

CHAPTER 1 Introduction: Models and Modeling 1

PART I DETERMINISTIC MODELS 20

CHAPTER 2 Linear Programming: Formal and Spreadsheet Models 23

CHAPTER 3 Linear Programming: Geometric Representations and Graphical Solutions 95

CHAPTER 4 Analysis of LP Models: The Graphical Approach 126

CHAPTER 5 Linear Programs: Computer Analysis, Interpreting Sensitivity Output, and the Dual Problem 145

CHAPTER 6 Linear Programming: The Simplex Method 217

CHAPTER 7 Linear Programming: Special Applications 277

CHAPTER 8 Integer and Quadratic Programming 334

CHAPTER 9 Network Models 398

CHAPTER 10 Inventory Control with Known Demand 436

CHAPTER 11 Heuristics, Multiple Objectives, and Goal Programming 475

CHAPTER 12 Calculus-Based Optimization and an Introduction to Nonlinear Programming 510

PART II PROBABILISTIC MODELS 548

CHAPTER 13 Simulation 550

CHAPTER 14 Decision Theory and Decision Trees 597

CHAPTER 15 Project Management: PERT and CPM 662

CHAPTER 16 Inventory Models with Probabilistic Demand 712

CHAPTER 17 Queuing Models 740

CHAPTER 18 Forecasting 772

Answers to Odd-Numbered Problems P-1

Appendix A: Basic Concepts in Probability A-1

Using LINDO L-1

Index I-1

CHAPTER 4 Analysis of LP Models: The Graphical Approach 126

APPLICATION CAPSULE Bye-Bye Backlogs: LP Workforce Scheduling Breaks Up a Costly Canadian Logjam 126

- 4.1 Introduction to Sensitivity Analysis (PROTRAC, Inc. Revisited) 127
- 4.2 Changes in the Objective Function Coefficients 129
- 4.3 Changes in the Right-Hand Sides 130
- 4.4 Tightening and Loosening an Inequality Constraint 133
- 4.5 Redundant Constraints 134
- 4.6 What Is an Important Constraint? 135
- 4.7 Adding or Deleting Constraints 137
- 4.8 Summary 138
 - Key Terms 139
 - Major Concepts Quiz 140
 - Problems 141

► VIDEO CASE The Harley-Davidson Model 144

CHAPTER 5 Linear Programs: Computer Analysis, Interpreting Sensitivity Output, and the Dual Problem 145

APPLICATION CAPSULE Keep on Truckin': An LP Model Slashes Inventory Costs 145

- 5.1 Introduction 146
- 5.2 The Problem the Computer Solves 146

APPLICATION CAPSULE Milking Profits: Planning with LP Keeps Production Inefficiencies from Skimming the Cream off Earnings 154

- 5.3 The Computer Analysis of PROTRAC, Inc. 155
- 5.4 The Crawler Tread Output: A Dialogue with Management (Sensitivity Analysis in Action) 166

APPLICATION CAPSULE Against the Grain: LP Modeling Helps a Cabinet Company Save on Its Raw Materials 167

- 5.5 A Synopsis of the Solution Output 176
- 5.6 The Dual Problem 177
- 5.7 Notes on Implementation 187
- 5.8 Summary 188

Key Terms 189

Major Concepts Quiz 189

Problems 191

Appendix 5.1 Solving an LP When Not All Variables Are Required to Be Nonnegative 204

Appendix 5.2 Questions Based on the Red Brand Canners Case 205

DIAGNOSTIC ASSIGNMENT	Crawler Tread and a New Angle	206
CASE	Saw Mill River Feed and Grain Company	209
CASE	Kiwi Computer	211
CASE	Production Planning at Bumles	214

► VIDEO CASE	You Are What Your Dinner Eats	216
--------------	-------------------------------	-----

CHAPTER 6 Linear Programming: The Simplex Method 217

APPLICATION CAPSULE	Nipped in the Bud: The Simplex Algorithm Helps the Maine Forest Service Fight a Parasite	217
---------------------	--	-----

6.1	Introduction	218
6.2	The Astro/Cosmo Problem Revisited	219
6.3	Types of Solutions to the Original Equations	220
6.4	Basic Feasible Solutions and Extreme Points	224
6.5	Transformed Equations	226
6.6	The Characterization of Adjacent Extreme Points	228
6.7	The Initial Solution	228
6.8	Improving the Solution: The Enter Variable	230
6.9	The Simplex Tableau	233
6.10	Keeping the Solution Feasible: The Exit Variable	235
6.11	The Simplex Method Step by Step	238
6.12	Applying the Simplex Method	240
6.13	Extensions to More General Problems	243

APPLICATION CAPSULE	An Alternative to Simplex: Karmarkar's Algorithm Helps with the Really Big Problems	244
---------------------	---	-----

6.14	Alternative Optima	255
6.15	The Simplex Method for a Min Model	255

APPLICATION CAPSULE	The Human Factor: Why Planners in Turkey Didn't Cotton to an LP Solution	256
---------------------	--	-----

