

Contents

<i>Chapter 1</i>	<i>Introduction to Economic Decision Making</i>	<i>1</i>
	Seven Examples of Managerial Decisions	2
	Six Steps to Decision Making	6
	Step 1: Define the Problem	6
	Step 2: Determine the Objective	8
	Step 3: Explore the Alternatives	9
	Step 4: Predict the Consequences	11
	Step 5: Make a Choice	12
	Step 6: Perform Sensitivity Analysis	13
	Private and Public Decisions: An Economic View	14
	Public Goals	16
	Things to Come	17
	The Aim of This Book	19
	A Final Example	20
	Siting a Shopping Mall	21
	Summary	23

<i>Chapter 2</i>	<i>Optimal Decisions Using Marginal Analysis</i>	<i>29</i>
	Conflict at Burger King	29
	A Simple Model of the Firm	30
	A Microchip Manufacturer	31
	Marginal Analysis	39
	Marginal Analysis and Calculus	41
	Marginal Revenue and Marginal Cost	44
	Marginal Revenue	44
	Marginal Cost	46
	Profit Maximization Revisited	47
	Sensitivity Analysis	50
	Asking "What If"	52
	Elementary Breakeven Analysis	53
	Conflict at Burger King Revisited	55
	Summary	56
	<i>Appendix to Chapter 2: Calculus and Optimization Techniques</i>	<i>63</i>

<i>Chapter 3</i>	<i>Demand Analysis and Optimal Pricing</i>	<i>75</i>
	Airline Ticket Pricing	75
	Determinants of Demand	76
	The Demand Function	76
	The Demand Curve and Shifting Demand	78
	General Determinants of Demand	80
	Elasticity of Demand	83

Price Elasticity	83
Other Elasticities	88
Price Elasticity and Prediction	90
Demand Analysis and Optimal Pricing	91
Price Elasticity, Revenue, and Marginal Revenue	91
Maximizing Revenue	94
Optimal Markup Pricing	96
Price Discrimination	100
Other Applications	105
Interdependent Demand	105
Optimal Advertising	107
Airline Ticket Pricing Revisited	108
Summary	110
<i>Appendix to Chapter 3: Consumer Preferences and Demand</i>	117

<i>Chapter 4</i>	<i>Forecasting and Estimating Demand</i>	127
	Forecasting the Nickel Market	127
	Sources of Information	130
	Consumer Interviews and Surveys	130
	Controlled Market Studies	134
	Uncontrolled Market Data	136
	Regression Analysis	137
	Ordinary Least Squares Regression	137
	Interpreting Regression Statistics	144
	Potential Problems in Regression	150
	Forecasting	154
	Barometric Models	155
	Time Series Models	156
	Evaluating Equations and Forecasts	161
	Forecasting the Nickel Market Revisited	163
	Summary	165
	<i>Appendix to Chapter 4: Statistical Tables</i>	175

<i>Chapter 5</i>	<i>Production</i>	179
	Allocating a Sales Force	179
	Basic Production Concepts	180
	Production Technology	180
	Production with One Variable Input	182
	Short-Run and Long-Run Production	182
	Optimal Use of an Input	186
	Production in the Long Run	188
	Returns to Scale	189
	Least-Cost Production	191
	Measuring Production Functions	198
	Linear Production	198
	Production with Fixed Proportions	198
	Polynomial Functions	199
	The Cobb-Douglas Function	200

Estimating Production Functions	201
Other Production Decisions	203
Multiple Plants	203
Multiple Products	204
Allocating a Sales Force Revisited	207
Summary	209

<i>Chapter 6</i>	<i>Cost Analysis</i>	215
	Allocating Costs	215
	Relevant Costs	216
	Opportunity Costs and Economic Profits	216
	Fixed and Sunk Costs	220
	Profit Maximization with Limited Capacity:	
	Ordering a Best-Seller	222
	The Cost of Production	224
	Short-Run Costs	225
	Long-Run Costs	230
	Returns to Scale, Scope, and Learning	233
	Returns to Scale	233
	Economies of Scope	237
	The Learning Curve	239
	Cost Analysis and Optimal Decisions	244
	A Single Product	244
	The Shut-Down Rule	246
	Multiple Products	248
	Transfer Pricing	251
	Allocating Costs Revisited	254
	Summary	255

<i>Chapter 7</i>	<i>Linear Programming</i>	263
	A School Busing Problem	263
	Linear Programs	264
	Graphing the LP Problem	267
	A Minimization Problem	271
	Sensitivity Analysis and Shadow Prices	274
	Changes in the Objective Function	275
	Shadow Prices	277
	Formulation and Computer Solution for Larger LP Problems	282
	Computer Solutions	285
	A School Busing Problem Revisited	291
	Summary	294
	<i>Appendix to Chapter 7: The Simplex Method</i>	301

<i>Chapter 8</i>	<i>Market Structure</i>	307
	New York City's Taxicabs	307
	Perfect Competition	309
	Decisions of the Competitive Firm	309

