Introduction and Summary	
Introduction	1
Summary of the essays	5
 Essay 1 Capital structure - Theories and empirical results - a panel data analysis	
Yinghong Chen and Klaus Hammes	
1 Introduction	11
2 Theories of Capital Structures	12
2.1 The “irrelevance” of capital structure theory	12
2.2 Static trade-off theory: bankruptcy costs	13
2.3 Capital structure models based on agency cost and asymmetric information	13
2.3.1 Signalling models	13
2.3.2 Agency cost models	14
2.4 The pecking order theory	15
2.5 The Legal Environment	16
3 Model and variables	16
3.1 The model	16
3.2 Variables	17
3.2.1 Leverage	17
3.2.2 Tangibility	18
3.2.3 Market-to book-ratio	18
3.2.4 Profitability	19
3.2.5 Size	20
4 Data and estimation method	21
4.1 Data	21
4.2 Estimation method	22
5 A comparison of leverage of the sample countries	24
6 Empirical Results	26
7 An analysis of institutional difference	28
8 Concluding remarks	31
Appendix	32
References	38
 Essay 2 Trade Credits in Transition Economies	
1 Introduction	41
2 Poland	42
3 Hungary	44
4 Trade Credits	46
4.1 Financing advantage of trade credits	46
4.2 Trade credit as means of price discrimination	47
4.3 Transaction cost theories	48
5 Description of Variables	49
5.1 Bank Loans	50
5.2 Tangibility	51
5.3 Market-to-book ratio	51
5.4 Measures of internal financing ability	52
5.5 Size	52

5.6 Age	53
6 Description of the dataset	54
7 Empirical Analysis	54
7.1 Descriptive Statistics	54
7.2 Model	56
8 Results	57
9 Conclusions	60
Appendix 1	61
Appendix 2	66
References	69

Essay 3 Trade Credits in Industrialized Countries

1. Introduction	72
2 Trade Credits	72
2.1 Financing advantage of trade credits	73
2.2 Trade credit as means of price discrimination	74
2.3 Transaction cost theories	75
2.4 Pecking order theory	76
3 Description of Variables	77
3.1 Bank Loans	77
3.2 Tangibility	77
3.3 Market-to-book ratio	78
3.4 Measures of internal financing ability	78
3.5 Size	79
3.6 Age	79
4 Description of the dataset	80
5 Empirical Analysis	81
5.1 Descriptive Statistics	81
5.2 Model	82
6 Results	83
7 Conclusions	85
Appendix	87
References	91

Essay 4 Firm Performance, Debt, Bank Loans and Trade Credits

1 Introduction	94
2 Theoretical Background	95
2.1 The “irrelevance” of capital structure theory	95
2.2 Models based on agency costs between owners and managers	96
2.3 Asymmetric Information between outsiders and insiders	96
2.4 Signaling with debt	97
2.5 The static tradeoff hypotheses	98
2.6 Bank Loans	98
2.6.1 Model based on monitoring and Information Cost	98
2.6.2 Models based on borrower’s incentives	99
2.7 Trade Credits	100
2.7.1 Financing advantage of trade credits	100
2.7.2 Trade credit as means of price discrimination	101
2.7.3 Transaction cost theories	103
3 Measuring Firm Performance	105

4 Estimation	105
5 Description of variables	107
5.1 Debt-Equity	107
5.2 Trade Debt	107
5.3 Bank Loans	107
5.4 Size	108
5.5 Age	108
5.6 Industry	108
6 Description of the dataset	109
7 Empirical Analysis	110
7.1 Descriptive Statistics	110
7.2. Estimation Results	112
8. Conclusions	116
Appendix	117
References	129

Essay 5 Profits and the provision of trade credit

1 Introduction	133
2 Trade credit as means of price discrimination	133
2.1 A Model with two Farmers, a Bank and a Manufacturer	134
2.1.1 Farmers	134
2.1.2 Bank	135
2.1.3 Manufacturer	135
3. Description of Variables	139
3.1 Firm Performance	139
3.2 Trade Credit	140
3.3 Size	140
3.4 Age	140
3.5 Industry	141
3.6 Country-market conditions	141
4 The Data	141
5 Empirical Analysis	142
5.1 Descriptive Statistic	142
5.2 Estimation	143
5.3 Results	144
6 Conclusions	147
Appendix 1	145
Appendix 2	146
