

# **Contents**

<b>1 Introduction.....</b>	<b>1</b>
<b>2 Background .....</b>	<b>3</b>
2.1 Health and Violence: An Issue .....	3
2.2 Public Health Approach to Violence .....	5
2.3 Violence: A Problem of Cities and of Young People.....	7
2.4 Development of the MLIVEA Framework .....	8
<b>3 Macro Forces Influencing Urban Violence .....</b>	<b>15</b>
3.1 Urbanisation of the World and Its Consequences .....	15
3.1.1 Population Dynamics and the Urban Future of the World.....	15
3.1.2 Process of Urbanisation.....	17
3.1.3 Urban Life and Its Health Consequences .....	19
3.2 Socio-economic Conditions.....	21
3.2.1 Poverty and Inequality Leading to Violence.....	21
3.2.2 Vulnerable Groups within Cities: Immigrants and Minorities....	24
3.3 Social-cultural Factors .....	25
3.3.1 Gender Disparities and Power Relations.....	26
3.3.2 Media Influences .....	27
3.4 Political and Legal Conditions .....	30
3.4.1 Legalisation of Violence .....	30
3.4.2 Young People and their Legal Status .....	31
<b>4 Local Settings Affecting Adolescent Violence .....</b>	<b>33</b>
4.1 Family and the Role of the Parents.....	33
4.1.1 Family Life: Parenting and Attachment .....	34
4.1.2 Violence in the Family .....	35
4.2 Formal Education and Peer Experiences.....	38
4.2.1 School and Violence.....	39
4.2.2 Peer Experiences .....	42
4.3 Neighbourhood and Community Impacts .....	43
4.3.1 Social Organisation .....	43
4.3.2 Physical Design .....	45
<b>5 Vulnerability of Adolescents on the Individual Level.....</b>	<b>47</b>
5.1 The Phase of Adolescence .....	47
5.2 Psychological and Social Aspects of Personality .....	49
5.2.1 Adolescence as Important Period of Socialisation .....	49

5.2.2 Risk-taking Behaviour.....	50
5.2.3 Exemplifying Risk-taking Behaviour: Use of Alcohol and Other Drugs .....	51
5.2.4 Approaches about Social-control and Self-control .....	53
5.2.5 Violent Experiences and Witnessing.....	54
5.2.6 Temperament .....	56
5.3 The Biological Perspective .....	56
5.3.1 Genetic Basis for Violence.....	57
5.3.2 Neurological Conditions.....	57
5.3.3 Physiology: The Low Resting Heart Rate.....	58
5.4 Bio-psycho-social Approaches .....	58
<b>6 Violent Acts.....</b>	<b>61</b>
6.1 Typology of Adolescent Violence .....	61
6.2 Interpersonal Violence.....	63
6.3 Group Violence.....	64
6.4 Self-directed Violence .....	66
<b>7 Surveillance of Violence Related Health Effects.....</b>	<b>67</b>
7.1 Survey Methods and Availability of Data .....	67
7.2 Adolescents' Health and Individual Health Effects of Violence.....	71
7.3 Mortality and Morbidity Due to Violence .....	73
<b>8 Actions for Breaking the Cycle.....</b>	<b>79</b>
8.1 Macro Level Initiatives .....	79
8.2 Different Settings: Action Taken at the Local Level.....	81
8.3 Measures at the Individual Level.....	82
<b>9 Case Study: Applying the MLIVEA Model for Johannesburg.....</b>	<b>83</b>
9.1 Macro Forces in the South African Society.....	83
9.2 Local Settings in Johannesburg .....	84
9.3 Individual Level in a City of Transformation.....	86
9.4 Violent Acts Related to Adolescents in Johannesburg.....	86
9.5 Health Effects on Young People.....	87
9.6 Actions: Prevention and Intervention .....	88
<b>10 Conclusions .....</b>	<b>91</b>
<b>References.....</b>	<b>97</b>
