

BRIEF CONTENTS

About the Authors	xv
Preface	xvii
Acknowledgments	xxi
1. Science, Society, and Social Research	1
2. The Process and Problems of Social Research	21
3. Conceptualization and Measurement	49
4. Sampling	81
5. Causation and Experimental Design	102
6. Survey Research	133
7. Qualitative Methods: Observing, Participating, Listening	161
8. Evaluation Research	192
9. Elementary Data Analysis	220
10. Reviewing, Proposing, and Reporting Research	246
Appendix A: Finding Information	267
Appendix B: HyperRESEARCH™: A Software Tool for Qualitative Data Analysis	278
Appendix C: Secondary Data Sources	299
Appendix D: How to Use a Statistical Package	302
References	317
Glossary/Index	329

DETAILED CONTENTS

About the Authors	xv
Preface	xvii
Acknowledgments	xxi
1. Science, Society, and Social Research	1
What Is the Problem?	2
<i>Overgeneralization</i>	5
<i>Selective or Inaccurate Observation</i>	5
<i>Illogical Reasoning</i>	6
<i>Resistance to Change</i>	7
Can Social Scientists See the Social World More Clearly?	7
<i>Social Research in Practice</i>	8
Description: How Often Do Americans “Neighbor?”	8
Exploration: How Do Athletic Teams Build Player Loyalty?	9
Explanation: Does Social Context Influence Adolescent Outcomes?	10
Evaluation: Does Universal Internet Access Change Community Life?	11
How Well Have We Done Our Research?	
Are Our Answers Correct?	11
<i>Measurement Validity</i>	12
<i>Generalizability</i>	13
<i>Causal Validity</i>	14
Conclusion	16
KEY TERMS	18
HIGHLIGHTS	18
EXERCISES	18
<i>Discussing Research</i>	18
<i>Finding Research</i>	19

<i>Critiquing Research</i>	19
<i>Doing Research</i>	20
2. The Process and Problems of Social Research	21
What Is the Question?	22
What Is the Theory?	23
What Is the Strategy?	25
<i>Deductive Research</i>	26
Domestic Violence and the Research Circle	28
<i>Inductive Research</i>	28
An Inductive Study of Response to a Disaster	30
<i>Descriptive Research: A Necessary Step</i>	30
What Is the Design?	31
<i>Cross-Sectional Designs</i>	31
<i>Longitudinal Designs</i>	32
Panel Designs	34
Repeated Cross-Sectional Designs	35
Cohort Designs	35
<i>Units of Analysis</i>	37
But Is It Ethical?	39
<i>Honesty and Openness</i>	39
<i>The Uses of Science</i>	40
<i>Research on People</i>	40
Conclusion	44
KEY TERMS	44
HIGHLIGHTS	45
EXERCISES	45
<i>Discussing Research</i>	45
<i>Finding Research</i>	46
<i>Critiquing Research</i>	47
<i>Doing Research</i>	47
3. Conceptualization and Measurement	49
What Do We Have in Mind?	50
<i>Variables and Constants</i>	51
How Will We Know When We've Found It?	52
<i>Using Available Data</i>	54
<i>Constructing Questions</i>	56
Single Questions	56
Indexes and Scales	58
<i>Making Observations</i>	59
<i>Content Analysis</i>	60
<i>Collecting Unobtrusive Measures</i>	61

