

Contents

A. Aim and Scope of the Study	1
B. Transition and the European Integration Process	5
I. Overlap and Coincidence between Transition and Integration.....	5
II. The Economic Differences between the Advanced Transition Countries and the EU	8
III. The Institutional Framework for European Integration.....	11
IV. The <i>Acquis Communautaire</i>	18
C. Trade Integration between Eastern and Western Europe	22
I. The Issue	22
II. Trade Reorientation of the CEECs since 1989.....	22
1. The Geographical Composition of CEEC Trade	22
2. Reshaping of Functional Regions in Europe	25
III. Expected Long-Term Pattern of CEEC Trade.....	30
1. Estimates Based on a Gravity Model	30
2. A Special Role for Trade with Germany?.....	36
IV. Trade Effects of EU Membership for the CEECs	37
1. Complementarity of Trade Structure	38
2. Is CEEC-EU Integration Harmful for Third Countries?	41
V. Conclusions	44
Appendix to Part C.....	45
1. An Alternative Trade Index	45
2. An Alternative Hierarchical Clustering Technique	47

D. Institutional Integration between Eastern and Western Europe..	55
I. The Issue	55
II. Economic Policy Reforms and Government Credibility	55
III. Credibility Problems in Central and Eastern Europe.....	61
IV. The Link between Institutional Reforms and Economic Growth.	64
V. The Growth Effects of CEEC Accession to the European Union	72
VI. Conclusions	73
Appendix to Part D.....	75
1. The Effects of EU Accession on FDI Flows towards the CEECs.....	75
2. The Effects of EU Accession on the Riskiness of Investing in the CEECs.....	78
E. Modeling Investment Behavior during Transition.....	81
I. The Issue	81
II. The Transition Problem in CGE Modeling	82
1. Static versus Dynamic Models.....	82
2. Accounting for Investment Behavior in CGE Models.....	85
III. The Transition-Country Ramsey (TransRams) Model	87
1. Basic Features.....	87
2. Implementation for a Transition Economy	89
3. Standard Adjustment Cost Function	90
4. Augmented Adjustment Cost Function.....	92
IV. Conclusions	96
F. Modeling the Income and Welfare Effects of Accession to the European Union: A Small Dynamic CGE Model for Poland.....	97
I. The Issue	97
II. The Dynamic CGE Model for Poland	98
1. Consumption of the Representative Household.....	99
2. Investment Structure	102
3. Trade and Capital Flows	103

4. Equilibrium Conditions.....	104
5. Database for the PRINCE Model.....	105
6. Calibration for the Dynamic CGE Model for Poland	105
III. Channels of Membership Effects for Poland.....	108
1. Tariff Reduction and Adoption of the Common External Tariffs of the EU	111
2. Reduction in Trade Costs Resulting from Borders	112
3. Reduction in Technical Barriers to Trade	112
4. Transfers from Brussels	113
5. Other Effects	114
IV. Simulations with the PRINCE Model	117
1. Integration Scenarios	117
2. Results.....	118
3. Welfare Effects versus Income Effects.....	121
4. Issues for Further Research.....	122
V. Conclusions	123
Appendix to Part F	124
1. Sensitivity Analyses.....	124
2. Reductions in the Risk Premium.....	139
3. Solution of the Firm's Intertemporal Optimization Problem in Discrete-Time Formulation.....	142
4. Solution of the Household's Intertemporal Optimization Problem in Discrete-Time Formulation	148
G. Concluding Remarks	150
I. Summary	150
II. Policy Recommendations and Outlook	152
References	157
Index	176
