

## TABLE OF CONTENTS

Chapter 1	
INTRODUCTION.....	1
Chapter 2	
FUNDAMENTAL CONCEPT OF BIOAVAILABILITY .....	7
I. DEFINITION OF BIOAVAILABILITY .....	7
A. UNALTERED FORM.....	7
B. SYSTEMIC CIRCULATION .....	8
C. RELATIONSHIP BETWEEN EXTENT AND RATE OF BIOAVAILABILITY.....	8
D. EXTENT OF BIOAVAILABILITY.....	9
1. Absolute bioavailability.....	10
2. Relative bioavailability.....	11
II. BIOAVAILABILITY IN HEALTH RISK ASSESSMENT .....	12
A. BIOLOGICALLY EFFECTIVE DOSE.....	13
B. INTERNAL DOSE AND AVERAGE DAILY INTERNAL DOSE .....	13
C. EXTERNAL DOSE AND AVERAGE DAILY EXTERNAL DOSE .....	16
III. SUMMARY .....	17
Chapter 3	
MECHANISM OF ABSORPTION.....	19
I. RESPIRATORY SYSTEM.....	19
A. STRUCTURE AND FUNCTION.....	19
B. RATE-LIMITING PROCESSES FOR GASEOUS PHASE CONTAMINANTS.....	22
C. OTHER FACTORS INFLUENCING RESPIRATORY BIOAVAILABILITY FOR GASES AND VAPORS .....	24
D. RATE-LIMITING PROCESSES FOR PARTICULATE PHASE CONTAMINANTS.....	26
1. Deposition .....	28
2. Clearance .....	33
a. Water Insoluble Aerosols .....	33
b. Water Soluble Aerosols .....	34
3. Retention.....	34
E. OTHER FACTORS INFLUENCING RESPIRATORY BIOAVAILABILITY FOR AEROSOLS.....	35
II. GASTROINTESTINAL SYSTEM.....	36
A. STRUCTURE AND FUNCTION.....	36
B. RATE-LIMITING PROCESSES.....	38
C. OTHER FACTORS INFLUENCING ORAL BIOAVAILABILITY.....	41

III. SKIN.....	44
A. STRUCTURE AND FUNCTION.....	44
B. RATE-LIMITING PROCESSES.....	45
C. OTHER FACTORS INFLUENCING DERMAL BIOAVAILABILITY.....	47
IV. SUMMARY.....	49
Chapter 4	
EXPERIMENTAL METHODS FOR EVALUATING BIOAVAILABILITY.....	
I. GENERAL <i>IN VIVO</i> METHODS .....	51
A. MEASUREMENT OF BLOOD LEVELS.....	51
B. MEASUREMENT OF THE CUMULATIVE URINARY EXCRETION.....	53
C. MASS-BALANCE TECHNIQUE.....	54
D. MEASUREMENT OF TOXIC RESPONSE.....	56
II. SPECIFIC METHODS FOR THE INHALATION EXPOSURE ROUTE.....	56
A. DETERMINATION OF DEPOSITION FRACTION.....	57
1. Gaseous Phase .....	57
2. Particulate Phase .....	59
B. MECHANICAL CLEARANCE FRACTION.....	59
C. DISSOLUTION RATE.....	60
D. <i>IN VITRO</i> METHODS: ISOLATED PERFUSED LUNG .....	61
III. SPECIFIC METHODS FOR THE INGESTION EXPOSURE ROUTE.....	62
A. MEASUREMENT OF FECAL EXCRETION.....	64
B. MEASUREMENT OF LIVER RATIO.....	65
C. DISSOLUTION TESTING.....	65
D. METHODS BASED ON THE pH PARTITION THEORY.....	66
IV. SPECIFIC METHODS FOR DERMAL EXPOSURE ROUTE.....	66
A. SURFACE DISAPPEARANCE.....	67
B. <i>IN VITRO</i> METHODS: BIOLOGICAL MEMBRANE MODELS .....	67
C. <i>IN VITRO</i> METHODS: ARTIFICIAL MEMBRANE MODELS.....	75
V. SUMMARY.....	69
	70

