

Contents

1. Introduction, 3

- Examples, 3
- Distinguishing Characteristics, 5
- The Impact of These Characteristics, 6
- Perspective, 10
- Endnotes, 18

2. Planning the Trial, 19

- The Research Question, 19
- The Research Team, 20
- The Research Design, 21
- Variables of Interest and Their Measures, 46
- The Intervention, 48
- Preparing a Proposal, 50
- Summary, 63
- Endnotes, 63

3. Research Designs, 65

- Main-Effect and Factorial Designs, 65
- The Data-Collection Schedule, 66
- Cross-sectional and Cohort Designs, 70
- A Priori* Matching and Stratification, 72
- Summary, 74

4. Planning the Analysis, 77

- Fundamentals, 77
- Statistical Models, 84

Technical Issues Related to Statistical Models, 92
The Unit of Analysis in Statistical Models, 104
General Strategies for Model-Based Inference, 107
Randomization or Permutation Tests, 115
Computer Software, 117
Implementation Issues, 126
Summary, 128
Endnotes, 129

5. Analyses for Nested Cross-Sectional Designs, 131

Organization of the Chapter, 131
Posttest-Only Control Group Design, 132
Pretest-Posttest Control Group Design, 140
Stratification or Matching in the Analysis, 146
Additional Baseline Or Follow-up Intervals, 161
Summary, 176
Endnotes, 176

6. Analyses for Nested Cohort Designs, 179

Posttest-Only Control Group Design, 179
Pretest-Posttest Control Group Design, 179
Stratification or Matching in the Analysis, 190
Additional Baseline or Follow-up Intervals, 212
Summary, 220
Endnotes, 220

7. Applications of Analyses for Nested Cross-Sectional Designs, 223

Organization of the Chapter, 223
Posttest-Only Control Group Design, 227
Pretest-Posttest Control Group Design, 252
Stratification or Matching in the Analysis, 261
Additional Baseline or Follow-up Intervals, 266
Summary, 288
Endnotes, 290

8. Applications of Analyses for Nested Cohort Designs, 295

Posttest-Only Control Group Design, 295
Pretest-Posttest Control Group Design, 296

Stratification or Matching in the Analysis, 319
Additional Baseline or Follow-up Intervals, 326
Summary, 345
Endnotes, 346

9. Sample Size, Detectable Difference, and Power, 349

Factors That Determine Power, 350
Fundamentals of Power Analysis, 353
Extension to Other Design and Analysis Plans, 364
Examples, 396
Summary, 412
Endnotes, 412

10. Case Studies, 415

Nested Cross-Sectional Designs, 415
Nested Cohort Designs, 430
Summary, 443
Endnotes, 443

References, 445

Author Index, 457

Subject Index, 459
