PART 1

ESSENTIALS OF MODERN ONCOLOGIC SCIENCE

1

<i>Essentials of Molecular Biology: Basic Principles</i>	3
LANCE A. LIOTTA	
EDISON T. LIU	
Storage and Transmission of Genetic Information 3	
Reading the Genetic Code and Production of Encoded Proteins 7	
Protein Structure and Function 8	
Subcellular Molecular Structure 9	
Different Pathways to Cancer 12	
Suggested Readings 15	

2

<i>Essentials of Molecular Biology: Genomics and Cancer.</i>	17
LANCE A. LIOTTA	
EDISON T. LIU	
Understanding Cancer at the Molecular Level: The New Frontier 17	
Genetic Mechanisms of Cancer Progression: Cancer Is a Genetic Disease 17	
Cancer Genes: Models of Action 18	
Molecular Profiling: Prognosis and Treatment Tailored to the Individual Patient 20	

Postgenome Challenge for Molecular Medicine	21
cDNA Microarrays Are a New Tool to Analyze Gene Expression Patterns in Human Cancer	22
Technology for Tissue Microdissection Brings Molecular Analysis to the Tissue Cell Level	24
Tumor Tissue Arrays	25
Beyond Functional Genomics to Cancer Proteomics	25

3

<i>Essentials of Signal Transduction</i>	31
--	----

CHRISTOPHER L. CARPENTER
LEWIS C. CANTLEY

The Sensory Machinery: Ligands and Receptors	31
--	----

Propagation of Signals to the Cell Interior	34
---	----

Efficiency and Specificity: Formation of Multiprotein Signaling Complexes	38
---	----

Regulation of Protein Levels: Transcription, Translation, and Proteolysis	39
--	----

4

<i>Essentials of Immunology</i>	43
---------------------------------	----

NICHOLAS P. RESTIFO
JOHN R. WUNDERLICH

T Cells and Cellular Immunity	43
-------------------------------	----

Antigen Presentation to T Cells	44
---------------------------------	----

Specialized Antigen-Presenting Cells	50
--------------------------------------	----

T-Cell Recognition of Antigens	51
--------------------------------	----

T-Cell Maturation	53
-------------------	----

Activation of Mature T Cells	55
------------------------------	----

States of Mature T Cells	59
--------------------------	----

Functions of Mature T Cells	60
-----------------------------	----

Cytotoxic Effector Cell Mechanisms	61
------------------------------------	----

B Cells and Humoral Immunity	64
------------------------------	----

Summary	67
---------	----

PART 2

PRINCIPLES OF ONCOLOGY

5

<i>Molecular Biology of Cancer: Cytogenetics</i>	77
--	----

MAZIN B. QUMSIYEH
PEINING LI

History of Cancer Cytogenetics	77
--------------------------------	----

Chromosome Structure and Function	77
-----------------------------------	----

Cytogenetic Methods	79
International System of Cytogenetic Nomenclature	82
Mechanisms and Implications of Chromosomal Abnormalities in Cancer	82
Cautions to Exercise in Interpreting Chromosomal Abnormalities Seen in Cancer Studies	86
Clonal Evolution and Chromosome Evolution	87
Constitutional Chromosomal Abnormalities Predisposing to Cancer Development	88
Data Mining in Cancer Cytogenetics	89
Glossary	89

6

<i>Molecular Biology of Cancer: The Cell Cycle</i>	91
MICHAEL B. KASTAN	
STEPHEN X. SKAPEK	
Mechanics of the Cell Division Cycle	91
Control of the Cell Division Cycle	99
Implications for Cancer	102

7

<i>Molecular Biology of Cancer: Apoptosis</i>	111
STANLEY J. KORSMEYER	
SANDRA S. ZINKEL	
Apoptosis	111
Genetics of Cell Death	112
Death Receptors	113
Caspases	113
The Bcl-2 Family	114
Bcl-2 Family Members Play Critical Roles in Tissue Homeostasis	117
Role of Mitochondria	118
Cell Proliferation and Apoptosis	118
Possibilities for Therapeutic Intervention	118
Conclusions	119

