

# Table of contents

Executive Summary	3
Index of Figures	8
Index of Tables	8
Abbreviations and Glossary	9
Acknowledgement	12
<b>1. Introduction</b>	<b>13</b>
1.1 Defining the problem/scientific demands	16
1.2 Methodology and research questions	17
<b>2. Definitions</b>	<b>19</b>
<b>3. Small hydropower and Sustainable Development</b>	<b>21</b>
3.1 Impacts of Small Scale hydropower constructions	22
3.1.1 Negative ecologic, social and economic impacts	22
3.1.2 Positive ecologic, social and economic impacts	23
3.1.3 Greenhouse gases	24
3.2 Experiences of hydropower projects in developing countries and their contribution towards Sustainable Development	25
3.3 The framework for sustainable hydropower in developing countries	26
3.4 Positive correlation of sustainable hydro and financial benefits	28
<b>4. Reference sustainability hydropower guidelines</b>	<b>31</b>
4.1 Planning methodologies	31
4.2 Guidelines for sustainable hydropower	36
4.2.1 Ecologic sustainability	38

4.2.2 Social sustainability	38
4.2.3 Economic sustainability	39
4.3 “Green” hydropower certification	40
<b>5. Sustainable hydro and the CDM</b>	<b>44</b>
5.1 Benefits of CDM registration and the sustainable use of CER	44
5.2 Existing methodologies for assuring sustainable hydro in the CDM and sustainability gaps	47
5.2.1 The existing CDM framework concerning assuring SD	47
5.2.2 Structural dysfunction	49
5.2.3 Communication and stakeholder consultation	50
5.2.4 Decision making	52
5.3 Voluntary methodologies for assuring the Sustainable Development impact	53
5.4 Sustainable CER buyers	60
<b>6. Towards a methodology for assessing the impact on Sustainable Development of CDM hydro projects</b>	<b>62</b>
6.1 Requirements for an assessment methodology	63
6.2 Economic considerations of sustainable CDM hydro	66
6.3 Selection of sustainability criteria for CDM hydro projects and their relevance	68
6.3.1 Ecologic criteria	69
6.3.2 Social criteria	71
6.3.3 Economic criteria	74
6.4 An operative criteria catalogue; indicators, quantification and costs	76
6.4.1 Sustainable planning	77
6.4.2 Baseline/Reference assessment	78

6.4.3 Sustainability indicators, quantification, measures and costs	80
6.4.3.1 Three dimensional connectivity	81
6.4.3.2 Sustaining morphological river conditions	84
6.4.3.3 Reduced impact on ecosystem	85
6.2.3.4 Impact on local community	87
6.2.3.5 Public health	89
6.2.3.6 Impact on local economy	89
6.4.4 Monitoring	90
 <b>7. Field study in India, June 2005</b>	 <b>92</b>
7.1 Himachal Pradesh	95
7.1.1 Fozal hydropower scheme	96
7.1.1.1 Sustainability Assessment	97
7.1.1.2 Does Fozal contribute to Sustainable Development?	99
7.1.2 Maujhi hydropower facility	100
7.1.2.1 Sustainability Assessment	100
7.2.2.2 Does Maujhi contribute to Sustainable Development?	102
7.2 Karnataka	104
7.2.1 Chunchi Doddi hydropower facility	104
7.2.1.1 Sustainability assessment	104
7.2.1.2 Does Chunchi Doddi contribute to Sustainable Development?	106
Excuse, experiences with EIA in India	107
7.3 Desktop PDD study	108
7.3.1 Dehar 5 MW, Himachal Pradesh	108
7.3.2 Mahatma Gandhi Dam 22MW, Karnataka	109
 <b>8. Conclusion</b>	 <b>111</b>
