Introduction	1
1 The management of municipal waste	4
The collection of municipal waste	5
Waste disposal by landfill	6
Waste disposal by incineration	8
The demunicipalization of waste management	11
2 Recycling in perspective	14
The diverse rationale for recycling	14
The hierarchy of recycling options	18
The recycling of post-consumer waste	21
The control of packaging waste	25
Public participation and recycling	29
The secondary materials market	30
The economic viability of recycling	33
Recycling and 'market failure'	33
3 London	38
The historical development of waste management for London	38
Radical waste management under the GLC in the 1980s	45
The abolition of the GLC Public Health Engineering Department	46
The post-war collapse of paper recycling	51
The rise of the 'bring' system for the recycling of glass	54
The underlying barriers to recycling in London	56
Market-based recycling policy	59
The demunicipalization of waste management in London	62
The future of landfill	65
The re-emergence of incineration	66
Conclusion	68
4 New York	70
The historical development of waste management for New York	70
The impact of the New York State bottle bill	77
Local Law 19 and kerbside recycling	78
Conflict and uncertainty over the future	84
Conclusion	88

5 Hamburg	90
The historical development of waste management for Hamburg	90
The contemporary pattern of municipal waste management	93
The recycling of putrescible kitchen and garden waste	96
The politics of waste management in Hamburg	101
The 1991 packaging ordinance	105
Conclusion	110
6 Conclusion	111
The limits to comprehensive post-consumer recycling	112
The need for waste reduction	113
The market-led incineration path	114
Conclusion	115
<i>Notes and references</i>	117