## Chapter 5

### EXPOSURE ROUTES AND BIOAVAILABILITY FACTORS FOR SELECTED CONTAMINANTS .....

I. ARSENIC.....	75
	75

A.	EXPOSURE ROUTES AND RECEPTORS.....	76
B.	TOXICOKINETICS (FOLLOWING ABSORPTION).....	77
1.	Distribution.....	77
2.	Metabolism and Excretion.....	77
C.	BIOAVAILABILITY.....	78
1.	Inhalation.....	78
a.	Humans.....	78
b.	Animals.....	78
2.	Ingestion.....	80
a.	Humans.....	80
b.	Animals.....	81
3.	Dermal .....	82
4.	Summary .....	82
D.	UNCERTAINTIES .....	82
E.	CONCLUSIONS.....	89
F.	RECOMMENDATIONS.....	90
<b>II.</b>	<b>CADMIUM.....</b>	<b>91</b>
A.	EXPOSURE ROUTES AND RECEPTORS.....	91
B.	TOXICOKINETICS (FOLLOWING ABSORPTION).....	92
1.	Distribution.....	92
2.	Metabolism and Excretion.....	92
C.	BIOAVAILABILITY.....	92
1.	Inhalation.....	92
2.	Ingestion.....	94
3.	Dermal .....	95
4.	Summary .....	95
D.	UNCERTAINTIES .....	95
E.	CONCLUSIONS.....	100
F.	RECOMMENDATIONS.....	100
<b>III.</b>	<b>CHROMIUM AND CHROMIUM COMPOUNDS.....</b>	<b>101</b>
A.	EXPOSURE ROUTES AND RECEPTORS.....	102
B.	TOXICOKINETICS (FOLLOWING ABSORPTION).....	103
1.	Distribution.....	103
2.	Metabolism and Excretion.....	103
C.	BIOAVAILABILITY.....	103
1.	Inhalation.....	103
a.	Humans.....	103
b.	Animals.....	104
2.	Ingestion.....	105
a.	Humans.....	105
b.	Animals .....	106
c.	Others .....	106
3.	Dermal .....	106
4.	Summary .....	107
D.	UNCERTAINTIES .....	107

E. CONCLUSIONS.....	115
F. RECOMMENDATIONS.....	116
<b>IV. COPPER.....</b>	<b>117</b>
A. EXPOSURE ROUTES AND RECEPTORS.....	117
B. TOXICOKINETICS (FOLLOWING ABSORPTION).....	118
1. Distribution.....	118
2. Metabolism and Excretion.....	118
C. BIOAVAILABILITY.....	119
1. Inhalation.....	119
2. Ingestion.....	119
3. Dermal .....	120
D. UNCERTAINTIES .....	120
E. CONCLUSIONS.....	121
F. RECOMMENDATIONS.....	124
<b>V. MERCURY.....</b>	<b>125</b>
A. EXPOSURE ROUTES AND RECEPTORS.....	125
B. TOXICOKINETICS (FOLLOWING ABSORPTION).....	126
1. Distribution.....	126
2. Metabolism and Excretion.....	126
C. BIOAVAILABILITY.....	127
1. Inhalation.....	127
2. Ingestion.....	127
3. Dermal .....	128
4. Summary.....	128
D. UNCERTAINTIES .....	129
E. CONCLUSIONS.....	129
F. RECOMMENDATIONS.....	133
<b>VI. LEAD.....</b>	<b>134</b>
A. EXPOSURE ROUTES AND RECEPTORS.....	134
B. TOXICOKINETICS (FOLLOWING ABSORPTION).....	135
1. Distribution.....	135
2. Metabolism and Excretion.....	136
C. BIOAVAILABILITY.....	136
1. Inhalation.....	136
2. Ingestion.....	137
3. Dermal .....	138
4. Summary.....	139
D. UNCERTAINTIES .....	139
E. CONCLUSIONS.....	144
F. RECOMMENDATIONS.....	144
<b>VII. 2,3,7,8-TETRACHLORODIBENZO-p-DIOXIN (TCDD).....</b>	<b>145</b>
A. EXPOSURE ROUTES AND RECEPTORS.....	146
B. TOXICOKINETICS (FOLLOWING ABSORPTION).....	146
1. Distribution .....	146
2. Metabolism and Excretion .....	146

