1 Neo-industrial organising – issues and challenges **1**

Features of neo-industrial organising 1
Three observations 5
The transformation dilemma and the renewal paradox 6
Action and knowledge formation in permanent and temporary organisations 9
The aim of the book 11

2 Towards a project-intensive economy **14**

Traditional industrial organisation challenged 14
Computerisation and IT 18
Increased knowledge intensity 19
Knowledge-intensive firms 25
Macro-level indicators 26
Increased project prevalence 27
Cultural aspects 29
Why are project organisations becoming more common? 31

3 Shortcomings of present theorising about permanent and temporary organisations **36**

Permanent organisation theories as rooted in industrialism 37
The sphere of project theories and project thinking 49
Projects as important phenomena 50
Towards a theory of action and learning 59

4 The project landscape – our empirical base **61**

General aspects and choice of cases 63
Characterisation of cases 64
Group 1: projects concerning total organisation renewal in a flow-process context 66
Group 2: projects concerning part-organisation renewal in a flow-process context 77
Group 3: projects concerning total organisation renewal in a projectised context 80
Group 4: projects concerning part-organisation renewal in a projectised context 88
Group 5: projects concerning societal–interorganisational renewal in a projectised context 93
Some concluding remarks 96

5 Action formation in temporary and permanent organisations **97**

Social action and action contexts 98
Action embeddedness 100
Action in permanent and temporary organisations 109
Action embeddedness and contexts – a summary of notions 119

6 Knowledge formation in permanent and temporary organisations **124**

Approaches to knowledge formation 125
Forms of knowledge and learning in organisations 126
Knowledge embeddedness 128
Knowledge in temporary and permanent organisations 134
Renewal of (or acquiring) knowledge in permanent and temporary organisations – learning processes vs. combinatorics 136
Learning processes in permanent organisations – promoting incremental (or constrained) change 137
The transformation dilemma – obstacles for renewal in neo-industrial organising 142
Combinatorics of temporary organisations – to be caught in the renewal paradox or to promote radical change? 146
Knowledge embeddedness and renewal – a summary of conclusions 153

7 Marrying action and knowledge formation in 25 renewal projects **155**

Renewal problems brought to the fore 155
Renewal – a close relation between action and knowledge formation 157
Classification of the cases 159
Renewal approaches 161
Summarising renewal approaches 179
The anatomy of renewal 181
Revisiting the transformation dilemma 183
Summary 184

8 Neo-industrial managing **186**

On the concurrent need for projects and permanent organisations 187
The essence of organising 190
The renewal paradox in the neo-industrial organisation 194
Refined managerial roles in the neo-industrial organisation 196
The traditional CEO and the project manager in the shadow of NIM 200
Neo-industrial management and the renewal paradox 201
The renewal paradox and combinatorics 204
The renewal paradox and knowledge/action transfer 205
Organising 208

9 Neo-industrial organising – implications and prospects **209**

Will terms of employment be affected in a projectised economy? 210
Will work participation and work identity be impaired in a projectised economy? 216
Will the labour market become segmented and precarious in a projectised economy? 218
Labour force movements 221
Efforts to handle the transformation dilemma 222
Global renommée and local presence 223
Neo-industrial organising and the traditional institutions 226
A final word of caution 227

Bibliography 229
Index 239

Illustrations

Figures

1.1 General frame of reference for the book 8
2.1 The increasing knowledge intensity in industry 22
7.1 The anatomy of renewal 182
8.1 Combining type of action and knowledge process phases 192
8.2 Main relations in the neo-industrial organisation 200
8.3 A dynamic model for knowledge transfer and exchange via renewal projects 207
9.1 Segmentation of the labour market 221

Tables

2.1 The percentage of the workforce employed in the manufacturing and the production service sectors in eight industrialised countries 26
4.1 Classification of projects concerning organisational context, scope, pace and prime target of renewal 65
4.2 Project types common in different production systems 66
4.3 Characteristics of the renewal projects presented 67
5.1 Action embeddedness and corresponding metaphors 103
5.2 Differences between recurring and unique projects 113
5.3 Differences between recurrent and unique projects 120
5.4 Contexts and embeddedness combined 121
6.1 Methods for the development of knowledge in different phases of learning 142
6.2 Interdependence between different forms of knowledge embeddedness: hampering and supporting conditions for ¬eo 7al 145
6.3 Characteristics of the two ideal ways of combining knowledge 154

7.1 Distribution of total organisation renewal initiatives on different spheres of embedded knowledge and action within the flow-process organisations 165
7.2 Distribution of part-organisation renewal initiatives on different spheres of embedded knowledge and action within the flow-process organisations 168
7.3 Distribution of total organisation renewal initiatives on different spheres of embedded knowledge and action within the projectised organisations 173
7.4 Distribution of part-organisation renewal initiatives on different spheres of embedded knowledge and action within the projectised organisations 175
7.5 Distribution of societal organisation renewal initiatives on different spheres of embedded knowledge and action within the interorganisational context 179
7.6 Distribution of renewal initiatives on different spheres of embedded knowledge and action within different organisational contexts – a summary 180
7.7 Spheres of embedded knowledge and action in terms of power for renewal 184
8.1 Managerial tasks in the permanent organisation 197
8.2 Management tasks in the temporary organisation 198
8.3 The neo-industrial management (NIM) role 199
9.1 Relationship between the organisational form of industrial activity and the contract between the company and the individual 211
9.2 Employee identification with the organisation and participation in work design in different types of organisations 219
