CONTENTS

		Pages
I.	INTRODUCTION	1 - 6
II.	SPATIAL EXCHANGE ECONOMIES WITH TRADER AND FIXED ASSIGNMENT OF HOUSEHOLDS TO LOCATIONS	7 - 63
	1. THE MODEL	7
	a) Notation b) Transportation technology and trader c) Households	
	2. AXIOMS AND BASIC DEFINITIONS OF COMPETITIVE EQUILIBRIA	13
	3. EXAMPLES OF TRANSPORTATION TECHNOLOGIES	18
	a) Central market and interregional transportation technologies b) Linear examples c) The axioms for central market technologies	
	4. PRELIMINARIES	28
	5. EQUILIBRIUM RESULTS	30
	a) Existence of competitive equilibria b) Analysis of quasiequilibria	
	6. PARETO EFFICIENCY AND ACTIVE TRANSPORTATION IN EQUILIBRIUM	37
	7. EFFICIENCY OF TRANSPORTATION IN EQUILIBRIUM	39
	8. LINEAR CBD-TRANSPORTATION TECHNOLOGIES	42
	9. COMPETITIVE PRICE SPREAD IN CBD ECONOMIES	52
	10. LINEAR CBD TECHNOLOGIES AND MULTICOMMODITY TRANSPORTATION PROBLEM	56
III.	BARTER ECONOMIES UNDER LOCATIONAL CHOICE	64 - 120
	1. THE MODEL	64
	a) Activity spaces b) Description of households	

		Pages
	2. ASSUMPTIONS AND INDIVIDUAL DEMAND	68
	a) Model Type I (e >> 0) b) Model Type II (where e >> 0 does not hold and labour services are essential)	
	3. SPATIAL ECONOMIES AND COMPETITIVE EQUILIBRIUM UNDER LOCATIONAL CHOICE	85
	4. MEAN DEMAND IN BOUNDED SPATIAL ECONOMIES	93
	5. CONSTRUCTION OF UNIFORM BOUNDS FOR OPTIMAL SELLING ACTIVITIES	99
	6. LIMITS OF EQUILIBRIA IN BOUNDED ECONOMIES $(\mathcal{E}_n)_n$	101
	7. EQUILIBRIUM RESULTS	106
	a) Existence b) Observations in equilibrium under locational choice	
	8. SPATIAL RANDOM ECONOMIES	112
IV.	APPENDIX	121 - 126
V.	LIST OF REFERENCES	127 - 129