6.16	Notes on Implementation	257
6.17	Summary	257

Key Terms 258

Major Concepts Quiz 260

Problems 261

Appendix 6.1 Sensitivity Analysis: Computing the Optimal Dual Variables 267

Appendix 6.2 Sensitivity Analysis: Computing Allowable Changes in the RHS 269

Appendix 6.3 Sensitivity Analysis: Computing Allowable Changes in the Objective Function Coefficient 271

► VIDEO CASE	The Simplex Algorithm	276
--------------	-----------------------	-----

CHAPTER 7 Linear Programming: Special Applications 277

APPLICATION CAPSULE Ici on parle HASTUS: Montréal Streamlines Its Transportation Scheduling with LP 277

- 7.1 Introduction 278
- 7.2 The Transportation Problem 279
- 7.3 Solving the Transportation Problem 282
- 7.4 The Transportation Model: Other Considerations 297

APPLICATION CAPSULE Meals, Wheels, and Models: A Low-Tech Solution Helps Feed the Needy 298

- 7.5 The Assignment Problem 304
- 7.6 Solving the Assignment Problem: The Hungarian Method 308
- 7.7 The Assignment Problem: Other Considerations 311

APPLICATION CAPSULE Play Ball! The American League Uses an LP Assignment Model to Schedule Its Umpiring Crews 312

- 7.8 Financial and Production Planning 318
- 7.9 The Media Selection Problem 322
- 7.10 Summary 326

Key Terms 326

Major Concepts Quiz 327

Problems 328

► VIDEO CASE Concepts, Analysis, and Technology 333

CHAPTER 8 Integer and Quadratic Programming 334

APPLICATION CAPSULE Brushing Up: American Airlines Uses an Integer Program to Tackle a Complex Scheduling Problem 334

- 8.1 Introduction to Integer Programming 335
- 8.2 Types of Integer Linear Programming Models 336
- 8.3 Graphical Interpretations 337
- 8.4 Applications of 0–1 Variables 342
- 8.5 An ILP Vignette: Steco's Warehouse Location Problem—Formulation and Computer Analysis 347
- 8.6 The Assignment Problem and a Social Theorem 350
- 8.7 The Branch-and-Bound Algorithm 351

APPLICATION CAPSULE How Can I Help You? AT&T Woos Customers by Saving Them Money with the Aid of a Mixed Integer Model 359

- 8.8 ILP in Practice 360
- 8.9 Notes on Implementation of Integer Programming 362
- 8.10 Summary of ILP 363
- 8.11 Introduction to Quadratic Programming 364

- 8.12 Computer Solution of QP Problems 366
- 8.13 Geometric Interpretation of the Sensitivity Analysis 367
- 8.14 Portfolio Selection 370
- 8.15 A Portfolio Example with Live Data 373
 - Key Terms 377
 - Major Concepts Quiz 378
 - Problems 383
- DIAGNOSTIC ASSIGNMENT Assigning Sales Representatives 389
- CASE Municipal Bond Underwriting 392
- CASE Cash Flow Matching 395
- VIDEO CASE The United States Postal Service 397

CHAPTER 9 Network Models 398

- APPLICATION CAPSULE Farewell to the Magical Mystery Tour: A Little Networking Helps Tulsa Streamline Its School Bus Routes 398
- 9.1 Introduction 399
- 9.2 An Example: Seymour Miles (A Capacitated Transshipment Model) 399
- 9.3 A General Formulation (The Capacitated Transshipment Model) 403
- 9.4 The Shortest-Route Problem 404
- APPLICATION CAPSULE New Merchandise Arriving Daily: Network Models Help a Discount Chain Keep Shipping Costs at Bargain-Basement Levels 405
- APPLICATION CAPSULE All Gassed Up: A Network Model Helps Air Products and Chemicals Compress Delivery Costs and Expand Service 412
- 9.5 The Minimum Spanning Tree Problem (Communication Links) 412
- 9.6 The Maximal-Flow Problem 417
- 9.7 Notes on Implementation 423
- 9.8 Summary 423
 - Key Terms 424
 - Major Concepts Quiz 424
 - Problems 426
 - Appendix 9.1 A PC Approach to Network Problems 431
- VIDEO CASE Yellow Freight 435

CHAPTER 10 Inventory Control with Known Demand 436

- APPLICATION CAPSULE Sans Blimp: A Tire Company Lowers Costs and Improves Service with the Aid of an Inventory Control Model 436
- 10.1 Introduction 437

CHAPTER 14 Decision Theory and Decision Trees 597

APPLICATION CAPSULE A Tale of Nine Digits: Decision Trees Help Keep Postal Automation from Becoming a Dead Letter 597

- 14.1 Introduction 598
- 14.2 Three Classes of Decision Problems 599
- 14.3 The Expected Value of Perfect Information: Newsboy Problem Under Risk 608
- 14.4 Utilities and Decisions Under Risk 610
- 14.5 A Mid-Chapter Summary 615
- 14.6 Decision Trees: Marketing Home and Garden Tractors 616

