Abstract	VI
1 INTRODUCTION	1
2 GEOGRAPHY AND GERMANY	3
3 THEORETICAL MODEL AND DATA	7
3.1 The Rationale for the Helpman-Hanson Model	7
3.2 The Helpman-Hanson Model	9
3.3 Data and Estimation Issues	12
4 BASIC ESTIMATION RESULTS FOR GERMANY	14
4.1 Estimating the Benchmark Wage Equation	14
4.2 No Real Wage Equalization	17
5 INCORPORATING GERMAN FEATURES: TRANSFERS AND RIGID LABOR MARKETS	21
5.1 Distinguishing between GDP and Personal Income: The Role of Transfers	21
5.2 A Spatial (un)employment Structure and Land Price Structure?	23
6 CONCLUSIONS	28
Appendix 1	30
Appendix 2	31
