| Preface | xiii |
| Part I From Theory to Methodology | 1 |
| 1 TYPES OF RESEARCH PROBLEMS AND RESEARCH SITUATIONS | 3 |
| 1.1 Preliminaries | 3 |
| 1.1.1 Units and Characteristics | 3 |
| 1.1.2 Units of Different Levels | 4 |
| 1.1.3 Characteristics of Different Measurement Levels | 5 |
| 1.1.4 The Dispersion of Units | 6 |
| 1.1.5 Many Characteristics | 6 |
| 1.1.6 Research Situations and Statement Systems | 8 |
| 1.2 A Number of Research Examples and their Basic Format | 8 |
| 1.2.1 Humour as a Technique of Social Influence | 8 |
| 1.2.2 Childlessness | 10 |
| 1.2.3 Christian Beliefs and Anti-Semitism | 12 |
| 1.2.4 External Rewards and Intrinsic Motivation | 15 |
| 1.2.5 Poor and Rich Neighbourhoods | 17 |
| 1.2.6 Marital Adjustment | 19 |
| 1.2.7 Economic Inequality and Political Instability | 23 |
| 1.2.8 Styles in Furnishing the Living Room | 26 |
| 2 A CLASSIFICATION OF CLASSICAL TECHNIQUES OF MULTIVARIATE ANALYSIS | 31 |
| 2.1 Starting Points | 32 |
| 2.1.1 Our Notation System | 32 |
| 2.1.2 A First Acquaintance with Techniques | 35 |
| 2.2 Subclassifications | 35 |
| 2.2.1 Dependent and Non-Dependent Techniques | 35 |
| 2.2.2 The Number of Dependent Variables | 38 |
| 2.2.3 The Measurement Level of Dependent Variables | 39 |
| 2.2.4 The Measurement Level of Independent Variables | 40 |
| 2.2.5 The Additive and Interactive Structure | 40 |
| 2.2.6 The Orthogonality of Independent Variables | 41 |
| 2.2.7 The Problem-Variable and the Problem-Relation | 43 |
| 2.2.8 One or More Hierarchical Steps | 44 |
| 2.2.9 Manifest and Latent Variables | 46 |

| | | |
|----------------|---|-----------|
| 2.2.10 | The Number of Latent Variables | 48 |
| 2.2.11 | The Orthogonality of Latent Variables | 50 |
| 2.2.12 | The Measurement Level for Non-Dependent Techniques | 51 |
| 2.2.13 | Testing and Gauging | 52 |
| 2.2.14 | The Analysis of Variables and of Units | 53 |
| 2.2.15 | Linear and Non-linear Techniques of Analysis | 54 |
| 2.2.16 | The Analysis of Data and of Similarities | 54 |
| 2.2.17 | Other Classifications | 55 |
| 3 | THE ANALYSIS TECHNIQUE AS THE MIRROR OF THE RESEARCH PROBLEM | 56 |
| 3.1 | Research Examples | 57 |
| 3.1.1 | The Influence of Total Institutions on Self-Image | 57 |
| 3.1.2 | The Trade Union Militant | 58 |
| 3.1.3 | Occupational Sex Identification and the Assessment of the Male and Female Earnings Inequality | 60 |
| 3.1.4 | Student Evaluations of Teaching Merit | 61 |
| 3.1.5 | Interracial and Intra-racial Rape | 63 |
| 3.1.6 | Organizational Mobility in a Nuclear Research Complex | 64 |
| 3.1.7 | Reform in Elementary Education: A Black Box | 65 |
| 3.1.8 | The Value and the Valuation of Jobs | 67 |
| 3.1.9 | A Classification of 16 Native-American Tribes | 68 |
| 3.1.10 | The Classical and Modern Role of Women in Matrimonial Advertisements | 70 |
| 3.1.11 | Absence Because of Illness | 71 |
| 3.1.12 | Are Non-Working People Socially Isolated? | 72 |
| 3.1.13 | Educational Level Achieved by Foreign Pupils | 74 |
| 3.1.14 | The Subjective Burden of Heart Attack Patients | 75 |
| 3.2 | The Dependency Theory: Manipulations of the Researcher | 77 |
| 3.2.1 | A Causal Analysis | 78 |
| 3.2.2 | Measurement Models | 79 |
