1 Introduction	1
Part I Points of departure	
Introduction to part I	12
2 The general principles of reform	13
Ethical postulates	15
The desired attributes of institutions and coordination mechanisms	24
The desired proportions of allocation	37
Concluding remarks	43
3 The characteristics of the health sector	47
A general overview	47
Provision and financing: classification	69
Payment system incentives	79
4 Some international experiences	100
The economic mechanisms in the industrialized democracies	100
A special case: the US health sector	122
5 The health sector in Eastern Europe: the initial state	135
The economic mechanism of “classical socialism”	135
Redefining the right to provision	140
	vii

viii Contents

The separation of financing from provision	143
Financing	147
Delivery: public institutions	156
Delivery: legal private activity	160
Doctors' earnings and gratuities	164
Economic indices for the health sector and population health status	175
 Part II Guidelines for reform	
Introduction to part II	188
 6 The demand side: financing, benefits, and organization of insurance	191
The guiding ideas behind the recommendations	191
The financing of basic care	195
Redistribution through financing	200
Co-payments	213
The basic benefit package	216
Organization of insurance: ownership, decentralization, and managed competition	227
The scope and financing of supplementary care	246
The role of employers	255
 7 The supply side: delivery-system ownership, organization, and contracting	262
Encouraging private initiative	262
Strengthening the quasi-market elements in the public sector	271
 8 The interaction of supply and demand: pricing, payment, hard budget constraints, and overall health-sector development	275
Reasonable prices	275
The hard budget constraint and other incentives	284
Doctors' pay: the medical profession and the reform	301
Neutrality between sectors	309
Who decides about health-sector development?	314

9 Concluding remarks	323
The role of factors beyond the economic mechanism	323
The supporters and opponents of reform	327
Evolutionary and “constructivist” development	328
<i>References</i>	343
<i>Index</i>	360

Figures

2.1 Value choices	page 23
2.2 Relation between income <i>per capita</i> and public pension spending	39
3.1 Types of integration	77
3.2 Trade-offs in setting the consumer co-insurance rate	82
3.3 Trade-offs in setting the provider cost-sharing rate	94
5.1 Deficit of social health insurance funds, Croatia, Hungary, and Slovenia, 1994–1998	150
5.2 Sources of health-care financing, Eastern Europe, 1997	156
5.3 Hungary, actual and predicted health-spending data during the transition, 1990–1997	181
5.4 Resources in health-care provision, Eastern Europe, 1995–1997	183
5.5 Standardized male mortality rates, Eastern Europe	186
6.1 Average health-care costs per insured, by age groups, Czech Republic, 1997	202
6.2 Alternative ways of decentralizing the insurance system	232
6.3 Financing flows under different decentralized insurance schemes	235
8.1 Hungary, public share of total health spending during the transition, 1990–1997	321
9.1 Preference for system of health-care financing, by age, Bulgaria, 1995	336

Tables

2.1	Institutional choices: support for state, market, and mixed solutions in Hungary	<i>page 27</i>
3.1	Prices and volume in health expenditure growth, OECD countries, 1980–1990	66
