

# CONTENTS

<b>Foreword</b>	xi
<b>Acknowledgments</b>	xiii
<b>1 An Outline of Value at Risk</b>	1
Introduction	2
What is Value at Risk?	5
Volatility and how to exploit it profitably	6
Correlation – its role in risk reduction	16
Conclusion	25
<b>2 Value at Risk as a Tool in Supervisory Regulation</b>	27
Regulation: what it is and why it's necessary	28
Capital adequacy and the Basle Accord – what it is trying to achieve	32
Should regulators recognize diversification?	38
Conclusion	41
<b>3 Portfolio Risk Measurement</b>	43
A profile of VaR methods	44
How matrices are used to calculate VaR	47
Comparison of the variance covariance approach with other methods, or which VaR method is best?	50
Variance covariance with a three-asset portfolio	51
Constructing the weighting matrix	56
Mapping	58
Appendix 3.1	63
Appendix 3.2	66

<b>4 Fixed Income Products</b>	<b>69</b>
The range of fixed income products	70
Interest rate conventions	75
VaR on forward rate agreements	82
How swaps work	83
Conclusion	89
<b>5 Measuring the Risk of Complex Derivative Products</b>	<b>91</b>
Interest rate sensitivity	92
Calculating duration and convexity	95
The unique risk characteristics of convexity	105
The role of delta gamma in VaR measurement	107
Conclusion	110
Appendix 5.1	112
<b>6 The Greeks</b>	<b>115</b>
The risk sensitivities of options	116
Reducing the risk of option portfolios	125
Exploiting volatility smiles profitably	130
Conclusion	133
<b>7 Option Strategies</b>	<b>135</b>
Which option strategies work?	136
Volatility trading: straddles, strangles, butterflies, and ratio spreads	142
Time spread strategies	148
Conclusion	152
<b>8 Monte Carlo Simulation</b>	<b>155</b>
Monte Carlo simulation and its applications	156
Generating the share prices	158
Applying Monte Carlo simulation to VaR	164
Conclusion	167
<b>9 Applying VaR Principles to Credit Control</b>	<b>169</b>
Measuring credit risk more accurately	170
Reducing credit risk	178
Using credit derivatives to reduce credit risk	182
Conclusion	188

<b>10 Estimating Volatility for Profitable Trading and Risk Reduction</b>	189
Volatility and its measures	190
Exponentially weighted moving average (EWMA) vs time series	199
GARCH: changing variance and correlation between current and past events	204
Conclusion	207
 <b>11 Real-Life Application of Models</b>	 209
Should we rely on VaR?	210
Over-the-counter options	212
Criticisms of VaR methods	215
Conclusion	219
Appendix 11.1	220
Appendix 11.2	224