| 3.2.3 | Causal Analysis without Hierarchical Steps | 80 |
| 3.2.4 | Degree of Development as a Trichotomy | 80 |
| 3.2.5 | Degree of Dependency as 'More' or 'Less' | 81 |
| 3.2.6 | A Model with Several Dependent Variables | 81 |
| 3.2.7 | A Dependency Set and a Development Set | 82 |
| Part II | From Methodology to Analysis | 85 |
| 4 | THE EXPERIMENTAL DESIGN: THE EFFECT OF HUMOUR ON FINANCIAL CONCESSION | 90 |
| 4.1 | The Standard Experiment | 90 |
| 4.2 | The OXO Notation | 90 |
| 4.3 | Implicit Multivariate Analysis | 91 |
| 4.4 | The Preliminary Investigation | 91 |
| 4.5 | Bivariate Association | 92 |

| | | |
|--------|---|-----|
| 4.6 | The Data Matrix | 92 |
| 4.7 | The Causal Diagram | 93 |
| 4.8 | The <i>t</i> Test of Difference of Means | 93 |
| 4.9 | The Experimental Design in Research Practice | 95 |
| 4.10 | SPSS for Windows Output of Student's <i>t</i> Test | 96 |
| 5 | MULTIPLE REGRESSION ANALYSIS: THE CAUSES OF CHILDLESSNESS | 99 |
| 5.1 | The Research Problem and the Causal Diagram | 99 |
| 5.2 | The Data Matrix | 99 |
| 5.3 | Bivariate Regression Analysis: The Influence of Working on Childlessness | 100 |
| 5.3.1 | The Model | 100 |
| 5.3.2 | Geometric Approach | 101 |
| 5.3.3 | Objectives of the Technique | 104 |
| 5.3.4 | Calculation of the Regression Function | 104 |
| 5.3.5 | The Strength of the Relationship and the Explained Variance | 106 |
| 5.3.6 | Interpretations of the Correlation Coefficient | 108 |
| 5.3.7 | Standardized Coefficients | 110 |
| 5.3.8 | The Significance Test | 113 |
| 5.4 | Multiple Regression Analysis: The Influence of Working and Mean Age at Marriage on Childlessness | 115 |
| 5.4.1 | The Model | 115 |
| 5.4.2 | Geometric Approach | 116 |
| 5.4.3 | Objectives of the Technique | 118 |
| 5.4.4 | Preparatory Bivariate Analyses | 118 |
| 5.4.5 | Calculation of the Regression Function | 119 |
| 5.4.6 | The Strength of the Relationship and the Explained Variance | 121 |
| 5.4.7 | Standardized Partial Regression Coefficients | 122 |
| 5.4.8 | The Significance Test | 124 |
| 5.4.9 | The Tests of Additivity and Linearity | 126 |
| 5.4.10 | The Multicollinearity Problem | 128 |
| 5.4.11 | The Analysis of Residuals | 131 |
| 5.4.12 | Multiple Regression Analysis in Matrix Notation | 132 |
| 5.4.13 | SPSS for Windows Output of Multiple Regression Analysis | 135 |
| 6 | PARTIAL CORRELATION AND PATH ANALYSIS: THE CAUSAL INFLUENCE OF CHRISTIAN BELIEFS ON ANTI-SEMITISM | 140 |
| 6.1 | The Research Problem and the Causal Diagram | 140 |
| 6.2 | The Data Matrix | 142 |
| 6.3 | Partial Correlation Analysis | 142 |
| 6.3.1 | The Model | 142 |
| 6.3.2 | Geometric Approach | 145 |
| 6.3.3 | Objectives of the Technique | 149 |
| 6.3.4 | Calculation of the Partial Correlation | 149 |

| | | |
|-------|--|-----|
| 6.3.5 | The Coefficient of Part Correlation | 154 |
| 6.3.6 | The Significance Tests | 157 |
| 6.4 | The Simon–Blalock Procedure for Complex Causal Models | 157 |
| 6.5 | Path Analysis | 159 |
| 6.6 | SPSS for Windows Output of Partial Correlation and Path Analysis | 179 |
| 7 | ANALYSIS OF VARIANCE AND COVARIANCE: THE EFFECT OF INTERACTION OF MONETARY REWARDS AND TASK INTEREST ON MOTIVATION | 183 |
| 7.1 | The Research Problem and the Causal Diagram | 183 |
