1	Introduction	1
2	Foundations for a theory of trust building	11
3	Methodology	31
4	Creating a trust-enhancing organizational context	43
5	Building interpersonal trust	81
6	Dealing with trouble	106
7	Conclusions	145
Λ	ppendix A: research design	158
Appendix B: trust-building actions		172
Λ	ppendix D. dust building account	176
R	185	
Ir	105	

## **Figures**

2 1	I as the area building process	16
2.1	Interactive trust-building process	22
2.2	Types of overall relational signals	34
3.1	Overview of research design	53
4.1	Distribution of level of trust building	33
5.1	Hypothesized structure of theoretically derived categories	99
	for trust-building actions	-
5.2	Results for hypothesized structure of theoretically derived	100
	categories for trust-building actions	100
5.3	Results for modified structure of theoretically derived	102
	categories for trust-building actions	112
6.1	Ex post evaluation of event and impact on relationship	112
6.2	Hypothesized core model for the study of impact of trouble	115
	on trust in relationship	115
6.3	Hypothesized complete model for the study of impact of	
	trouble on trust in relationship	116
6.4	Distribution of impact of trouble event on trust in relationship	118
6.5	Distribution of total action of lead player	119
6.6	Distribution of total reaction of other player	120
6.7	Distribution of evaluation of trouble event	121
6.8	Distribution of severity of trouble	122
6.9	Distribution of strength of interdependence	123
6.10	Modified core model: Krauthammer	127
6.11	Modified core model: Deerns	128
6.12		130
6.13	Modified complete model: Krauthammer	139
0.13	Distribution of first action of lead player	

## **Tables**

1.1	The importance of trust: literature overview	2
4.1	Krauthammer's values and related principles	55
4.2	Number of items mentioned during 'thermometer 2000'	
	meetings	56
4.3	Congruence of espoused values with theories-in-use:	
	Krauthammer	57
4.4	Deerns's values and related principles	59
4.5	Congruence of espoused values with theories-in-use: Deems	63
4.6	Categories of functional interdependencies and strength of	72
	interdependence	82
5.1	Trust-building actions	85
5.2	Occurrence of trust-building actions	91
5.3	Effects of gender age and tenure on trust-building actions	94
5.4	Social desirability check for trust-building actions	74
5.5	Reliability of theoretically derived categories for	97
	trust-building actions	71
5.6	Exploratory factor analyses of theoretically derived	97
	actogories plus one action	,,
5.7	Descriptive statistics and intercorrelations of theoretically	98
	derived categories for trust-building actions	70
5.8	Comparison of fit indices between CFA models with	101
	theoretically derived categories	110
6.1	Characteristics of different trouble strategies	124
6.2	Correlation matrix of 'trouble' variables	126
6.3	Comparison of goodness of fit indices between trouble models	120
6.4	Analysis of trouble event between George and Charles	131
	(Krauthammer)	
6.5	Analysis of trouble event between Mark and Stephen	132
	(Krauthammer)	134
6.6	Analysis of trouble event between William and Ray (Deerns)	
6.7	Analysis of differences in coding for public trouble events at	135
	Krauthammer with more coders	136
6.8	Description of vignettes	138
6.9	Survey analysis of trouble strategies	140
6.10	Comparison of analyses	

x	Tables

A2.1	Sample for interviews and survey	16
A2.2	Overview of observed meetings	16
A2.3	Overview of documents used	16
<b>B</b> .1	Correlations of trust-building actions: Krauthammer	17
<b>B.2</b>	Correlations of trust-building actions: Deerns	17
