BIBLIOGRAPHY	.....	316