<i>Combining Measurement Operations</i>	62
How Much Information Do We Really Have?	63
<i>Nominal Level of Measurement</i>	64
<i>Ordinal Level of Measurement</i>	65
<i>Interval Level of Measurement</i>	65
<i>Ratio Level of Measurement</i>	67
<i>Comparison of Levels of Measurement</i>	67
Did We Measure What We Wanted To Measure?	68
<i>Measurement Validity</i>	68
Face Validity	68
Content Validity	69
Criterion Validity	69
Construct Validity	70
<i>Reliability</i>	71
Test-Retest Reliability	72
Interitem Reliability (Internal Consistency)	72
Alternate-Forms Reliability	72
Interobserver Reliability	73
<i>Can We Achieve Both Reliability and Validity?</i>	73
Conclusion	76
KEY TERMS	76
HIGHLIGHTS	76
EXERCISES	77
<i>Discussing Research</i>	77
<i>Finding Research</i>	78
<i>Critiquing Research</i>	78
<i>Doing Research</i>	80
4. Sampling	81
How Do We Prepare to Sample?	82
<i>Define Sample Components and the Population</i>	82
<i>Evaluate Generalizability</i>	84
<i>Assess the Diversity of the Population</i>	85
<i>Consider a Census</i>	85
What Sampling Methods Should We Use?	86
<i>Probability Sampling Methods</i>	88
Simple Random Sampling	90
Systematic Random Sampling	90
Cluster Sampling	92
Stratified Random Sampling	93
<i>Nonprobability Sampling Methods</i>	95
Availability Sampling	95
Quota Sampling	95

Purposive Sampling	97
Snowball Sampling	97
Conclusion	98
KEY TERMS	98
HIGHLIGHTS	99
EXERCISES	100
<i>Discussing Research</i>	100
<i>Finding Research</i>	100
<i>Critiquing Research</i>	100
<i>Doing Research</i>	101
5. Causation and Experimental Design	102
Causal Explanation	103
What Causes What?	104
<i>Association</i>	104
<i>Time Order</i>	104
<i>Nonspuriousness</i>	105
<i>Mechanism</i>	105
<i>Context</i>	106
Why Experiment?	107
How Can Experiments Be Modified?	110
<i>Nonequivalent Control Group Designs</i>	112
<i>Before-and-After Designs</i>	112
<i>Ex Post Facto Control Group Designs</i>	115
How Can Units of Analysis Affect	
Causal Reasoning?	115
<i>The Ecological Fallacy</i>	115
<i>Reductionism</i>	116
What Are the Threats to Validity in Experiments?	117
<i>Threats to Internal Causal Validity</i>	118
Noncomparable Groups	119
Endogenous Change	120
History	121
Contamination	121
Treatment Misidentification	122
<i>Generalizability</i>	123
Sample Generalizability	123
Cross-Population Generalizability	124
Interaction of Testing and Treatment	125
How Do Experimenters Protect Their Subjects?	126
<i>Deception</i>	126
<i>Selective Distribution of Benefits</i>	127
Conclusion	128

KEY TERMS	128
HIGHLIGHTS	129
EXERCISES	131
<i>Discussing Research</i>	131
<i>Finding Research</i>	131
<i>Critiquing Research</i>	132
<i>Doing Research</i>	132
6. Survey Research	133
Why Is Survey Research So Popular?	134
How Should We Write Survey Questions?	135
<i>Be Clear; Avoid Confusing Phrasing</i>	135
<i>Minimize Bias</i>	136
<i>Allow for Disagreement</i>	136
<i>Don't Ask Questions They Can't Answer</i>	137
<i>Allow for Uncertainty</i>	138
<i>Make Response Categories Exhaustive and Mutually Exclusive</i>	139
How Should Questionnaires Be Designed?	139
<i>Build on Existing Instruments</i>	140
<i>Refine and Test Questions</i>	140
<i>Maintain Consistent Focus</i>	141
<i>Order the Questions</i>	141
<i>Make the Questionnaire Attractive</i>	142
What Are the Alternatives for Administering Surveys?	142
<i>Mailed, Self-Administered Surveys</i>	144
<i>Group-Administered Surveys</i>	145
<i>Telephone Surveys</i>	147
Reaching Sampling Units	147
Maximizing Response to Phone Surveys	147
<i>In-Person Interviews</i>	149
Maximizing Response to Interviews	149
<i>Electronic Surveys</i>	150
A Comparison of Survey Designs	150
Ethical Issues in Survey Research	151
Conclusion	155
KEY TERMS	156
HIGHLIGHTS	156
EXERCISES	157
<i>Discussing Research</i>	157
<i>Finding Research</i>	158
<i>Critiquing Research</i>	158
<i>Doing Research</i>	160