APPLICATION CAPSULE Chilled Out: Decision Trees Help Protect a Hot Project (and Its Budget) from Meltdown 620

- 14.7 Sensitivity Analysis 621
- 14.8 Decision Trees: Incorporating New Information 625
- 14.9 Sequential Decisions: To Test or Not to Test 632
- 14.10 Management and Decision Theory 636
- 14.11 Notes on Implementation 638
- 14.12 Summary 639
 - Key Terms 640
 - Major Concepts Quiz 641
 - Problems 642
 - Appendix 14.1 The PC Approach to Decision Trees 652
 - Appendix 14.2 Conditional Probability and Bayes's Theorem 655

DIAGNOSTIC ASSIGNMENT Johnson's Metal 659

CASE To Drill or Not to Drill 660

► VIDEO CASE Decision Trees 661

CHAPTER 15 Project Management: PERT and CPM 662

APPLICATION CAPSULE When Is the Synchronized Swimming, por favor? Management Science Goes to the Barcelona Olympics 662

- 15.1 Introduction 663
- 15.2 A Typical Project: The Global Oil Credit Card Operation 664
- 15.3 The Critical Path—Meeting the Board's Deadline 670
- 15.4 Variability in Activity Times 678
- 15.5 A Mid-Chapter Summary 684
- 15.6 CPM and Time-Cost Trade-Offs 685
- 15.7 Project Cost Management: PERT/Cost 691
- 15.8 Notes on Implementation 697
- 15.9 Summary 698

Key Terms 699

Major Concepts Quiz 700

Problems 702

► VIDEO CASE The Critical Path Method 711

CHAPTER 16 Inventory Models with Probabilistic Demand 712

APPLICATION CAPSULE Can I Get the Mickey Mouse Model with Lighted Dial in Fuchsia? A Simple Computer Program Helps Manitoba Telephone Keep Its Inventory Costs Down 712

- 16.1 Introduction 713
- 16.2 The Reorder Point-Reorder Quantity Model 714
- 16.3 The Appliance Angle Problem Revisited 714
- 16.4 Victor's Choice of r : Uniform Lead-Time Demand 715
- 16.5 Selecting a Probability of Stocking Out 717
- 16.6 Victor's Choice of r : Normal Lead-Time Demand 719
- 16.7 Expected Annual Cost of Safety Stock 720
- 16.8 Using Simulation to Choose r and Q 722
- 16.9 One-Period Models with Probabilistic Demand: The Newsboy Problem 726
- 16.10 Notes on Implementation 730
- 16.11 Summary 731
 - Key Terms 732
 - Major Concepts Quiz 733
 - Problems 734

DIAGNOSTIC ASSIGNMENT Inventory Turns Per Year 737

► VIDEO CASE Inventory Models with Probabilistic Demand 739

CHAPTER 17 Queuing Models 740

APPLICATION CAPSULE The BOSS Barges In: A Queuing Model Saves New York City Money by Refuting an "Obvious" Conclusion 740

- 17.1 Introduction 741
- 17.2 The Basic Model 742
- 17.3 A Taxonomy of Queuing Models 745

APPLICATION CAPSULE Merging Traffic: A Queuing Simulation Helps Eliminate a Costly Bottleneck 746

- 17.4 Little's Flow Equation and Related Results 747
- 17.5 The $M/G/1$ Queue 749
- 17.6 Problem 1: An $M/M/s$ Queue (Hematology Lab) 750
- 17.7 Economic Analysis of Queuing Systems 752
- 17.8 Problem 2: A Finite Queue (WATS Lines) 754

- 17.9 Problem 3: The Repairperson Problem 757
- 17.10 Transient Versus Steady-State Results: Order Promising 760
- 17.11 The Role of the Exponential Distribution 762
- 17.12 Queue Discipline 763
- 17.13 Notes on Implementation 764
- 17.14 Summary 764
 - Key Terms 765
 - Major Concepts Quiz 765
 - Problems 767
- VIDEO CASE How Many Operators? 771

CHAPTER 18 Forecasting 772

- APPLICATION CAPSULE Yes, Virginia . . . : An Economic Forecasting Model Helps Keep an Unemployment Insurance Trust Fund in the Black 772
- 18.1 Introduction 773
- 18.2 Quantitative Forecasting 774
- 18.3 Causal Forecasting Models 774
- 18.4 Time-Series Forecasting Models 785
- 18.5 The Role of Historical Data: Divide and Conquer 798
- 18.6 Qualitative Forecasting 799
- 18.7 Notes on Implementation 801
- APPLICATION CAPSULE Prescription for Profit: A Pharmaceutical Company Gets an Important Message from a Delphi Forecasting Procedure 802
 - Key Terms 804
 - Major Concepts Quiz 804
 - Problems 806
 - Appendix 18.1 Fitting Forecasting Models, the Data Table Spreadsheet Command 808
- VIDEO CASE Forecasting the Housing Market 810

Answers to Odd-Numbered Problems P-1
