Introduction	1
1. DEBT	4
(1) The Nature of the Debt Contract	4
(2) Aspects of the Economics of Debt	5
(3) Theories of Credit Rationing	9
(4) Theories of Intermediation	16
(5) Aspects of the Structure and Development of Financial Systems	23
Summary	28
Appendix: The Development of Financial Systems—a Long View	28
2. FINANCIAL FRAGILITY IN THE CORPORATE SECTOR	32
(1) Recent Trends in Corporate Sector Indebtedness	32
(2) Theories of Corporate Debt	40
(3) Costs of Bankruptcy	44
(4) Explaining Relative Levels of Corporate Indebtedness	48
(5) Explaining Divergences From Structural Patterns of Gearing	50
(6) Company Sector Debt and Default	58
Conclusions	72
3. FINANCIAL FRAGILITY IN THE PERSONAL SECTOR	75
(1) Recent Trends in Personal-Sector Indebtedness	75
(2) Theoretical Considerations: the Household-Sector Demand for Credit	80
(3) An Interpretation of Patterns of Indebtedness	84
(4) Personal-Sector Debt and Default	90
(5) Personal Debt, Saving, and Asset Prices	97
Conclusions	98
4. ECONOMIC EFFECTS OF FINANCIAL FRAGILITY	101
(1) Effects on Other Companies	101
(2) Effects on Public Expenditure	102
(3) Effects on Economic Policy	103
(4) Cyclical Effects on Saving and Investment	104

List of Tables

1.1.	Financial interrelations ratio, 1850–1978	29
1.2.	Financial intermediation ratio, 1850–1978	30
1.3.	Intercountry comparison of financial ratios	30
2.1.	Equations for business failure ratio	67
2.2.	Equations for spreads	68
2.3.	Variants on the basic equations	69
2.4.	Pooled cross-section and time series equations for business failure rate	70
2.5.	Pooled cross-section and time series equations for spreads	71
3.1.	Correlation between changes in mortgage rate and reference rate	85
3.2.	Correlation of change in spreads to change in defaults	85
3.3.	Indicators of credit rationing in the mortgage market	87
3.4.	Key policy and structural stimuli to personal sector indebtedness 1966–90	89
3.5.	Equations for personal sector bankruptcy	95
3.6.	Equations for personal sector mortgage repossessions	96
3.7.	Pooled cross-section and time series equations for bankruptcy	97
3.8.	Household saving and borrowing as per cent of disposable income	99
6.1.	Growth of indebtedness (indices)	175
6.2.	Indicators of risk pricing prior to crises	176
6.3.	Commercial banks' capital ratios	177
6.4.	Shifts in regime prior to financial crises	179
6.5.	Share price movements and financial crises	180
6.6.	Developments in US monetary growth prior to crises	180
6.7.	Official short-term interest rates prior to crises	181
6.8.	Developments in real GNP prior to financial crises	181
6.9.	Changes in the flow of lending during crises	182
6.10.	Changes in interest-rate relationships during crises	186
6.11.	Summary of features of periods of instability	188
7.1.	Industrial aspects of financial instability	235
7.2.	Indicators of market entry prior to instability	236
8.1.	Summary table	260

