

Contents

Preface	vii
Part I. Introduction	
1. Sustainable Agricultural Growth <i>Vernon W. Ruttan</i>	3
Part II. Setting the Stage	23
2. Agricultural and Food System Scenarios for the 21st Century <i>Kirit S. Parikh</i>	26
3. Constraints on Institutional Innovation: Transaction Costs, Incentive Compatibility, and Historical Considerations <i>Douglass C. North</i>	48
Part III. Agricultural Research, Resource Management, and Technology Dissemination	73
4. Building Productive National and International Agricultural Research Systems <i>Carl K. Eicher</i>	77
5. Fragile Lands: Identification and Use for Agriculture <i>B. L. Turner II and Patricia A. Benjamin</i>	104
6. Tales of Dissemination in Agriculture <i>Judith Tendler</i>	146

Part IV. Health Research and Health Systems	183
7. The Institutional Infrastructure for Health Research in Developing Countries <i>Adetokunbo O. Lucas</i>	186
8. Health Policy for Rural Areas: Sri Lanka <i>Godfrey Gunatilleke</i>	208
9. Health Systems for Rural Areas: Kenya <i>Dan C. O. Kaseje</i>	235
Part V. Monitoring Global Change	259
10. Institutional Capacity to Monitor the Sources and Effects of Environmental Change in Agriculture <i>Stephen L. Rawlins</i>	261
11. Monitoring the Effects of Acid Deposition and Climate Change on Agricultural Potential <i>J. A. Lee, David Norse, and Martin Parry</i>	284
12. Institutional Capacity to Monitor the Interactions of Agricultural and Health Change <i>David Bradley</i>	308
Part VI. Perspective	341
13. Challenges to Agricultural Research in the 21st Century <i>Vernon W. Ruttan</i>	343
14. Global Research Systems for Sustainable Development: Agriculture, Health, and Environment <i>David E. Bell, William C. Clark, and Vernon W. Ruttan</i>	358
