

## TABLE OF CONTENTS

Introduction .....	9
<i>Chapter 1.</i> Coverage of the Environmental Goods and Services Industry .....	11
Mapping the environment industry .....	11
Identifying environmental goods for international trade purposes .....	13
Identifying environmental services for purposes of international trade .....	15
Shortcomings in the existing GATS classification of environmental services .....	17
The “core” plus “intrinsically related” approach to GATS classification.....	24
<i>Chapter 2.</i> Factors in International Diffusion of Environmental Goods and Services, including Trade .....	27
Demand-side factors .....	27
Supply-side factors for environmental goods .....	32
Supply-side factors for environmental services .....	39
<i>Chapter 3.</i> The Potential “Win-win” Situation: The Role of Trade Liberalisation for Environmental Goods and Services in Improving Environmental Protection, Economic Efficiency and Development Prospects .....	49
Improving the balance between demand- and supply-side factors: the role of complementary measures.....	49
The “win-win” proposition in action: case studies of liberalisation of water and waste management services markets in developing economies .....	53
“Win-win” outcomes .....	57
Notes.....	61

## **Annexes**

<i>Annex 1.</i>	OECD/Eurostat environmental goods and services industry manual classification ....	65
<i>Annex 2.</i>	Environmental goods: illustrative categories with harmonised commodity description and coding .....	71
<i>Annex 3.</i>	Bound and applied tariffs on environmental goods in 14 markets.....	77
<i>Annex 4.</i>	Matrix of existing GATS commitments for environmental services .....	81
<i>Annex 5.</i>	Indicative list of measures affecting trade in environmental services .....	89
<i>Annex 6.</i>	Case studies on the role of private sector monopolies and exclusive rights in the provision of environmental services .....	93
<i>Annex 7.</i>	Examples of the “win-win” for environmental performance and social development from trade liberalisation in water and waste management markets in developing countries .....	97

## **Tables**

<i>Table 1.</i>	Mapping environment activities .....	11
<i>Table 2.</i>	Global environmental market, 1996 and 1998.....	12
<i>Table 3.</i>	GATS and CPC classifications of environmental services .....	17
<i>Table 4.</i>	Environmental services: Comparison of OECD/Eurostat and GATS/CPC descriptions and classifications.....	21
<i>Table 5.</i>	Average tariff levels for environmental goods .....	32
<i>Table 6.</i>	Environmental goods supported by DAC Members’ bilateral development aid, 1992-96.....	36
<i>Table 7.</i>	Financial support instruments for promoting cleaner technologies .....	37
<i>Table 8.</i>	Main options for private sector participation.....	55

## **Figure**

<i>Figure 1.</i>	Evolution of environmental policy in OECD countries .....	28
------------------	---	----

## **Boxes**

<i>Box 1.</i>	Examples of environmental goods and services .....	13
<i>Box 2.</i>	Trade issues for the transfer of seven clean technologies .....	27
<i>Box 3.</i>	Policy coherence for cleaner technologies: bias in favour of end-of-pipe goods?....	38
<i>Box 4.</i>	Environmental services: requirements and restrictions.....	40
<i>Box 5.</i>	Conditions typically placed on supply of services by intra-corporate transferees and other professionals .....	41
<i>Box 6.</i>	Environmental services: indicative list of general and specific business licensing requirements .....	42
<i>Box 7.</i>	Elements for a “win-win” approach to multilateral trade liberalisation of environmental services .....	53
