LIST OF FIGURES	xii
LIST OF TABLES	xiii
ABBREVIATIONS	xv
1. Introduction	1
<i>S. R. Osmani</i>	
2. Undernutrition: Measurement and Implications	17
<i>C. Gopalan</i>	
2.1 Introduction	17
2.2 The Biology of Undernutrition	18
2.3 Some Basic Issues	23
2.4 Some Problems in Measurement	34
2.5 Height as an Indicator of Nutritional Status	38
2.6 Summary and Conclusions	45
3. Assessing Undernutrition: The Need for a Reconceptualization	49
<i>P. Payne</i>	
3.1. Introduction	49
3.2 Current Approaches to Measuring Undernutrition	54
3.3 Adjustments, Adaptations, and Failures	66
3.4 Practical Implications	83
3.5 Summary and Conclusions	92
4. Undernutrition: Concepts, Measurements, and Policy Implications	97
<i>T. N. Srinivasan</i>	
4.1 Introduction	97
4.2 The Process Approach to Energy Balance	99
4.3 Measurement Issues	105
4.4 Policy Issues	117
4.5 Summary and Conclusions	120
5. On Some Controversies in the Measurement of Undernutrition	121
<i>S. R. Osmani</i>	
5.1 Introduction	121
5.2 The Energy Requirement of a 'Reference' Adult	122
5.3 The Theory of Autoregulatory Homeostasis	127
5.4 Physical Growth and Anthropometric Status: The 'Small but Healthy' Hypothesis	143

5.5	Summary and Conclusions	158
	Appendix	161
6.	Measuring Undernutrition with Variable Calorie Requirements	165
	<i>N. C. Kakwani</i>	
6.1	Introduction	165
6.2	The Average Calorie Norm Approach	167
6.3	A New Class of Undernutrition Measures	169
6.4	Estimation When Only the Mean and Variance of Requirements Are Known	171
6.5	Estimation When Only Mean Requirement Is Known	174
6.6	Partial Ranking of Populations According to the Degree of Undernutrition	175
6.7	Numerical Estimates of Undernutrition	178
6.8	Summary and Conclusions	184
7.	Issues in the Measurement of Undernutrition	187
	<i>S. Anand and C. J. Harris</i>	
7.1	Introduction	187
7.2	The Framework	190
7.3	Using a Simple Calorie Cut-Off	193
7.4	Supplementation	204
7.5	Approaching the Undernourished via Economic Welfare	209
7.6	Conclusions	214
	Appendix	215
8.	Anthropometric Measures of Nutritional Status in Industrialized Societies: Europe and North America since 1750	219
	<i>R. Floud</i>	
8.1	Introduction	219
8.2	Why Should We Study Human Physical Growth?	219
8.3	The Measurement of Height in the Past	227
8.4	Human Height in the Industrialized World, 1750-1980	229
8.5	An Interpretation of the Increase in European Heights	235
8.6	Conclusions	240
9.	Second Thoughts on the European Escape from Hunger: Famines, Chronic Malnutrition, and Mortality Rates	243
	<i>R. W. Fogel</i>	
9.1	Introduction	243

CONTENTS

xi

9.2	The New Findings on Mortality Crises	246
9.3	Measuring the Variability of Food Supply	248
9.4	Famines amid Surpluses: A Suggested Mechanism	255
9.5	The Long Struggle to Repair the System of Food Distribution	262
9.6	Chronic Malnutrition and the Secular Decline in Mortality	266
9.7	Conclusions	279
	Appendix	281
10.	Intra-Household Allocation of Nutrients and Gender Effects: A Survey of Structural and Reduced-Form Estimates	287
	<i>J. R. Behrman</i>	
10.1	Introduction	287
10.2	Analytical Frameworks	288
10.3	Measurement Problems	300
10.4	Empirical Studies of the Intra-Household Allocation of Nutrients and Gender Effects	304
10.5	Conclusions	317
	REFERENCES	322
	INDEX	357

