Tables and figures vii
Preface ix

Introduction 1
Lay and scientific theories 1
Aims of the current research 2
A terminological note 3
Rationale 5

Chapter 1: A review of the literature 7
Introduction 7
Public attitudes towards the mentally ill 9
Professionals' attitudes towards the mentally ill 19
The attitudinal relationship between mental illness and criminality 23
Sources of variation influencing attitudes 29
A critical review of the research on attitudes towards the mentally ill 37
Distinct psychopathological disorders 47
Models of mental illness 52
Propositions and structure of the current research 59
Concluding overview 62

Chapter 2: Methodology 67
Introduction 67
Research design 68
Sampling design 78
Operationalisation 84
Data collection 91
Ethical considerations 97
Concluding overview 99

Chapter 3: Data analysis and presentation of the results 101
Introduction 101
The nature of the sample populations 103
Proposition 1 106
Proposition 2 112
Proposition 3 115
Proposition 4 117
Thematic content analysis 120
Concluding overview 121

Chapter 4: Discussion 123
Introduction 123
Comparing multi-agency and scientific theories towards the mentally ill 125
The influence of psychopathological and criminal deviance on multi-agency thinking 128
The influence of group surveyed on multi-agency thinking 132
The influence of age, gender and previous experience on multi-agency thinking 146
Criminological and clinical implications of the current research 150
Research limitations and future directions 171
Concluding overview 175

Conclusions 179

Bibliography 181
Appendix 201
Index 225

Tables and figures

Table 1.1	The various levels within each independent variable	61
Table 2.1	A 2×2 factorial experimental design	69
Table 2.2	Number of interviews conducted across each sample population	83
Figure 2.1	A complete 2×2 factorial design matrix	84
Table 2.3	Content of the schedule for each multi-agency group	87
Table 2.4	Type of letter administered to each sample population	93
Figure 2.2	Bar chart of response rates for each multi-agency group	94
Table 2.5	Information relating to the nature of the interviews for each sample population	97
Table 2.6	Nature of the research ethicality test performed by each survey group	97
Table A1	Frequency distribution of the six groups surveyed	204
Table A2	Cross-tab of gender by levels of group surveyed	204
Table A3a	Summary of age by levels of group surveyed	205
Table A3b	Cross-tab of age by levels of group surveyed	205
Table A4a	Cross-tab of knowing a mentally ill person by levels of group surveyed	206
Table A4b	Cross-tab of relationship with the mentally ill by levels of group surveyed	206
Table A5	Cross-tab of offered further information by levels of group surveyed	207
Table A6	Summary of years of service by levels of group surveyed	207
Table A7	Frequency distribution: course being studied	208
Table A8	Frequency distribution: year of completing FT/education	208
Table A9	Frequency distribution: police officers' rank	208

Table A10	Summary of Person's chi square values and significance levels	209
Table A11	Mean and percentage agreement scores for the nine dimensions for the three models across the whole sample	209
Table A12a	Correlation matrix for the various dimensions of the medical (organic) model	210
Table A12b	Correlation matrix for the various dimensions of the moral (cognitive-behavioural) model	211
Table A12c	Correlation matrix for the various dimensions of the psychosocial model	212
Table A13	Coefficient values and questionnaire items associated with each factor	213
Table A14a	Summary of ANOVA main and interaction effect mean scores for factor one - 'sick' role	214
Table A14b	Summary of ANOVA main and interaction effect mean scores for factor two - medical-control	215
Table A14c	Summary of ANOVA main and interaction effect mean scores for factor three - social-treatment	216
Table A15	Summary of ANOVA main and interaction effect results for each of the three factors	217
Table A16	Thematic content analysis for each group surveyed	218
Table A16a	Overview of the substantive content of each theme	219
Figure A1	Bar chart of group surveyed data for factor one - 'sick' role	220
Figure A2	Bar chart of group surveyed data for factor two - medical-control	221
Figure A3	Bar chart of group surveyed data for factor three - social-treatment	221
Figure A4	Line graph of the two way interaction effect (disorder by offence) for factor two - medical-control	222
Figure A5	Line graph of the two way interaction effect (disorder by group surveyed) for factor two - medical-control	222
Figure A6	Line graph of the two way interaction effect (disorder by group surveyed) for factor three - social-treatment	223
Figure A7	Line graph of the two way interaction effect (offence by group surveyed) for factor one - 'sick' role	223
