1 Introduction	1
Trends	1
Paradigm shift	3
General structure of the book	3
Structure by chapter	5
 Part I Sustainability: A General Introduction	
2 Environmental Consciousness and Sustainable Development	11
Introduction	11
Environmental issues	12
Environmental consciousness	16
Sustainable development	21
Environmental policy	27
Conclusion	34
 3 Sustainability: The Challenges for Companies	 37
Introduction	37
Corporate governance and sustainable development	38
Sustainable business	41
Accountability and reporting	45
Conclusion	48
 4 Sustainability: A Special Role for Banks	 52
Introduction	52
Banks and their function in an economy	53
The drive behind sustainability at banks	61
Intermediation and sustainability	67
Sustainable banking	71
Conclusion	74

Part II Banking and Sustainability

5	Sustainability, Markets and Banking Products	83
	Introduction	83
	Sustainable investment funds	84
	Fiscal green funds	92
	New, more sustainable financial products: Committed resources	97
	New, more sustainable financial products: Investments	102
	Sustainability and advice from banks	109
	The financial sector and the Kyoto Protocol	111
	Conclusion	116
6	Sustainability and Financing Risks	118
	Introduction	118
	Environmental risks for clients	120
	Indirect environmental risks for banks	129
	Direct environmental risks for banks	135
	Risks to banks' reputations	139
	Instruments for analysing environmental risk	143
	Conclusion	146
7	Internal Environmental Care	148
	Introduction	148
	Energy	149
	Waste	153
	Sustainable building	154
	Supply and distribution chain management	155
	Conclusion	156
8	Organization and Communication about Sustainability	160
	Introduction	160
	The organization of sustainability within banks	161
	The role of internal communication	169
	The role of external communication	172
	External accountability and the risks of external communication	178
	Conclusion	181

Part III In Reflection

9	Sustainable Banking in Perspective: The Cases of 34 International Banks	185
	Introduction	185
	Codes of conduct, environmental reporting and environmental management systems (EMSs)	188
	Environmental care in practice: Reported policy, objectives and data	190

Environmental care in practice: Products and risk management	192
Socioeconomic activities and sponsoring	197
Integral score of sustainable banking	199
Conclusion	200
10 Sustainable Development: A Paradigm Shift	204
Introduction	204
Are incremental steps sufficient?	206
The existing economic system	207
Are there shortcomings associated with the current economic paradigm?	211
Sustainable development as a paradigm shift	213
Sustainable development: Another way of seeing	216
11 Towards sustainable banking	220
Introduction	220
The trends: A summary	221
A link to the future	223
The role of banks in a sustainable future	226
Conclusion	228

Appendices

I Environmental Performances of Developed Countries	231
II Sectoral Changes in the Pursuit of Sustainability: A Dutch Scenario	233
III IFC Project Classification for Environmental Assessments	235
IV Example of an Environmental Risk Checklist	237
V The ICC Business Charter for Sustainable Development: Principles for Environmental Management	239
VI UNEP Statement by Financial Institutions on the Environment and Sustainable Development	242
VII List of Signatories to the UNEP Statement by Financial Institutions on the Environment and Sustainable Development	244
VIII Overview of Characteristics of Selected Banks	251
IX An Integral Score for Sustainable Banking	255
X Ecological Economics	258
XI Zero Growth and Other Solutions?	259
XII The Prisoner's Dilemma	261

