Perturbations of linear quasi-periodic system	1
<i>L. H. Eliasson</i>	
1 Introduction	1
2 Covariance and normal form matrices	13
3 Block splitting	17
4 Quadratic convergence	18
5 Block clustering	25
6 Transversality of resultants	29
7 A Perturbation theorem	34
8 Applications	42
A Appendix A	46
B Appendix B	56
KAM-persistence of finite-gap solutions	61
<i>Sergei B. Kuksin</i>	
Introduction	61
1 Some analysis in Hilbert spaces and scales	61
2 Symplectic structures and Hamiltonian equations	67
3 Lax-integrable Hamiltonian equations and their integrable subsystems	74
4 Finite-gap manifolds and theta-formulas	80
5 Linearised equations and their Floquet solutions	86
6 Linearised Lax-integrable equations	96
7 Normal form	104
8 The KAM theorem	111
9 Examples	117
Analytic linearization of circle diffeomorphisms	125
<i>Jean-Christophe Yoccoz</i>	
1 Introduction	125
2 Arithmetics	127
3 The C^r theory for $r \geq 0$	137
4 Analytic case	146
5 Appendix: Estimates of moduli of annular domains	168

Some open problems related to small divisors	175
<i>S. Marmi, J.-C. Yoccoz</i>	
0 Introduction.....	175
1 One-Dimensional Small Divisor Problems (On Holomorphic Germs and Circle Diffeomorphisms)	175
2 Finite-Dimensional Small Divisor Problems.....	178
3 KAM Theory and Hamiltonian Systems.....	181
4 Linear Quasiperiodic Skew-Products, Spectral Theory and Hamil- tonian Partial Differential Equations	184