| 7.2 | The Data Matrix | 184 |
| 7.3 | The Model of Analysis of Variance | 186 |
| 7.4 | Geometric Approach | 188 |
| 7.5 | Objectives of the Technique | 192 |
| 7.6 | Calculations in One-Way ANOVA: Classical Approach | 193 |
| 7.7 | The ANOVA Summary Table | 196 |
| 7.8 | The t Test as Simplified F Test | 196 |
| 7.9 | Calculations in Two-Way ANOVA: Classical Approach | 197 |
| 7.10 | The Dummy Regression Approach | 201 |
| 7.11 | Testing the Global Model via the Regression Approach | 204 |
| 7.12 | Analysis of Covariance | 206 |
| 7.13 | The Factorial Experiment | 209 |
| 7.14 | The 2×2 Factorial Design | 210 |
| 7.15 | The 2×3 Factorial Design | 212 |
| 7.16 | Orthogonality, Homoscedasticity, Normality, Linearity | 214 |
| 7.17 | SPSS for Windows Output of ANOVA and ANCOVA | 215 |
| 8 | TWO-GROUP DISCRIMINANT ANALYSIS: POOR AND RICH NEIGHBOURHOODS | 231 |
| 8.1 | The Research Problem and the Causal Diagram | 231 |
| 8.2 | The Data Matrix | 232 |
| 8.3 | The Model of Discriminant Analysis | 233 |
| 8.4 | Geometric Approach | 235 |
| 8.5 | Objectives of the Technique | 238 |
| 8.6 | Preparatory Calculations: Matrices T , B , W and C_w | 239 |
| 8.7 | Calculation of the Discriminant Function t | 242 |
| 8.8 | Classification and Prediction | 246 |
| 8.9 | Significance Testing: Preparatory Remarks | 248 |
| 8.10 | Significance Testing: Univariate Tests | 249 |
| 8.11 | Significance Testing: the Multivariate Test | 250 |
| 8.12 | Mahalanobis' Distance D^2 | 251 |
| 8.13 | The Dummy Regression Approach | 252 |
| 8.14 | Equal Within-Groups Covariance Matrices: Box's M test | 254 |
| 8.15 | SPSS for Windows Output of Discriminant Analysis | 255 |

| | | |
|--------|---|-----|
| 9 | FACTOR ANALYSIS: THE INVESTIGATION OF MARITAL ADJUSTMENT | 266 |
| 9.1 | Principal Components Analysis | 266 |
| 9.1.1 | The Research Problem and the Diagram | 266 |
| 9.1.2 | The Data Matrix | 267 |
| 9.1.3 | The Model of Principal Components Analysis | 268 |
| 9.1.4 | Geometric Approach | 269 |
| 9.1.5 | Objectives of the Technique | 270 |
| 9.1.6 | Examining the Eigenstructure of X or R : Introductory Remarks on Singular Value Decomposition | 271 |
| 9.1.7 | Eigenvalues and Eigenvectors of the Marital Adjustment Data | 272 |
| 9.1.8 | Matrix C of Component Scores | 274 |
| 9.1.9 | Matrix A of Component Loadings | 276 |
| 9.1.10 | The measure of Redundancy of a Component | 278 |
| 9.1.11 | Matrix A of Component Loadings and the Explained Variance | 278 |
| 9.1.12 | How Many Components? | 280 |
| 9.1.13 | Component Rotation | 281 |
| 9.1.14 | Orthogonal Rotation | 283 |
| 9.1.15 | Oblique Rotation | 283 |
| 9.1.16 | SPSS for Windows Output of PCA | 284 |
| 9.2 | Principal Factor Analysis | 290 |
| 9.2.1 | The Research Problem and the Diagram | 290 |
| 9.2.2 | The Data Matrix | 290 |
| 9.2.3 | The Model of Principal Factor Analysis | 290 |
| 9.2.4 | The Reduced Correlation Matrix | 292 |
| 9.2.5 | Eigenvalues and Eigenvectors of the Marital Adjustment Data | 293 |
| 9.2.6 | The Factor Matrix A for all Factors: The Problem of Negative Eigenvalues | 294 |
| 9.2.7 | Substantial Difference Between PFA and PCA | 295 |
| 9.2.8 | Factor Matrix A for the First Factor and Further Iterations | 295 |
