| Series Preface .....                                                                                                                        | ix   |
| Preface .....                                                                                                                               | xi   |
| Contributors .....                                                                                                                          | xvii |
| <br>                                                                                                                                        |      |
| Chapter 1 Hearing in Fishes and Amphibians: An Introduction ..                                                                              | 1    |
| RICHARD R. FAY AND ARTHUR N. POPPER                                                                                                         |      |
| Chapter 2 Hearing in Two Worlds: Theoretical and Actual<br>Adaptive Changes of the Aquatic and Terrestrial Ear<br>for Sound Reception ..... | 15   |
| BERND FRITZSCH                                                                                                                              |      |
| Chapter 3 The Auditory Periphery in Fishes .....                                                                                            | 43   |
| ARTHUR N. POPPER AND RICHARD R. FAY                                                                                                         |      |
| Chapter 4 The Acoustic Periphery of Amphibians: Anatomy and<br>Physiology .....                                                             | 101  |
| EDWIN R. LEWIS AND PETER M. NARINS                                                                                                          |      |
| Chapter 5 Anatomy of the Central Auditory Pathways of Fish<br>and Amphibians .....                                                          | 155  |
| CATHERINE A. McCORMICK                                                                                                                      |      |
| Chapter 6 Central Auditory Processing in Fish and Amphibians .                                                                              | 218  |
| ALBERT S. FENG AND NICOLE A.M. SCHELLART                                                                                                    |      |
| Chapter 7 The Sense of Hearing in Fishes and Amphibians .....                                                                               | 269  |
| RICHARD R. FAY AND ANDREA MEGELA SIMMONS                                                                                                    |      |
| Chapter 8 The Enigmatic Lateral Line System .....                                                                                           | 319  |
| SHERYL COOMBS AND JOHN C. MONTGOMERY                                                                                                        |      |
| Chapter 9 Acoustic Communication in Fishes and Frogs .....                                                                                  | 363  |
| RANDY ZELICK, DAVID A. MANN, AND<br>ARTHUR N. POPPER                                                                                        |      |
| <br>                                                                                                                                        |      |
| Index .....                                                                                                                                 | 413  |
