Preface	xiii
Acknowledgments	xvii
Abbreviations	xxxv

PART ONE	
COMPONENTS OF A RISK-MANAGEMENT POLICY	1

Chapter 1

Financial Instruments and Risk-Management Systems **3**

1.	Introduction	3
2.	Classical and Exotic Derivative Instruments	4
3.	The Personalization of Financial Products— Opportunities and Risks	7
4.	An Industry in Rapid Evolution	9
5.	Real Versus Virtual Assets	12
6.	Stopping the Flow of Red Ink	14
7.	Is Management in Control of Derivatives Trades?	16
8.	A Sound Procedure for Risk Management	19
9.	Accounting for Past-Due and Sour Derivatives	22

Chapter 2

Understanding the Notional Principal Amount and Its Metrics **25**

1.	Introduction	25
2.	The Changing Aspects of Notional Principal	26
3.	Examining Contrarian Approaches to Risk Tolerance	29
4.	A Demodulator for Estimating Risk Based on Notional Principal	31

5.	Converting the Notional Amount to Loans Equivalent	33
6.	Using Military Standards to Gauge Derivatives Exposure	35
7.	Arguments Favorable to Risk Conversion	38
8.	Going Beyond Risk Equivalence	40

Chapter 3

Estimating Fair Value by Marking-to-Market or Marking-to-Model **45**

1.	Introduction	45
2.	Why Is It Important to Estimate Fair Value?	46
3.	Marking-to-Market for Better Risk Management	48
4.	Analogical Reasoning and the Art of Marking-to-Model	51
5.	Highlighting the Role of Parametric Modeling	53
6.	Why an Object-Oriented Solution Is the Better Alternative	55
7.	Shortcomings of Methods of Estimating Fair Value	57
8.	Exploiting the Potential Fair Value Offers	59
9.	Fair Value Estimates Must Be Commensurate to the Amount of Exposure	62

Chapter 4

Capitalizing on Cash Flow and Liquidity **65**

1.	Introduction	65
2.	Advisable Practices in Connection to Cash Flow	66
3.	Looking at Cash Flow from a Financial Statement Viewpoint	69
4.	Results Provided Through Multidimensional Analysis	72
5.	Attributes of a Qualitative Evaluation of Cash Flow	74
6.	Comparison of Cash Flow, Duration, and Effective Duration	76
7.	Paying Attention to the Fundamentals of Liquidity	78
8.	Aspects of Liquidity	80
9.	Cash Liquidity, Funding Risk, and Derivatives Acid Test	83

Chapter 5

Aspects of Legal Risk and Possible Aftermaths **87**

1.	Introduction	87
2.	Legal Issues with Cross-Border Financial Trades	88

3.	Polyvalent Nature and Uncertainty of Legal Aspects	90
4.	Is There Immunity from Legal Risk?	92
5.	CEOs Can Never Be Too Careful	94
6.	Paying Attention to Issues of Personal Responsibility	96
7.	The Laws, the Lawyers, and the Legislators	98
8.	Taking Account of the Law and Legal Decisions	100
9.	Can the Gooda Walker–Lloyd’s Ruling Create a Precedent?	102
10.	Legal Issues, Country Risk, and Off-Balance- Sheet Instruments	104

Chapter 6

Payments, Clearing, and Settlement Risk 107

1.	Introduction	107
2.	National and Cross-Border Payments	108
3.	The Need for Fast Response to Cross-Border Money Flows	110
4.	The Increasing Correlation of Cross-Border Markets	111
5.	The Critical Case of Intraday Payments	114
6.	Using Risk Pricing to Swamp Intraday Exposure	116
7.	Clearinghouses and the Concept of Margins	117
8.	Commodities and Futures Exchanges	119
9.	Electronic Trading Technology at Exchanges and Member Firms	121
10.	ECHO: A Case Study of Failure	123

PART TWO

CONTROL OF EXPOSURE AS PART OF THE STRATEGIC PLAN

127

Chapter 7

Strategic Plans by Financial Institutions, Risk, and Market Opportunity 129

1.	Introduction	129
2.	What Is the Real Reason for Forecasting?	130
3.	Strategic Plans and Structural Prerequisites	132
4.	Capitalizing on the Many Aspects of Strategic Planning	134

5.	Banking Plans, Globalization, and the Changing Financial Industry	137
6.	Can We Develop and Sustain a Winning Strategy?	141
7.	Elaborating a Banking Strategy That Emphasizes the Client	142
8.	Information Technology and the Redefinition of Financial Intermediation	144
9.	What's Behind the Concept of Wealth Cards?	146
10.	A Strategy for Dealing in Derivative Financial Instruments	147

Chapter 8

***Control of Risk by Banks, Nonbanks, and Treasury Operations* 151**

1.	Introduction	151
2.	The Concept of Risk and Its Management	152
3.	Risk Management as a Philosophy of Banking	155
4.	Risks Associated with Investments and Credits	158
5.	How Can the Financial System Face the Challenge of Added Leverage?	160
6.	Running the Treasury for Profits and Its Risks	162
7.	The Cultural Evolution Among Company Treasurers	164
8.	Can External Advisors Help?	166
9.	New Perspectives for Risk Management	168
10.	The Special Case of the Offshores	170

Chapter 9

***Derivatives Financing versus Debt or Equity Financing* 173**

1.	Introduction	173
2.	Prevailing Forms of Financing	174
3.	Company Stocks and Financing Through Equity	176
4.	Can Value Investing Determine the Fair Value of Stock?	178
5.	Profit and Loss with Equity Derivatives	180
6.	Using Commercial Paper and Disintermediation	183
7.	How Investors Get Trapped with High-High Bonds and LYONs	184
8.	The Great Variety in the Securitization of Mortgages	185
9.	Virtual Financial Products Are All over the Market	188
10.	The Popularization of Financial Software	189

