

Table of Contents

1. Introduction	1
1.1 Myocardial infarction	1
1.1.1 Epidemiology of myocardial infarction (MI).....	1
1.1.2 Pathology of myocardial infarction.....	2
1.2 ROS and its roles in MI	5
1.2.1 Sources of ROS.....	5
1.2.2 Roles of ROS in cardiomyocyte and cardiac tissues.....	8
1.3 The role of vitamin C as an antioxidant	10
2. Aim of the study	13
3. Materials and Methods	15
3.1 Reagents, materials and equipment	15
3.1.1 Reagents.....	15
3.1.2 Consumables.....	16
3.1.3 General equipment.....	16
3.1.4 Biological material.....	17
3.2 Methods	17
3.2.1 Ethical Approval.....	17
3.2.2 Buffer/solution/media preparation.....	17
3.2.3 Isolation of fibroblasts from C57BL/6 mouse.....	19
3.2.4. Fibroblasts culture in flasks.....	20
3.2.5. Coatings preparation.....	20
3.2.6 Cell number counting and cell seeding.....	21
3.2.7. Analysis of mitochondrial activity.....	22
3.2.8. Assessment of total and mitochondrial ROS at the absence and presence of vitamin C.....	27
3.2.9. Data Statistics.....	31
4. Results	32
4.1. Treatment optimization Assessment of vitamin C activity on fibroblast metabolism.	32
4.1.1. The quantification of protein in 96 well seahorse plates.....	32
4.1.2 Results of seahorse mitochondrial activity test.....	33
4.2. The role of vitamin C on scavenging ROS	43
5. Discussion	57
5.1. Role of doses of Vitamin C on fibroblasts metabolisms	57
5.2. The role of vitamin C on total ROS (tROS) induced in fibroblasts 错误 未定义书签。	
5.3. The role of Vitami C on mitochondrial ROS (mROS) induced in fibroblasts 62	
5.4. Limitations	65
6. Conclusions	66
7. References	67
8. Appendix	83
List of own publications.....	83
Acknowledgment.....	84

Affidavit according to § 5 (1) for Data Retention	85
Affidavit according to § 5 (1) § 11 (3) 12 of the doctoral studies regulations	86
Curriculum vitae	87