8

<i>Molecular Biology of Cancer: Invasion and Metastases</i>	123
WILLIAM G. STETLER-STEVENSON	
DAVID E. KLEINER, JR.	
The Metastatic Cascade	123
Oncogenesis: Metastasis and Tumorigenesis Are under Separate Genetic Control	125
Angiogenesis: Balance of Positive and Negative Effectors	126
Tumor Heterogeneity and Clonal Dominance	126
Defining the Invasive Phenotype	126
Cell-Cell Adhesion Suppresses or Facilitates Metastasis Formation	127
Cell-Extracellular Matrix Interactions in Tumor Progression	129
Intravasation, Extravasation, and Orthotopic Effect	134

9

<i>Biology of Cancer: Angiogenesis</i>	137
ISAIAH J. FIDLER	
ROBERT S. KERBEL	
LEE M. ELLIS	
Neoplastic Angiogenesis: The Balance of Proangiogenic and Antiangiogenic Molecules	137
Lymphoid Cell-Mediated Angiogenesis	140
Regulation of Angiogenic Factor Expression in Tumors	140
Endogenous Inhibitors of Angiogenesis	140
Clinical Utility of Angiogenesis	141
Antiangiogenic Therapy: Issues and Expectations	143
Antiangiogenic Therapy as a Component of Other Antineoplastic Regimens	144
Conclusions	144

10

<i>Etiology of Cancer: Viruses</i>	149
SECTION 1 RNA Viruses 149	
ERIC M. POESCHLA	
GARY L. BUCHSCHACHER, JR.	
FLOSSIE WONG-STAALE	
Retroviral Genetics: Selective Access to the Growth Control Genes of the Cell	149
Mechanisms of Retroviral Oncogenesis	150
Human T-Cell Leukemia Virus Type I	152
Human T-Cell Leukemia Virus Type II	154
Human Immunodeficiency Virus	154
Hepatitis C Virus	155

SECTION 2

DNA Viruses 158	
PETER M. HOWLEY	
DON GANEM	
ELLIOTT KIEFF	
Hepadnaviruses and Hepatocellular Carcinoma	158
Papillomaviruses and Human Cancer	161
Epstein-Barr Virus	168
Kaposi's Sarcoma-Associated Herpesvirus (Human Herpesvirus-8)	171

11

<i>Etiology of Cancer: Chemical Factors</i>	179
STUART H. YUSPA	
PETER G. SHIELDS	
The Nature of Chemical Carcinogens: Chemistry and Metabolism	180
Animal Model Systems and Multistage Carcinogenesis	181
Protection against Chemical Carcinogens: DNA Repair, Tumor Suppressor Genes, and Transforming Growth Factor- β	184
Genetic Susceptibility to Chemical Carcinogenesis in Experimental Models	184

Determination of Chemical Carcinogens for Humans and Population-Based Risk Assessment	185
Molecular Epidemiology of Cancer Risk from Chemicals	186
Mutational Spectrum of Human Cancers	190
Tobacco Smoking and Cancer Risk	190

12

<i>Etiology of Cancer: Physical Factors</i>	195
ROBERT L. ULLRICH	
Interactions of Radiation with Cells and Tissues	195
Ionizing Radiation and Cancer	197
Ultraviolet Light	202
Asbestos	204

13

<i>Etiology of Cancer: Cancer Genetics</i>	207
ALLEN E. BAILE	
SUZANNE J. BROWN	
Cancer as a Genetic Disease	207
Mechanisms of Cancer Predisposition	207
Gatekeepers, Caretakers, and Landscapers	211
Clinical Characteristics of Cancer Families	211
Multisystem Genetic Syndromes with a High Risk of Cancer	212
Nonsyndromic Hereditary Cancer	215

14

<i>Epidemiology of Cancer</i>	219
---	------------

SECTION 1	<i>Epidemiologic Methods</i>	219
------------------	------------------------------	-----

MARGARET A. TUCKER	
Observational Studies	219
Descriptive Studies	221
Analytic Studies	221
Intervention Studies	226
Future Directions	227

SECTION 2	<i>Descriptive Epidemiology: Cancer Statistics</i>	228
------------------	--	-----

PHILIP COLE	
BRAD RODU	
Descriptive Epidemiology	228
Perspectives	238

SECTION 3	<i>Analytic Epidemiology: Cancer Causes</i>	241
------------------	---	-----

PHILIP COLE	
BRAD RODU	
Evaluating Carcinogenicity	241
Causes of Cancer	242
Perspectives	249

15*Principles of Cancer Management: Surgical Oncology* **253**

STEVEN A. ROSENBERG

Historical Perspective 253

Anesthesia for Oncologic Surgery 254

Determination of Operative Risk 256

Roles for Surgery 259

The Surgical Oncologist 262

16*Principles of Cancer Management: Radiation Therapy* **265**

SAMUEL HELLMAN

Physical Considerations 265

Biologic Considerations 270

Clinical Considerations 282

17*Principles of Cancer Management: Chemotherapy* **289**

EDWARD CHU

VINCENT T. DEVITA, JR.