<i>Glossary</i>	263
<i>Notes</i>	267
<i>References</i>	295
<i>Index</i>	310

List of Boxes, Figures and Tables

BOXES

1.1	Delineation of countries in this book	4
2.1	The coherence of economic and ecological systems	13
2.2	Some major international environmental issues examined	17
2.3	Global facts of human development	23
2.4	The relationship between prosperity, population size, environmental impact and technology: Past and present	25
2.5	Results of Dutch environmental policy since 1985	30
3.1	Van Melle's indicator approach	45
3.2	The GRI guidelines	49
3.3	Foreign direct investment (FDI) and the environment	50
4.1	Global, regional and national development banks	66
4.2	Micro-credit or micro-financing	75
4.3	Solar home systems	76
4.4	Debt-for-nature swaps	77
5.1	The ASN equity fund	87
5.2	The criteria for the Dutch fiscal green regulation and how it works	94
5.3	Multilateral funds for sustainability in developing countries	103
5.4	PV securitization	108
5.5	Guarantee arrangement for SMEs	111
6.1	General risks for banks	119
6.2	Changing governmental environmental requirements: A case study	131
6.3	Environmental risks and market changes: A case study	132
6.4	Environmental risks and soil contamination: A case study	135
6.5	Direct environmental risk: <i>The US versus Fleet Factors</i>	137
6.6	Environmental assessment at the World Bank Group	141
6.7	The CSFI method for classifying environmental risk	144
7.1	Social and environmental indicators for the distribution policy of The Co-operative Bank, UK	157
8.1	ISO 14001 and EMAS in practice	165
8.2	The ISO 14000 series	167
8.3	Quotes from banks' statements of intent and environmental policy statements	173
8.4	Ethical accounting and the Spar Nord Bank	177
9.1	Sample survey of mainstream banks	186
10.1	An illustration of a second-order process of change	215

10.2 Another view	216
10.3 A new era?	217
10.4 Other cultures	218
IX.1 Sliding scales	256

FIGURES

2.1 The relationship between environment, people and the economy	13
2.2 Total number of people living on less than US\$1 a day, per region, 1998	24
2.3 Change in the number of people living on less than US\$1 a day, per region, 1987–1998	24
2.4 The relationship between prosperity, population growth and environmental impact	25
2.5 Results, prognoses and aims of Dutch environmental policy, 1985–2005	30
4.1 The role of financial markets in an economic system	55
4.2 Internal and external bank stakeholders	64

5.1 Financial performance of US sustainable companies, the Domini 400 Social Index, 1990–2001	88
5.2 Risk selection diagram: IEDI	101
5.3 Opportunities and risks of climate policy for banks	112
7.1 Internal environmental care	150
7.2 Energy savings at NatWest Bank, 1990–1997	152
8.1 Environmental management as a continuous process	163
8.2 EMS certification in developed countries, 1999–2000	166
8.3 The ethical accounting model	177
9.1 Geographical distribution of the 34 selected banks	186
9.2 Public declarations and reports by banks on sustainability, 1998–2000	189
9.3 Internal environmental aspects of selected banks, 1998–2000	191
9.4 Environmental policy of selected banks, 1998–2000	192
9.5 Environmental aspects of granting credit, 1998–2000	193
9.6 Financial products geared to the environment, 1998–2000	195
9.7 Socially responsible banking, 1998–2000	199
9.8 Banks distributed by integral sustainability score, 1998–2000	200
9.9 Differences between countries aiming for sustainable banking, 1998–2000	201
10.1 The 20th century	208
10.2 Yin and yang versus Western thought	218
I.1 Energy consumption and related pollution of developed countries	231
I.2 Protected forest, water and waste in developed countries	232

TABLES

1.1	Geographical scope of this book	4
2.1	Goods and services from ecosystems	14
2.2	The worldwide position and development of ecosystems	15
2.3	Performance of individual EU Member States on selected environmental issues	31
2.4	International climate instruments developed at Kyoto	33
3.1	Integrative model of attitudinal stages towards sustainable business	46
4.1	Financial sector in developed countries	57
4.2	Top ten banks in the world according to total assets and equity capital, 2000	59
4.3	The activities of various financial institutions	62
4.4	Micro-credit activities among financial institutions and in world regions, 1995	75
4.5	Sustainable banking summary	78
5.1	Principles for the Dutch fiscal green regulation	93
5.2	Overview of fiscal green funds in The Netherlands, year-end 2000	95
5.3	Solar energy data	108
7.1	Internal environmental impact of banks with headquarters in Germany or Switzerland	158
8.1	ISO 14001 and EMAS certification among financial institutions, 2000	168
9.1	Financial products and services offered by individual banks, 1998–2000	198
9.2	Integral sustainability scores per bank, 1998–2000	202
9.3	Relationship between bank profiles and phases, 1998–2000	202
10.1	An application of the ‘prisoner’s dilemma’	212
II.1	Scenarios for a possible sector structure in 2030	234
VIII.1	Scale of selected banks: Assets, employees, offices and countries	251
VIII.2	Profiles of selected banks: Performance, internationalization and activities	252
XII.1	The original prisoner’s dilemma	261