C.	BIOAVAILABILITY.....	147
1.	Inhalation .....	147
2.	Ingestion .....	147
3.	Dermal.....	148
4.	Summary.....	149
D.	UNCERTAINTIES .....	149
E.	CONCLUSIONS.....	154
F.	RECOMMENDATIONS.....	154
VIII.	POLYNUCLEAR AROMATIC HYDROCARBONS (PAHs).....	155
A.	EXPOSURE ROUTES AND RECEPTORS.....	156
B.	TOXICOKINETICS (FOLLOWING ABSORPTION).....	157
1.	Distribution.....	157
2.	Metabolism and Excretion.....	157
C.	BIOAVAILABILITY.....	158
1.	Inhalation.....	158
a.	Humans.....	158
b.	Animals.....	158
2.	Ingestion.....	159
a.	Humans.....	159
b.	Animals.....	159
3.	Dermal .....	159
a.	Humans.....	159
b.	Animals.....	160
4.	Summary.....	162
D.	UNCERTAINTIES .....	162
E.	CONCLUSIONS.....	172
F.	RECOMMENDATIONS.....	173
IX.	BENZENE.....	174
A.	EXPOSURE ROUTES AND RECEPTORS.....	174
B.	TOXICOKINETICS (FOLLOWING ABSORPTION).....	175
1.	Distribution.....	175
2.	Metabolism .....	175
3.	Excretion .....	176
C.	BIOAVAILABILITY.....	176
1.	Inhalation.....	176
a.	Humans.....	176
b.	Animals.....	176
2.	Ingestion.....	177
3.	Dermal .....	177
a.	Humans.....	177
b.	Animals.....	177
4.	Summary.....	178
E.	UNCERTAINTIES .....	178
F.	CONCLUSIONS.....	179
	RECOMMENDATIONS.....	183

X. TOLUENE.....	184
A. EXPOSURE ROUTES AND RECEPTORS.....	184
B. TOXICOKINETICS (FOLLOWING ABSORPTION).....	184
1. Distribution.....	184
2. Metabolism and Excretion.....	185
C. BIOAVAILABILITY.....	185
1. Inhalation.....	185
2. Ingestion.....	186
a. Humans.....	186
b. Animals.....	186
3. Dermal .....	186
a. Humans.....	186
b. Animals.....	187
4. Summary.....	187
D. UNCERTAINTIES .....	191
E. CONCLUSIONS.....	191
F. RECOMMENDATIONS.....	192
<b>XI. POLYCHLORINATED PHENOLS:</b>	
PENTACHLOROPHENOL,	
2,4,5-TRICHLOROPHENOL,	
2,4,6-TRICHLOROPHENOL,	
2,3,4,5-TETRACHLOROPHENOL.....	193
A. EXPOSURE ROUTES AND RECEPTORS.....	194
B. TOXICOKINETICS (FOLLOWING ABSORPTION).....	194
1. Distribution.....	194
2. Metabolism.....	194
C. BIOAVAILABILITY.....	195
1. Inhalation.....	195
2. Ingestion.....	195
a. Humans.....	195
b. Animals.....	196
3. Dermal .....	196
4. Summary.....	196
D. UNCERTAINTIES .....	197
E. CONCLUSIONS.....	201
F. RECOMMENDATIONS.....	202
<b>XII. PHENOL.....</b>	203
A. EXPOSURE ROUTES AND RECEPTORS.....	203
B. TOXICOKINETICS (FOLLOWING ABSORPTION).....	203
1. Distribution.....	203
2. Metabolism.....	203
C. BIOAVAILABILITY.....	204
1. Inhalation.....	204
2. Ingestion.....	204
3. Dermal .....	204

4. Summary.....	205
D. UNCERTAINTIES .....	205
E. CONCLUSIONS.....	209
F. RECOMMENDATIONS.....	209
XIII. ANILINE.....	210
A. EXPOSURE ROUTES AND RECEPTORS.....	210
B. TOXICOKINETICS (FOLLOWING ABSORPTION).....	210
1. Distribution.....	210
2. Metabolism and Excretion.....	210
C. BIOAVAILABILITY.....	211
1. Inhalation.....	211
2. Ingestion.....	211
3. Dermal .....	211
4. Summary.....	211
D. UNCERTAINTIES .....	211
E. CONCLUSIONS.....	213
F. RECOMMENDATIONS.....	213

## **Chapter 6**

BIOAVAILABILITY OF XENOBIOTICS	215
FROM CONTAMINATED SITES .....	215
I. IDENTIFICATION OF EXPOSURE ROUTES.....	215
II. RELIABILITY AND VALIDITY OF	
THE BIOAVAILABILITY FACTORS.....	216
A. CHOICE OF EXPERIMENTAL METHODS .....	216
B. ANALYTICAL CAPABILITIES.....	222
C. SPECIES DIFFERENCES.....	222
D. MIXTURES AND VEHICLES .....	222
E. MECHANISM OF TOXICITY .....	222
F. CHEMICAL FORMS .....	223
G. EXPOSURE DURATION AND FREQUENCY .....	223
III. PRIORITY NEEDS FOR FURTHER RESEARCH.....	224