History 289

Chemotherapy as Part of the Initial Treatment of Cancer 290

Clinical End Points in Evaluating Response to Chemotherapy 291

Principles Governing the Use of Combination Chemotherapy 292

Effect of the Biology of Tumor Growth on Response to Chemotherapy 294

Apoptosis, Cell-Cycle Control, and Resistance to Chemotherapy 295

Concept of Dose Intensity 300

In Vitro Drug-Response Assays 302

18*Principles of Cancer Management: Biologic Therapy* **307**

STEVEN A. ROSENBERG

Basic Principles of Tumor Immunology 307

Cells of the Immune System 308

Immune Effector Mechanisms Resulting in Cell Destruction 308

Cytokines 308

Tumor Antigens 320

Immunotherapy 324

Interferons 326

19

Pharmacology of Cancer Chemotherapy

335

SECTION 1 *Pharmacokinetics and Pharmacodynamics* 335

MARK J. RATAIN

Pharmacokinetics: Fundamental Principles 335

Pharmacokinetics: What's Important to the Clinician? 338

Basic Methodology of Pharmacokinetic Studies 339

Pharmacodynamics 340

Rational Use of Pharmacokinetic and Pharmacodynamic Data
in Clinical Oncology 340

SECTION 2 *Cancer Drug Development* 345

Section 2.1 Identification and Screening of New Agents 345

EDWARD CHU

MICHAEL R. GREVER

BRUCE A. CHABNER

Drug Discovery 345

Drug Development 352

Conclusion 354

Section 2.2 Combinatorial Chemistry 356

DAVID J. AUSTIN

Principles of Combinatorial Chemistry 356

The History of Combinatorial Chemistry 357

The Practice of Combinatorial Chemistry 359

Combinatorial Chemistry in Pharmaceutical Drug Development 360

The Future of Chemical Diversity in Drug Development 362

SECTION 3 *Antitumor Alkylating Agents* 363

OLIVER MICHAEL COLVIN

History of the Alkylating Agents 363

Chemistry and Cytotoxicity of Alkylating Agents 363

Classes of Alkylating Agents and Their Properties 363

Mechanisms of Toxicity and Drug Resistance 369

Common Toxicities 371

SECTION 4 *Cisplatin and Its Analogues* 376

STEVEN W. JOHNSON

JAMES P. STEVENSON

PETER J. O'DWYER

Platinum Chemistry 376

Evolution of Novel Platinum Complexes 377

Mechanism of Action 378

Mechanisms of Resistance 380

Clinical Pharmacology 383

SECTION 5 *Antimetabolites* 388

EDWARD CHU
AUGUSTO C. MOTA
MIKLOS C. FOGARASI

- Methotrexate 388
New Antifolates 393
Other Antifolates 393
Strategies to Permit Oral Administration of
Fluoropyrimidines 398

SECTION 6 *Topoisomerase Interactive Agents* 415

CLINTON F. STEWART
MARK J. RATAIN

- Mechanism of Action of Topoisomerase Interactive
Agents 416
Epipodophyllotoxins 418
Camptothecin Analogues 422
Anthracyclines and Related Compounds 425
Mitoxantrone and Losoxantrone 427
Dactinomycin (Actinomycin D) 428

SECTION 7 *Antimicrotubule Agents* 431

ERIC K. ROWINSKY
ANTHONY W. TOLCHER

- Microtubules 431
Microtubule-Associated Proteins and Microtubule Motors 432
Vinca Alkaloids 432
The Taxanes 437
Estramustine Phosphate 445
Novel Compounds Targeting Microtubules 447

SECTION 8 *Miscellaneous Chemotherapeutic Agents* 452

BRUCE D. CHESON
Homoharringtonine 452
Suramin 453
Bleomycin 453
L-Asparaginase 454
Amifostine 455

