<b>Series Editor's Introduction</b>	<b>v</b>
<b>1. Introduction</b>	<b>1</b>
Characteristics of a Relationship	2
Correlation and Causation	3
Correlation and Correlational Methods	6
Choice of Correlation Indexes	7
<b>2. The Pearson Product-Moment Correlation</b>	<b>9</b>
Interpretation of Pearson's $r$	12
Assumptions of Pearson's $r$ in Inferential Statistics	13
Sampling Distributions of Pearson's $r$	14
Properties of the Sampling Distribution of Pearson's $r$	15
Null Hypothesis Tests of $\rho = 0$	16
Null Hypothesis Tests of $\rho = \rho_0$	19
Confidence Intervals of $\rho$	20
Null Hypothesis Test of $\rho_1 = \rho_2$	20
Null Hypothesis Test for the Difference Among More Than Two Independent $\rho$ s	22
Null Hypothesis Test for the Difference Between Two Dependent Correlations	23
<b>3. Special Cases of Pearson's <math>r</math></b>	<b>25</b>
Point-Biserial Correlation, $r_{pb}$	26
Phi Coefficient, $\phi$	29
Spearman Rank-Order Correlation, $r_{rank}$	31
True Versus Artificially Converted Scores	33
Biserial Coefficient, $r_{bis}$	35
Tetrachoric Coefficient, $r_{tet}$	37
Eta Coefficient, $\eta$	38
Other Special Cases of Pearson's $r$	40

<b>4. Applications of Pearson's <math>r</math></b>	<b>41</b>
Application I: Effect Size	42
Application II: Power Analysis	43
Application III: Meta-Analysis	46
Application IV: Utility Analysis	49
Application V: Reliability Estimates	50
Application VI: Validation	52
<b>5. Factors Affecting the Size and Interpretation of Pearson's <math>r</math></b>	<b>55</b>
Shapes of Distributions	55
Sample Size	56
Outliers	56
Restriction of Range	57
Nonlinearity	61
Aggregate Samples	63
Ecological Inference	67
Measurement Error	68
Third Variables	69
<b>6. Other Useful Nonparametric Correlations</b>	<b>78</b>
$C$ and Cramér's $V$ Coefficients	79
Kendall's $\tau$ Coefficient	82
Kendall's $\tau_b$ and Stuart's $\tau_c$ Coefficients	84
Goodman and Kruskal's $\gamma$ Coefficient	86
Kendall's Partial Rank-Order Correlation, $\tau_{XY.Z}$	87