LIST OF FIGURES

- 2.1 Weight and Standing Heights of Indian Girls, by Per Capita Income and Age
- 3.1 The Time Course of Height and Weight Deficits in Bangladesh, 1975–1976
- 3.2 The Distribution of Body Mass Index (BMI) in the Norwegian Adult Population and the Relationship between BMI and Prospective Risk of Death, 1963–1979
- 7.1 Simple Calorie Cut-Off: The Case of Perfect Correlation
- 7.2 Simple Calorie Cut-Off: The Case of Imperfect Correlation
- 7.3 Trade-Off between Purity and Representativeness
- 7.4 Using Food Expenditure to Reduce Errors of measurement
- 8.1 Adult Height: America and Britain, 1740–1940
- 8.2 Height at Conscription Age: Sweden, Norway, Denmark, and the Netherlands, 1860–1980
- 8.3 Height at Conscription Age: Belgium, France, Italy, and Spain, 1860–1980
- 8.4 The Contrast between the Range of European Heights over Time and of African Heights Today
- 9.1 A Comparison of the Relationship between Body Height and Relative Risk in Two Populations
- 9.2 The Relationship between BMI and Prospective Risk among Norwegian Adults aged 50–64 at Risk, 1963–1979
- 9.3 Iso-mortality Curves of Relative Risk for Height and Weight among Norwegian Males aged 50–64, 1963–1979
- 10.1 Model of Intra-Household Allocation of Nutrients among Children to Produce a Distribution of Expected Health among the Children

LIST OF TABLES

- 2.1 Recommended Dietary Intakes of Protein and Energy for Indians, 1981
- 2.2 Effect of Energy Restriction on Protein Requirements in India
- 2.3 Maternal Height and Incidence of Low Birth Weight (LBW) in Offspring, India
- 2.4 Longitudinal Studies of Growth of Indian Children of Different Socioeconomic Groups
- 2.5 Heights and Weights of Children in Urban India, 1975–1979
- 2.6 Heights and Weights of Adults in India, 1975–1979
- 3.1 The Factorial Components of Energy Requirements
- 3.2 Energy Requirements of a Male Adult with a Nominal Body Weight of 55 kg
- 3.3 Energy Intakes and Minimum Requirements of Rural Indian Men and Women Aged 60–90 Years
- 3.4 Physical Work Capacity of Adult Males with Various Occupations Taken from the Literature
- 3.5 Anthropometric Measurements of Young and Elderly Adults in Rural Tamil Nadu
- 3.6 Some Patterns of Undernutrition in Families
- 4.1 Calorie Distribution among Rural Households: India, 1971–1972
- 6.1 Calorie Distribution by Consumer Units: All-India Rural Areas, 1971–1972
- 6.2 Average Calorie Intake by Household Deciles when Households are Ranked according to Daily Energy Intake per Consumer Unit and Monthly Expenditure per Consumer Unit: All-India Rural Areas, 1971–1972
- 6.3 Head-Count Measure of Undernutrition based on the Distribution of Individuals: India, 1971–1972
- 6.4 Head-Count Measure of Undernutrition for Different Values of Coefficient of Variation: India, 1971–1972
- 6.5 Class of Severity-Sensitive Undernutrition Measures: India, 1971–1972
- 6.6 Head-Count Measures of Undernutrition when the Calorie Intake and Requirement are Correlated: India, 1971–1972

- 6.7 Generalized Lorenz Curve for Rural and Urban Areas: India, 1971–1972
- 9.1 The Impact of Crisis Mortality on the Average Crude Death Rate: England, 1541–1871
- 9.2 A Comparison between King's Law and a Constant Elasticity of Demand Equation
- 9.3 The Effect of Allowing for Carry-over Stocks in the Supply of Wheat at the End of the New Harvest
- 9.4 The Normal Distribution of the Supply of Grain (New Crop plus Carry-over Inventories) at the Close of Harvest
- 9.5 Estimates of the 'Normal' Shares in Foodgrain Consumption and of the 'Normal' Price Elasticities of the Demand for Foodgrains, by Socioeconomic Class in England *c.*1700
- 9.6 The Consequence of Shifting 'Entitlement' Exchange Ratios on the Share of Each Class in the Reduced Crop and on the Per Capita Consumption of Each Class
- 9.7 Analysis of the Variance in the Deviations of Wheat Prices from Trend during Four Periods between 1541 and 1745, England
- 9.8 A Comparison of the Probable French and English Distributions of the Daily Consumption of kcal per Consuming Unit towards the End of the Eighteenth Century
- 9.9 Estimated Average Final Heights of Men who Reached Maturity between 1750 and 1875 in Six European Populations, by Quarter-centuries
- 9.10 Assumed Shares of Grain in Class-Specific Expenditure