20

Pharmacology of Cancer Biotherapeutics 461

SECTION 1 *Interferons* 461

JOHN M. KIRKWOOD

- Rationale for Investigation of Interferons: Direct Regulation
of Cell Growth, Differentiation, Antigen Expression; Indirect
Effects Mediated through Modulation of the Host Immune
Response 461

Clinical Evaluation 464

SECTION 2	<i>Interleukin-2</i>	471
JAMES W. MIER		
MICHAEL B. ATKINS		
Isolation, Characterization, and Cloning of Interleukin-2		471
Interleukin-2 Receptor		472
Interleukin-2-Activated Signaling Pathways		472
In Vitro Effects of Interleukin-2		473
Preclinical Studies with Interleukin-2 in Tumor-Bearing Mice		473
Clinical Applications of Interleukin-2		473
Biology and Pharmacokinetics of Interleukin-2		475
Attempts to Improve Activity of Interleukin-2-Based Therapy		476

SECTION 3	<i>Hormonal Therapies</i>	478
CHARLES ERLICHMAN		
CHARLES L. LOPRINZI		
Selective Estrogen Receptor Modulators		478
Medroxyprogesterone and Megestrol		481
Aromatase Inhibitors		482
Gonadotropin-Releasing Hormone Analogues		483
Antiandrogens		484
Fluoxymesterone		485
Diethylstilbestrol and Estradiol (Estrace)		485
Octreotide		486

SECTION 4	<i>Differentiation Agents</i>	489
RAYMOND P. WARRELL, JR.		
Retinoids		489
Arsenic Trioxide		491
Histone Deacetylase Inhibitors		491
Vitamin D		493
Cytokines and Other Proteins		493

SECTION 5	<i>Therapeutic Monoclonal Antibodies: General Principles</i>	495
LOUIS M. WEINER		
GREGORY P. ADAMS		
MARGARET VON MEHREN		
Immunoglobulin Structure: Structural and Functional Domains		495
Factors Regulating Antibody-Based Tumor Targeting		495
Unconjugated Antibodies		497
Immunoconjugates		500
Therapeutic Applications		501
Future Directions		505

SECTION 6	<i>Antiangiogenesis Agents</i>	509
JUDAH FOLKMAN		
Guidelines to the Biologic Basis of Antiangiogenic Therapy		509
Clinical Trials of Angiogenesis Inhibitors		517

21

Clinical Trials in Cancer

SECTION 1 Design and Analysis of Clinical Trials 521

RICHARD SIMON

Phase I Clinical Trials 521

Phase II Clinical Trials 523

Design of Phase III Clinical Trials 526

Analysis of Phase III Clinical Trials 531

Epidemiology of Clinical Trials 537

Metaanalysis 537

521

SECTION 2 Research Data Management 539

DOUGLAS HAGEMAN

DIANNE M. REEVES

Protocol Development 539

Protocol Implementation 540

Information Technology 543

Data Classification 544

U.S. Food and Drug Administration Recommendations 544

Data Validation 544

Direct Data Capture 545

Security 545

Summary 545

PART 3

PRACTICE OF ONCOLOGY

22

Cancer Prevention: Preventing Tobacco-Related Cancers

549

HOWARD K. KOH

CHRISTINE KANNLER

ALAN C. GELLER

Tobacco and Nicotine Addiction 549

Health Effects 550

Smoking Rates and Trends 550

Cigarette Product Modification 552

Spit Tobacco 552

Cigars 552

Environmental Tobacco Smoke 552

Tobacco Industry Advertising Strategies 553

Strategies for Tobacco Control 553

Community Level and State Interventions 555

Tobacco Taxes That Fund Dedicated, Comprehensive Statewide

Tobacco Control Programs 556

Mass Media and Counter-Advertising	557
Tobacco Litigation and Tobacco Settlement	557
Proposed U.S. Food and Drug Administration Regulation	558
Conclusion	558

23

Cancer Prevention: Diet and Chemopreventive Agents. **561**

SECTION 1 Fat **561**

WALTER C. WILLETT

Fat and Breast Cancer	562
Fat and Colon Cancer	564
Fat and Prostate Cancer	565
Other Cancers	565
Summary	565

SECTION 2 Dietary Fibers **568**

PETER GREENWALD

Sources and Types of Dietary Fiber	568
Dietary Fiber and Colorectal Cancer	568
Dietary Fiber and Breast Cancer	572
Dietary Fiber and Other Cancers	573
Public Health Implications	573

