

TABLE OF CONTENTS

PREFACE	vii
Part I. MODELING AND COMPUTER SIMULATIONS	1
The Physical Chemistry of Specific Recognition	3
J. Janin	
Approaches to Protein-Ligand Binding from Computer Simulations	21
William L. Jorgensen, Erin M. Duffy, Jonathan W. Essex, Daniel L. Severance, James F. Blake, Deborah K. Jones-Hertzog, Michelle L. Lamb and Julian Tirado-Rives	
Dynamics of Biomolecules: Simulation versus X-Ray and Far-Infrared Experiments	35
S. Hery, M. Souaille and J.C. Smith	
Semiempirical and <i>ab initio</i> Modeling of Chemical Processes: From Aqueous solution to Enzymes	47
Richard P. Muller, Jan Florián and Arie Warshel	
Professional Gambling	79
Rolando Rodriguez and Gerrit Vriend	
Molecular Modeling of Globular Proteins: Strategy ID $\Rightarrow$ 3D: Secondary Structures and Epitopes	121
Alain J.P. Alix	
Physicochemical Properties in Vacuo and in Solution of Some Molecules with Biological Significance from Density Functional Computations	151
Tiziana Marino, T. Mineva, Nino Russo and Marirosa Toscano	
GMMX Conformation Searching and Prediction of MNR Proton-Proton Coupling Constants	179
Fred L. Tobiasson and Gérard Vergoten	
PART II. PROTEINS AND LIPIDS	187
Biomolecular Structure and Dynamics: Recent Experimental and Theoretical Advances	189
R. Kaptein, A.M.J.J. Bonvin and R. Boelens	
What Drives Associations of α -Helical Peptides in Membrane Domains of Proteins? Role of Hydrophobic Interactions	211
Roman G. Efremov and Gérard Vergoten	
Infrared Spectroscopic Studies of Membrane Lipids	229
José Luis R. Arrondo and Félix M. Goñi	
Time-Resolved Infrared Spectroscopy of Biomolecules	243
H. Georg, K. Hauser, C. Rödig, O. Weidlich and F. Siebert	
UV Resonance Raman Determination of α -Helix Melting During the Acid Denaturation of Myoglobin	263
Sanford A. Asher and Zhenhuan Chi	

PART III.	NUCLEIC ACIDS	271
The use of Fourier Transform Infrared (FT-IR) Spectroscopy in the Structural Analysis of Nucleic Acids	Theo Theophanides and Jane Anastassopoulou	273
Geometries and Stabilities of G.GC, T.AT, A.AT and C.GC Nucleic Acid Base Triplets	Tiziana Marino, Nino Russo, Anna Sarubbo and Marirosa Toscano	285
Vibrational Circular Dichroism of Nucleic Acids: <i>Survey of Techniques, Theoretical Background and Example Applications</i>	Timothy A. Keiderling	299
Subject/Author Index		319