Market Equilibrium 312

Pure Monopoly 315

Barriers to Entry 317

Perfect Competition versus Pure Monopoly 319

Cartels 322

Monopolistic Competition 325

New York City's Taxicabs Revisited 328

Summary 330

Appendix to Chapter 8: The Economics of Supply and Demand 337

Chapter 9

Oligopoly and Game Theory 345

A Battle for Air Passengers 345

Oligopoly 346

Concentration and Prices 350

Price and Quantity Competition 352

Price Rigidity and Kinked Demand 352

Price Leadership 355

Quantity Competition 355

Game Theory 359

Analyzing Payoff Tables 360

Equilibrium Strategies 363

Price Wars and the Prisoner's Dilemma 364

Competitive Strategy 368

Market Entry 370

Repeated Competition 374

A Battle for Air Passengers Revisited 376

Summary 377

Chapter 10

Decision Making under Uncertainty 387

Gearing Down for a Recession 387

Uncertainty, Probability, and Expected Value 388

Expected Value 390

Decision Trees 391

An Oil Drilling Problem 392

Features of the Expected-Value Criterion 394

Sequential Decisions 398

Risk Aversion 403

Expected Utility 406

Expected Utility and Risk Aversion 411

Nonmonetary Examples 414

Gearing Down for a Recession Revisited 417

Summary 419

Chapter 11

The Value of Information 427

The Stock Market and the Economy 427

The Value of Information 428

The Oil Wildcatter Revisited 428

Imperfect Information 430

Revising Probabilities	433
Bayes Theorem	434
Other Applications	438
The Science of Baseball	438
Predicting Credit Risks	439
Time Inc. and <i>Picture Week</i>	442
Intuitive Prediction	445
Illustrative Prediction Problems	446
Answers to the Prediction Problems	447
Asymmetric Information	448
Adverse Selection	449
Signalling	452
Principals, Agents, and Moral Hazard	454
The Stock Market and the Economy Revisited	457
Summary	460

<i>Chapter 12</i>	<i>Optimal Search and Competitive Bidding</i>	469
	U.S. Timber Auctions	469
	I. Optimal Search	471
	Optimal Stopping	471
	Optimal Sequential Decisions	474
	The Value of Additional Alternatives	475
	Simultaneous Search	475
	Sequential Search	478
	II. Auctions and Competitive Bidding	482
	Bidder Strategies	482
	Sealed-Bid Auctions	482
	English Auctions	493
	Optimal Auctions	493
	Expected Auction Revenue	497
	Final Remarks	498
	U.S. Timber Auctions Revisited	499
	Summary	499

<i>Chapter 13</i>	<i>Bargaining and Negotiation</i>	507
	Negotiating a Shopping Mall Lease	507
	The Economic Sources of Beneficial Agreements	508
	Resolving Disputes	511
	Differences in Values	513
	Contingent Contracts	516
	Multiple-Issue Negotiations	517
	Continuous Variables	519
	Negotiation Strategy	522
	Perfect Information	523
	Imperfect Information	526
	Negotiating A Shopping Mall Lease Revisited	531
	Summary	534

<i>Chapter 14</i>	<i>Capital Budgeting</i> 541
	McDonnell Douglas's New Jet 541
	Present Value and Discounting 542
	Interest Rate Calculations 542
	Valuing Future Cash Flows 544
	Discounting and Valuation 550
	Making Investment Decisions 551
	A Single-Investment Decision 551
	Mutually Exclusive Choices 554
	Choices with Constrained Resources 556
	Determining the Discount Rate 557
	The Weighted Average Cost of Capital 558
	McDonnell Douglas's New Jet Revisited 560
	Summary 562
	<i>Appendix to Chapter 14: Present Value Tables</i> 568
 <i>Chapter 15</i>	 <i>Public Goods and Private Markets</i> 573
	The Southwest Water Shortage 573
	Market Efficiency 575
	Private Markets: Benefits and Costs 575
	Market Failure Due to Monopoly 584
	Government Responses 586
	Natural Monopolies 588
	Market Failure Due to Externalities 591
	Remedying Externalities 595
	Market Failure Due to Imperfect Information 599
	Public Goods 600
	Public Goods and Efficiency 601
	The Southwest Water Shortage Revisited 604
	Summary 604
 <i>Chapter 16</i>	 <i>Benefit-Cost Analysis</i> 611
	Automobiles and Safety 611
	The Basics of Benefit-Cost Analysis 612
	Applying the Net Benefit Rule 612
	Dollar Values 613
	Efficiency versus Equity 614
	Applications of Benefit-Cost Analysis 615
	Benefit-Cost Analysis and Profit Analysis 616
	Public Investment in a Bridge 617
	Valuing Benefits and Costs 621
	Market Values 621
	Nonmarketed Benefits and Costs 622
	The Discount Rate and Uncertain Values 627
	Automobiles and Safety Revisited 629
	Summary 630

Answers to Odd-Numbered Problems 637

Index 667
