

TABLE OF CONTENTS

FOREWORD	2
1. INTRODUCTION	5
2. CHANGING DEMAND STRUCTURES	7
Demand and infrastructure	8
Congestion	10
Demand and technology	12
Market segments	16
Business-to business	16
Residential customers	19
Terminals	20
3. CONNECTING TO INFORMATION INFRASTRUCTURES	23
The underlying infrastructures	23
Alternative local loops	23
Circuit Switched Networks	24
Data networks	26
Broadcasting networks	27
Infrastructure development in the European Union -- Status March 1997	28
Mobile and wireless networks	28
4. ACCESS TO INFRASTRUCTURE PLATFORMS	30
Main policy principles	30
Extending competition and facilitating convergence	31
Market access	33
Interconnection and peering	34
Economic importance of open standards	36
Addressing techniques	37
The price of access	38
Universal access	39
Global infrastructures and markets	40
5. CONCLUSIONS	42
NOTES	44

Tables

Table 1. Characteristics of the Three Main Infrastructures	9
Table 2. Number of ISDN subscribers in OECD countries, 1995 and 1997	15
Table 3. Demand for second lines in the United States	16
Table 4. Internet Hosts in OECD countries	18

Table 5. Communication terminals in the OECD area, 1996 21

Table 6. Alternative local loop trials in Europe 28

Figures

Figure 1. Percent of sites (by employee size) using the Internet..... 17

Figure 2. Internet hosts per 1 000 inhabitants (incl. .com, .net, .org), July 1998..... 19

Figure 3. ISDN basic rate access subscribers per 1 000 access lines, 1997 26