(5) Effects Operating via the Financial System	104
(6) Financial Fragility and Longterm Economic Performance	107
(7) Volatility of Asset Prices	107
(8) Bank Insolvency	108
(9) Financial Fragility: a Case-study	110
Conclusions	113
Appendix: Public Debt and Financial Fragility	115
 5. THE ECONOMIC THEORY OF SYSTEMIC RISK	 117
(1) Bank Runs	118
(2) Financial Regulation against Systemic Risk	122
(3) Debt and Financial Fragility	127
(4) The Monetarist Approach	130
(5) Rational Expectations	133
(6) Uncertainty	134
(7) Credit Rationing	136
(8) Asymmetric Information and Agency Costs	141
(9) Dynamics of Dealer Markets	143
Conclusions	146
 6. FINANCIAL INSTABILITY 1966–1990	 147
(1) Wholesale Market Structure and Dynamics	148
(2) Six Episodes of Financial Instability	152
(3) Price and Quantities in the Financial Markets 1966–90	167
(4) A Comparative Empirical Analysis of the Periods of Instability	175
(5) The Theory of Crises Viewed in the Light of Empirical Evidence	190
Conclusions	197
Appendix 1: Euromarkets during the 1987 Crash	202
Appendix 2: Prediction of Systemic Risk: a Simple Econometric Test	205
 7. SYSTEMIC RISK AND FINANCIAL MARKET STRUCTURE	 208
(1) Theories of Financial Crisis	209
(2) Recent Developments in Industrial Economics and their Application to Financial Markets	212
(3) An Industrial Approach to Financial Instability	216
(4) Structural Reasons for Overshooting	223
(5) Financial Instability: a Re-examination	229
(6) New Entry without Instability	236
Conclusions	238
Appendix: The Industrial Economics of the Primary Eurobond Market	241

8. TEN FURTHER FINANCIAL CRISES	245
(1) Overend Gurney (1866)—UK	245
(2) The Stock-Market Crash and the Great Depression (1929–1933)—USA	246
(3) The Yamaichi Rescue (1965)—Japan	249
(4) The Penn Central Bankruptcy (1970)—USA	250
(5) The Continental Illinois Bank Failure (1984)—USA	251
(6) The Canadian Regional Banking Crisis (1985)	252
(7) The Collapse of the High-Yield (Junk) Bond Market (1989)—USA	253
(8) Instability in Australia in the Late 1980s	254
(9) The Swedish Finance Company Crisis (1990)	256
(10) The Norwegian Banking Crisis 1990–1991	257
Conclusions	259
CONCLUSION: THEMES AND PROSPECTS	264
(1) Issues of Finance	264
(2) Regulatory Issues	267
(3) Financial Structure and Behaviour	272
(4) Prospects	276

List of Charts and Figures

Charts

2.1.	Corporate debt/equity ratios	34
2.2.	Corporate capital gearing ratios	34
2.3.	Corporate debt/GNP ratios	35
2.4.	Corporate debt/profit (NI definition)	35
2.5.	Corporate income gearing (%)	36
2.6.	Bank lending/corporate debt ratios	37
2.7.	Bank lending/corporate liabilities	37
2.8.	Corporate liquidity ratios	38
2.9.	Corporate net capital gearing ratios	38
2.10.	Corporate net debt/fixed asset ratios	39
2.11.	Corporate debt/net asset ratios	39
2.12.	Business failure rates	59
2.13.	Business failure rates	60
2.14.	Private-public bond yield spreads (% points)	61
2.15.	Private-public bond yield spreads (% points)	62
3.1.	Personal debt/income ratios	76
3.2.	Mortgage debt/income	77
3.3.	Personal debt/GNP ratios	77
3.4.	Personal capital gearing ratios	78
3.5.	Capital gearing in housing	79
3.6.	Personal income gearing ratios (%)	79
3.7.	Personal bankruptcies (1975=1)	91
3.8.	Mortgage reposessions and foreclosures (%)	92
6.1.	US\$ short-term rates (%)	167
6.2.	US\$ short-term spreads (%)	168
6.3.	Spreads on syndicated credits (%)	169
6.4.	US\$ long bond yields (%)	170
6.5.	US\$ long bond spreads (%)	171
6.6.	US\$ real rates (%)	171
6.7.	UK long and short spreads (%)	172
6.8.	Growth of UK and US share prices (%)	173
6.9.	Discount margins for US bank FRNs	173
6.10.	Gross euromarket volumes (\$ bn)	174
6.11.	Shares of euromarket activity	174
6.12.	US and UK credit expansion/GNP	175

Figures

2.1.	Debt/equity ratios and the cost of capital	42
3.1.	The life cycle and liquidity constraints	82