Chapter 10**Synthetics and Exotic Derivatives 191**

1.	Introduction	191
2.	Synthetic Positions: An Example with Currencies	192
3.	Synthetic Long/Short Option	193
4.	Hedging with Spreads and Synthetics	196
5.	Straddles	199
6.	Strangles: One Step Further in Complexity	200
7.	Capitalizing on Contango and Backwardation	203
8.	Setting the Stage for a Backwardation Swap	204
9.	Embedded Options	208
10.	Guaranteed Bonds and Other Risky Derivatives	210

Chapter 11**Hedging through the Exploitation of Market Inefficiencies and the Emerging Markets 213**

1.	Introduction	213
2.	Goals and Procedures for Hedging Policies	215
3.	Hedging, Speculation, and Price Differentials	217
4.	Dynamic Solutions and Wrapped Hedges	219
5.	Is There Profit in Exploiting Market Inefficiencies?	222
6.	Capitalizing on Market Inefficiency	224
7.	Investment Uncertainties and the Efficiency Frontier	226
8.	An Efficiency Frontier in Diversification Strategies	229
9.	Examining Investment Trends in Emerging Markets	232

Chapter 12**Securities Lending: How to Precipitate a Banking Crisis 237**

1.	Introduction	237
2.	Bubbles, Bursts, and Panics—A Common Denominator	238
3.	“Strategies for Growth” and Tulip-Type Bubbles	241
4.	Speculation, False Information, and King George I	244
5.	The Art of Securities Lending and Borrowing	246
6.	Repurchase Agreements and Gaping Holes	250
7.	Can You Spare Someone Else’s Assets for a Repo?	252
8.	A Mortgage-Roll Arbitrage Model for Repos	255
9.	How the Regulators Look at Securities Lending	257
10.	Delivery Versus Payment	258

PART THREE
RIGOROUS MODELS AND STRATEGIES FOR
DERIVATIVES-RISK MANAGEMENT **263**

Chapter 13

***Using Return on Risk Capital to Control Exposure and
Keep Ahead of Competition*** **265**

1.	Introduction	265
2.	The Billions of Dollars Lost with Derivatives	267
3.	A Thorough Procedural Infrastructure for Efficient Risk Management	270
4.	Measuring Risks and Rewards Through Risk Capital	274
5.	Using Fuzzy Engineering to Establish the Basis of an Insurance Premium	278
6.	Risk-Related Results and Return on Risk Capital	281
7.	Using the Concepts of Margins and Insurance Premiums with Securities Lending	284
8.	Applying Risk Premiums with Default Risk	286
9.	RORC and Necessary Organizational Decisions on Default Risk	291
10.	Maintaining and Enhancing the Quality of Banking Services	294

Chapter 14

Rocket Science and the New Metrics for the Control of Risk **297**

1.	Introduction	297
2.	Rocket Science Looks at Risk Management	298
3.	Risk Management, the Weibull Distribution and the Chorafas Algorithm	301
4.	Yield Curves Versus Missile Trajectory Curves	305
5.	Handling Systematic and Specific or Unsystematic Risk	307
6.	Toward a Redefinition of Capital Requirements for Banks and Nonbanks	309
7.	The Work Rocket Scientists Can Do with Central Banks	312
8.	Evaluating a Proposal on Capital Adequacy by the Group of Thirty	315
9.	Is There Substance in Netting and Offsetting?	317
10.	Hedge Ratios, Duration, and Macaulay's Model	319
11.	Calculating and Using the Volatility Factor <i>Beta</i>	321

Chapter 15**Using Delta, Gamma, Theta, Kappa, and Rho for Better Risk Management****325**

1.	Introduction	325
2.	Analytical Finance, Heuristics, and Technology	326
3.	Training, Trading, Financial Analysts, and Rocket Scientists	328
4.	Using Mathematical Models for Optimization	331
5.	Delta and Delta Hedges	333
6.	Gamma and Gamma Hedges	336
7.	Theta, Kappa, Rho, and Their Usage	337
8.	Learning to Use Differentiation and Integration	339
9.	Taking Care of Kurtosis in a Risk and Return Distribution	341
10.	Exploiting the Notion of Intrinsic Time	344

Chapter 16**Creating a Culture for Risk Evaluation and Control****347**

1.	Introduction	347
2.	Risk Policies and the Procedures to Support Them	348
3.	Targeting the Entire Array of Risks	351
4.	Reporting Practices for a Risk-Sensitive Culture	353
5.	Choosing and Using Option Pricing Models	356
6.	Lognormal Distributions and Transition Probabilities	358
7.	Applying the Diffusion Process to the Financial Markets	361
8.	What Is the Level of Confidence We Wish to Apply?	365
9.	Practical Use of Weiner's z Risk Factor in Connection to Notional Principal	368
10.	Integrating the Tools Provided by Analytical Computational Finance	372

Chapter 17**Strategic Decisions in Technology for Greater Professional Clout****375**

1.	Introduction	375
2.	High Technology and Lifelong Learning	376
3.	Choosing What to Know Is an Act of Intelligence	378
4.	The Pillars of Advanced Solutions Are Research and Learning	381
5.	Strategic Issues in Prototyping Managerial Problems	383

6.	The Need for Polyvalent Database Support	385
7.	Capitalizing on Hard Data and Soft Data	388
8.	Queries, Transaction, and Technical Prerequisites	391
9.	Rethinking the Nature of Technological Support	394
10.	Conclusion	395
Index		397