## **Chapter 7**

CONSIDERATIONS FOR APPLYING	
BIOAVAILABILITY TO HEALTH RISK ASSESSMENT .....	227
I. METALS.....	227
II. ORGANIC XENOBIOTICS .....	228
III. OTHER APPLICATION CONSIDERATIONS.....	228
IV. RISK MANAGEMENT CONSIDERATIONS .....	230
REFERENCES.....	237
GLOSSARY OF TERMS.....	285
INDEX.....	291

## LIST OF TABLES

Table 1-1	Parameters Needed for Calculation of External Dose and Internal Dose .....	3
Table 3-1	Main Physiological Functions of the Respiratory Tract .....	23
Table 3-2	Main Physiological Functions of the Gastrointestinal Tract .....	39
Table 3-3	The Barriers and Rate-Limiting Processes for Absorption of Xenobiotics through Three Exposure Routes .....	49
Table 3-4	Factors Influencing Bioavailability in Humans .....	50
Table 4-1	Choice of Experimental Methods for Study of Bioavailability .....	71
Table 5-1	Respiratory Bioavailability of Arsenic in Humans and Animals .....	84
Table 5-2	Oral Bioavailability of Arsenic in Humans .....	85
Table 5-3	Oral Bioavailability of Arsenic in Animals .....	86
Table 5-4	Dermal Bioavailability of Arsenic in Animals <i>in vivo</i> and <i>in vitro</i> .....	88
Table 5-5	Respiratory Bioavailability of Cadmium in Humans and Animals .....	96
Table 5-6	Oral Bioavailability of Cadmium in Humans .....	97
Table 5-7	Oral Bioavailability of Cadmium in Animals .....	98
Table 5-8	Dermal Bioavailability of Cadmium in Humans and Animals .....	99
Table 5-9	Respiratory Bioavailability of Chromium in Animals .....	109
Table 5-10	Oral Bioavailability of Chromium in Humans .....	110
Table 5-11	Oral Bioavailability of Chromium in Animals .....	111
Table 5-12	Dermal Bioavailability of Chromium in Animals .....	113
Table 5-13	Experiments of Oral Bioavailability of Copper in Humans .....	122
Table 5-14	Respiratory Bioavailability of Mercury in Humans and Animals .....	130
Table 5-15	Oral Bioavailability of Mercury in Humans and Animals .....	131
Table 5-16	Dermal Bioavailability of Mercury in Humans and Animals .....	132
Table 5-17	Respiratory Bioavailability of Lead in Humans .....	140
Table 5-18	Oral Bioavailability of Lead in Humans .....	141
Table 5-19	Dermal Bioavailability of Lead in Humans and Animals .....	143
Table 5-20	Respiratory Bioavailability of 2,3,7,8-Tetrachlorodibenzo-p-dioxin in Animals .....	151

Table 5-21a	Relative Oral Bioavailability of 2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) in Humans and Animals .....	151
Table 5-21b	Oral Bioavailability of 2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) in Humans and Animals.....	152
Table 5-22	Dermal Bioavailability of 2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) in Humans and Animals.....	153
Table 5-23	Respiratory Bioavailability of Some PAHs in Animals.....	164
Table 5-24	Oral Bioavailability of Some PAHs in Animals.....	165
Table 5-25	Dermal Bioavailability of Some PAHs in Humans and Animals ( <i>in vivo</i> and <i>in vitro</i> ).....	166
Table 5-26	Respiratory Bioavailability of Benzene in Humans.....	180
Table 5-27	Oral Bioavailability of Benzene in Animals .....	180
Table 5-28	Dermal Bioavailability of Benzene in Humans and Animals ( <i>in vivo</i> ).....	181
Table 5-29	Dermal Bioavailability of Benzene in Humans and Animals ( <i>in vitro</i> ).....	182
Table 5-30	Respiratory Bioavailability of Toluene in Humans.....	188
Table 5-31	Oral Bioavailability of Toluene in Humans and Animals.....	189
Table 5-32	Dermal Bioavailability of Toluene in Humans and Animals.....	190
Table 5-33	Respiratory Bioavailability of Pentachlorophenol in Humans and Animals .....	198
Table 5-34	Oral Bioavailability of PCP and 2,4,6-T <sub>3</sub> CP in Humans and Animals .....	199
Table 5-35	Dermal Bioavailability of PCP and 2,4,6-T <sub>3</sub> CP in Humans and Animals .....	200
Table 5-36	Bioavailability of Phenol in Humans and Animals ( <i>in vivo</i> ).....	206
Table 5-37	Dermal Bioavailability of Phenol in Humans and Animals ( <i>in vitro</i> ).....	208
Table 5-38	Bioavailability of Aniline in Humans and Animals .....	212
Table 6-1	Potential Exposure Routes to Xenobiotics for the General population.....	217
Table 6-2	Summary of Bioavailability Factors (%), or Permeability in the Case of Dermal Contact, for Selected Xenobiotics .....	218
Table 7-1	Available Information on Bioavailability Factors for Selected Xenobiotics .....	232

