Contributing Authors	x
Introduction to the Foreword	xii
<i>Donald R. Kirks</i>	
Foreword	xiii
<i>Derek C. Harwood-Nash</i>	
Preface	xiv
Preface to the Second Edition	xvi
Preface to the First Edition	xviii
Acknowledgments	xix
1. Techniques	1
<i>Taylor Chung and Donald R. Kirks</i>	
Development of Pediatric Radiology	1
Problem-Oriented Pediatric Radiology	2
Risks of Pediatric Radiology	2
The Problem-Oriented Approach	3
Role of the Radiologist	3
Pediatric Radiologic Techniques	6
Routine Radiologic Examinations	19
Special Radiologic Techniques	22
References	58
2. Skull and Brain	65
<i>Richard L. Robertson, William S. Ball, Jr., and Patrick D. Barnes</i>	
Techniques	65
Imaging Guidelines	68
Normal Skull Radiology	71
General Abnormalities	80
Specific Abnormalities	86
References	193
3. Head and Neck	201
<i>Caroline D. Robson, Francine M. Kim and Patrick D. Barnes</i>	
Imaging Techniques and Guidelines	201
Orbit and Globe	203
Nasal Cavity, Paranasal Sinuses, and Face	213
Temporal Bone and Ear	229
Neck, Oral Cavity, and Mandible	238
References	255

4.	Spine and Spinal Cord	259
	<i>Tina Young Poussaint, Patrick D. Barnes, and William S. Ball, Jr.</i>	
	Techniques	259
	Imaging Guidelines	262
	Systematic Approach to the Pediatric Spine	263
	Normal Spine and Spinal Cord	264
	Common Normal Variants	269
	General Abnormalities	273
	Specific Abnormalities	277
	References	321
5.	Musculoskeletal System	327
	<i>Tal Laor, Diego Jaramillo, and Alan E. Oestreich</i>	
	Normal Anatomy and Development	327
	Techniques	330
	Congenital and Developmental Variants	335
	General Abnormalities	343
	Specific Abnormalities	348
	Miscellaneous Disorders	447
	Disorders Localized to a Specific Body Area	461
	References	500
6.	Cardiovascular System	511
	<i>Janet L. Strife, George S. Bisset III, and Patricia E. Burrows</i>	
	Techniques	512
	Ordered Approach	516
	General Abnormalities	531
	Specific Abnormalities	534
	References	613
7.	Respiratory System	619
	<i>Gary L. Hedlund, N. Thorne Griscom, Robert H. Cleveland, and Donald R. Kirks</i>	
	Techniques	619
	Ordered Approach	625
	General Abnormalities	628
	Specific Abnormalities	642
	References	812
8.	Gastrointestinal Tract	821
	<i>Carlo Buonomo, George A. Taylor, Jane C. Share, and Donald R. Kirks</i>	
	Techniques	822
	General Abnormalities	828
	Specific Abnormalities	838
	Abnormalities of the Hepatobiliary System	954
	Splenic Abnormalities	979
	Pancreatic Abnormalities	983
	Imaging of Blunt Abdominal Trauma	987
	References	996
9.	Genitourinary Tract	1009
	<i>Carol E. Barnewolt, Harriet J. Paltiel, Robert L. Lebowitz, and Donald R. Kirks</i>	
	Techniques	1010
	Normal Genitourinary Tract	1019

General Abnormalities	1025
Specific Abnormalities	1042
References	1161
Appendix 1: Preparation of Pediatric Patients for Radiology Procedures	1171
Appendix 2: Pediatric Radiographic Projections	1173
Appendix 3: Typical Radiographic Exposures and Doses	1175
Appendix 4: Radiographic Technique Guidelines	1179
Appendix 5: Commonly Used Pediatric Contrast Media	1181
Appendix 6: Sedation Formulary	1183
Appendix 7: Oral Contrast Dosage for Computed Tomography	1185
Appendix 8: Computed Tomography Protocols	1187
Appendix 9: Magnetic Resonance Neuroimaging Protocols	1189
Appendix 10: Magnetic Resonance Body Imaging Protocols	1191
Subject Index	1195
