Welcoming Remarks

Mr Jan Abrahamsen, Director-General, Norwegian Ministry of the Environment	7
--	---

Introduction to the Workshop: Background and Objectives

Professor Viggo Mohr (Co-chairman of the Workshop), Norway	9
--	---

Plenary Presentations

The Present State of Sea Ranching of Fish and Shellfish in Japan Dr Hisashi Kanno, Japan	13
Genetically Modified Fish Populations Dr D.J. Penman, Dr M. Woodwark and Dr B.J. McAndrew, United Kingdom	22
Diversity of Microalgae and Their Possible Application Dr Shigetoh Miyachi (Co-chairman of the Workshop), Japan	28
Gene Flow and Analysis of Structured Populations Dr Chris Gliddon and Dr Jérôme Goudet, United Kingdom	32
Implications of Introduction of Transgenic Fish into Natural Ecosystems Dr Anne R. Kapuscinski, United States	43
Modern Biotechnology and Its Application to Macroalgae Cultivation in Japan Dr Masahiro Notoya, Japan	62
Possible Genetic and Ecological Effects of Escaped Salmonids in Aquaculture Dr Øystein Skaala, Norway	77
Modern Biotechnology and Its Application to Aquaculture Dr Tadashi Matsunaga, Japan	87
The Use of Microalgae and Microorganisms in Rearing Systems for Fish Larvae and Juveniles Dr Osamu Imada, Japan	100
Triploidy in the Manila Clam (<i>Tapes philippinarum</i>) Dr Susan Utting, United Kingdom	114

(continued next page)

Modern Biotechnology and Its Application to Shellfish
Dr Katsuhiko T. Wada, Japan 120

Sex Control and Ploidy Manipulation in Sea Bass
Dr Manuel Carrillo, Dr S. Zanuy, Dr M. Blázquez, Dr J. Ramos,
Dr F. Piferrer and Dr E.M. Donaldson, Spain and Canada 125

Co-Chairman’s Summary to Facilitate the Working Groups’ Discussions 145

Reports of the Working Group Sessions 147

Report of Working Group I: Current Applications and Future Prospects
with Respect to Aquaculture and Modern Biotechnology 149

Report of Working Group II: Potential Environmental Impacts of Modern
Biotechnology in Aquaculture 156

Summary and Conclusions of the Workshop 163

List of Workshop Participants 165