## LIST OF FIGURES

Figure 2-1	A blood concentration-time curve.....	9
Figure 2-2	Relationship of various doses, their role and application in quantitative risk assessment.....	18
Figure 3-1	Proposed model of a cell membrane.....	20
Figure 3-2	Diagram of lung and bronchial tree .....	20
Figure 3-3	Diagram of bronchiole and alveoli.....	21
Figure 3-4	Structure of air-blood barrier.....	21
Figure 3-5	Gaseous phase absorption of xenobiotics .....	24
Figure 3-6	Deposition, retention and clearance of aerosols.....	27
Figure 3-7	Major mechanisms of deposition of inhaled aerosols in the respiratory tract.....	28
Figure 3-8	Regional deposition fraction for aerosols inhaled by humans.....	29
Figure 3-9a	Total deposition fraction vs. aerosol size distribution via nasal and oral inhalation in humans.....	31
Figure 3-9b	Deposition fraction for the upper respiratory tract vs. aerosol size distribution via nasal and oral inhalation in humans .....	31
Figure 3-9c	Deposition fraction for the tracheobronchial vs. aerosol size distribution via oral inhalation in humans .....	32
Figure 3-9d	Deposition fraction for the pulmonary region vs. aerosol size distribution via nasal and oral inhalation in humans .....	32
Figure 3-10	Diagram of gastrointestinal tract.....	37
Figure 3-11	Diagram of the wall of gastrointestinal tract.....	37
Figure 3-12	Diagram of the intestinal epithelium.....	38
Figure 3-13	Absorptive steps via ingestion.....	40
Figure 3-14	Diagram of the skin.....	44
Figure 3-15	Absorptive steps via dermal route .....	46
Figure 4-1	Determination of the bioavailability factor based on mass-balance technique .....	55
Figure 4-2	A procedure for calculation of the respiratory bioavailability factor of aerosols based on deposition-clearance-retention process .....	57
Figure 4-3	<i>In vitro</i> experimental methods for studying oral bioavailability.....	63
Figure 4-4	Diagram of a typical diffusion cell .....	69
Figure 5-1	Respiratory bioavailability of inorganic arsenic in human volunteers.....	79
Figure 5-2	Bioavailability factors of inorganic arsenic in humans and animals by three exposure routes.....	83

Figure 5-3	Bioavailability factors of cadmium in humans and animals by three exposure routes.....	95
Figure 5-4	Bioavailability factors of chromium compounds in humans and animals by three exposure routes.....	108
Figure 5-5	Oral bioavailability factors of copper in humans.....	120
Figure 5-6	Bioavailability factor vs. daily intake of dietary copper.....	121
Figure 5-7	Bioavailability factors of mercury in humans and animals by three exposure routes.....	129
Figure 5-8	Bioavailability factors of lead in humans and animals by three exposure routes.....	139
Figure 5-9	Bioavailability factors of 2,3,7,8-Tetrachlorodibenz-p-dioxin in humans and animals by three exposure routes .....	150
Figure 5-10	Bioavailability factors of benzo[a]pyrene in humans and animals by three exposure routes.....	163
Figure 5-11	Dermal bioavailability factors for individual compounds after application of the PAHs-containing mixtures to animal skin .....	163
Figure 5-12	Bioavailability factors of benzene in humans and animals by three exposure routes.....	179
Figure 5-13	Bioavailability factors of toluene in humans and animals by three exposure routes.....	187
Figure 5-14	Bioavailability factors for pentachlorophenol in humans and animals by three exposure routes.....	197
Figure 5-15	Bioavailability factors of phenol ( <i>in vivo</i> ) in humans and animals by three exposure routes.....	205
Figure 7-1	Framework for application of bioavailability factors in quantitative risk assessment.....	234