7. Qualitative Methods: Observing, Participating, Listening	161
What Makes Methods “Qualitative”?	162
<i>Case Study: Beyond Caring</i>	163
How Does Participant Observation Become a Research Method?	165
<i>Choosing a Role</i>	166
Complete Observation	166
Mixed Participation/Observation	167
Complete Participation	168
<i>Entering the Field</i>	169
<i>Developing and Maintaining Relationships</i>	170
<i>Sampling People and Events</i>	171
<i>Taking Notes</i>	173
<i>Managing the Personal Dimensions</i>	174
How Do You Conduct Intensive Interviews?	176
<i>Establishing and Maintaining a Partnership</i>	178
<i>Asking Questions and Recording Answers</i>	178
How Do You “Focus” a Group?	180
Analyzing Qualitative Data	181
<i>The Phases of Analysis</i>	182
<i>Use of Computers</i>	183
<i>Evaluation of Conclusions</i>	183
Ethical Issues in Qualitative Research	185
Conclusion	187
KEY TERMS	188
HIGHLIGHTS	188
EXERCISES	189
<i>Discussing Research</i>	189
<i>Finding Research</i>	189
<i>Critiquing Research</i>	190
<i>Doing Research</i>	190
8. Evaluation Research	192
What Is the History of Evaluation Research?	193
What Is Evaluation Research?	194
What Are the Alternatives in Evaluation Designs?	197
<i>Black Box or Program Theory</i>	197
<i>Researcher or Stakeholder Orientation</i>	199
<i>Quantitative or Qualitative Methods</i>	201
<i>Simple or Complex Outcomes</i>	202
What Can an Evaluation Study Focus On?	205
<i>Needs Assessment</i>	205
<i>Evaluability Assessment</i>	206

<i>Process Evaluation</i>	207
<i>Impact Analysis</i>	210
<i>Efficiency Analysis</i>	213
Ethical Issues in Evaluation Research	215
Conclusion	217
KEY TERMS	217
HIGHLIGHTS	218
EXERCISES	218
<i>Discussing Research</i>	218
<i>Finding Research</i>	218
<i>Critiquing Research</i>	219
<i>Doing Research</i>	219
9. Elementary Data Analysis	220
Why Do Statistics?	221
<i>Case Study: The Likelihood of Voting</i>	221
How to Prepare Data for Analysis	222
What Are the Options for Displaying Univariate Distributions?	222
<i>Graphs</i>	224
<i>Frequency Distributions</i>	228
What Are the Options for Summarizing Distributions?	230
<i>Measures of Central Tendency</i>	230
Mode	230
Median	231
Mean	231
Median or Mean?	233
<i>Measures of Variation</i>	233
Range	233
Interquartile Range	234
Variance	235
Standard Deviation	236
How Can We Tell Whether Two Variables Are Related?	237
<i>Controlling for a Third Variable</i>	239
Analyzing Data Ethically: How Not to Lie with Statistics	240
Conclusion	241
KEY TERMS	242
HIGHLIGHTS	242
EXERCISES	243
<i>Discussing Research</i>	243
<i>Finding Research</i>	243
<i>Critiquing Research</i>	244
<i>Doing Research</i>	244

10. Reviewing, Proposing, and Reporting Research	246
Comparing Research Designs	246
Reviewing Research	249
<i>Case Study: "Night as Frontier"</i>	250
The Research Design	250
Analysis of the Design	250
An Overall Assessment	251
Proposing New Research	252
<i>Case Study: Treating Substance Abuse</i>	253
Reporting Research	258
<i>Writing and Organizing</i>	259
Conclusion	263
HIGHLIGHTS	264
EXERCISES	264
<i>Discussing Research</i>	264
<i>Finding Research</i>	264
<i>Critiquing Research</i>	265
<i>Doing Research</i>	265
Appendix A: Finding Information	267
<i>Elisabeth Schneider</i>	
<i>Russell K. Schutt</i>	
Appendix B: HyperRESEARCH™:	
A Software Tool for Qualitative Data Analysis	278
<i>Ann Dupuis</i>	
Appendix C: Secondary Data Sources	299
Appendix D: How to Use a Statistical Package	302
<i>Lisa M. Gilman</i>	
<i>Joan Saxton Weber</i>