| 9.2.9 | The Communalities | 295 |
| 9.2.10 | Rotations and Factor Scores | 296 |
| 9.2.11 | SPSS for Windows Output of PFA | 297 |
| 9.3 | Variations of Factor Analysis Methods | 299 |
| 9.3.1 | The Diagonal Method | 300 |
| 9.3.2 | The Centroid Method | 303 |
| 9.3.3 | The Minimum Residuals Method (MINRES) | 307 |
| 9.3.4 | Canonical Factor Analysis | 308 |
| 9.3.5 | The Maximum Likelihood Method | 310 |
| 9.3.6 | Alpha Factor Analysis | 312 |
| 9.3.7 | Image Analysis | 315 |
| 9.3.8 | The Multiple Group Method | 317 |
| 9.4 | Other Methods in the World of Factor Analysis | 319 |
| 9.4.1 | <i>R</i> and <i>Q</i> Factor Analysis | 320 |
| 9.4.2 | Non-linear and Non-metric Factor Analysis | 321 |
| 9.4.3 | Higher-Order Factor Analysis | 321 |

| | | |
|---------|---|-----|
| 10 | CANONICAL CORRELATION ANALYSIS: THE STUDY OF ECONOMIC INEQUALITY AND POLITICAL INSTABILITY | 322 |
| 10.1 | The Research Problem and the Causal Diagram | 322 |
| 10.2 | The Data Matrix | 323 |
| 10.3 | The Model of Canonical Correlation Analysis | 324 |
| 10.4 | Three Types of Correlations | 325 |
| 10.5 | Geometric Approach | 326 |
| 10.6 | Objectives of the Technique | 328 |
| 10.7 | Examination of the Eigenstructure of the $R_{yy}^{-1} R_{xy}^{-1} R_{xx}^{-1} R_{xy}$ Matrix | 330 |
| 10.8 | Examination of the Eigenstructure of Russett's Data | 333 |
| 10.9 | The A and B Matrices of Canonical Weights | 335 |
| 10.10 | The Canonical Variables x^* and y^* | 336 |
| 10.11 | A Causal Approach to Canonical Correlation Analysis | 337 |
| 10.12 | The Significance Tests | 338 |
| 10.13 | SPSS for Windows Output of Canonical Correlation Analysis | 339 |
| 11 | TECHNIQUES WITH MULTIPLE DEPENDENT VARIABLES | 345 |
| 11.1 | Multivariate Analysis of Variance; Where is the best place on earth to live? | 345 |
| 11.1.1 | The Research Problem and the Causal Diagram | 345 |
| 11.1.2 | The Data Matrix | 346 |
| 11.1.3 | Objectives of the Technique | 346 |
| 11.1.4 | Student's t , Fisher's F , Hotelling's T and Λ | 347 |
| 11.1.5 | Preparatory Calculations: the Matrices W , B and T | 348 |
| 11.1.6 | Wilks's Lambda Test | 350 |
| 11.1.7 | Alternatives for Wilks's lambda Test: Multivariate Analysis of Variance as the Reverse of Discriminant Analysis | 352 |
| 11.1.8 | Multivariate Analysis of Variance, an Entire World | 353 |
| 11.1.9 | Assumptions | 354 |
| 11.1.10 | SPSS for Windows Output of Multivariate Analysis of Variance | 354 |
| 11.2 | Multiple Discriminant Analysis: Enclaves of Cubans in Miami: The Triple Labour Market Model | 356 |
| 11.2.1 | The Research Problem and the Causal Diagram | 356 |
| 11.2.2 | The Data Matrix | 358 |
| 11.2.3 | Wilks's Lambda Test | 358 |
| 11.2.4 | Wilks's Lambda as the Ratio $ \mathbf{W} / \mathbf{T} $ | 360 |
| 11.2.5 | Wilks's Lambda Test from the Eigenstructure of $\mathbf{W}^{-1}\mathbf{B}$ | 360 |
| 11.2.6 | Classification | 362 |
| 11.2.7 | Homoscedasticity | 362 |
| 11.3 | Multiple Discriminant Analysis as Canonical Correlation Analysis | 363 |
| 11.3.1 | SPSS for Windows Output of Multiple Discriminant Analysis | 365 |
| 11.3.2 | SPSS for Windows Output of Multiple Discriminant Analysis as Canonical Correlation Analysis | 368 |