SECTION 3 Retinoids, Carotenoids, and Micronutrients **575**

SUSAN TAYLOR MAYNE

SCOTT M. LIPPMAN

Historical Perspective	575
Retinoid Biology and Pharmacology	576
Carotenoid Biology and Actions	577
Clinical Trials	577
Translational and Intermediate End Point Studies in Retinoid Chemoprevention	586
New Retinoids and Carotenoids	587
Conclusions	588

SECTION 4 Naturally Occurring Dietary Anticarcinogens **590**

PETER GREENWALD

Carotenoids	590
Phytoestrogens	591
Organosulfur and Organoselenium Compounds	591
Phenolic Compounds	592
Monoterpene	593
Isothiocyanates and Indoles	593
Protease Inhibitors	594
Implications for Cancer Prevention	594

SECTION 5 *Dietary Carcinogens* 595

PETER GREENWALD

Naturally Occurring Dietary Carcinogens 596

Products of Food Preparation and Processing 597

Synthetic Carcinogens in the Diet 599

Future Research Needs 599

SECTION 6 *Aspirin and Other Nonsteroidal Antiinflammatory Drugs and the Risk of Cancer Development* 601

MICHAEL J. THUN

CHARLES H. HENNEKENS

Pharmacology and Toxicity of Nonsteroidal Antiinflammatory Drugs 601

Historical Evolution of the Hypothesis That Nonsteroidal Antiinflammatory Drugs Inhibit Cancer 602

Cellular Mediators of Tumor Inhibition 606

Nonsteroidal Antiinflammatory Drugs and Cancers Other Than Colorectal Cancer 607

Dose and Duration Issues in Chemoprevention 607

SECTION 7 *Physical Activity and Body Weight* 610

GRAHAM A. COLDITZ

Colon Cancer 610

Breast Cancer 612

Obesity 613

Relationship between Obesity and Carcinoma 614

Conclusions 614

24

Cancer Prevention: Role of Surgery in Cancer Prevention. 617

RICHARD M. SHERRY

Multiple Endocrine Neoplasia 2 and Familial Medullary

Thyroid Carcinoma 617

Barrett's Esophagus and Esophageal Cancer 618

Breast Cancer 620

Ovarian Cancer 621

Colorectal Cancer 622

Testicular Cancer and Cryptorchidism 624

25

Cancer Screening 627

BARBARA K. RIMER

JOELLEN SCHILDKRAUT

ROBERT A. HIATT

What Is Cancer Screening? 627

Evaluation of a Screening Test 628

Breast Cancer Screening 629

Cervical Cancer Screening	634
Skin Cancer Screening	634
Prostate Cancer Screening	634
Colorectal Cancer Screening	635
Lung Cancer Screening	637
The Future of Screening	637

26

<i>Cancer Diagnosis: Molecular Pathology</i>	641
--	-----

JOSÉ COSTA
CARLOS CORDON-CARDO

Role of Molecular Pathology in Clinical Oncology and Translational Research	641
Use of Human Tissue Samples for Molecular Analyses	642
Overview of the Technological Approaches to Molecular Diagnostics	643
Applications of Molecular Markers: Diagnostic Molecular Pathology	651
Considerations for the Future	655

27

<i>Cancer Diagnosis: Imaging</i>	659
----------------------------------	-----

SECTION 1 Computed Tomography 659

ELLIOT K. FISHMAN
BRUCE A. URBAN

Liver	659
Pancreas	660
Kidney	661
Adrenal Gland	662
Small Bowel and Colon	663
Esophagus and Stomach	665
Lungs and Mediastinum	665
Musculoskeletal System	668
Central Nervous System	668
Summary	668

SECTION 2 Magnetic Resonance Imaging 669

ARTHUR E. LI
DAVID A. BLUERMKE

Basic Principles	669
Brain	671
Spine	672
Head and Neck	672
Breast	673
Liver	673
Adrenal Glands	674
Kidney	675
Uterus	675
Cervix	675
Ovary	676

Prostate	676
Bladder	677
Musculoskeletal System	677

SECTION 3 *Functional and Metabolic Imaging* 679

MARTIN G. POMPER	
Techniques for Functional and Metabolic Imaging	679
New Functional and Metabolic Imaging Modalities	687
Summary	687

SECTION 4 *Interventional Radiology* 690

JEAN-FRANCOIS H. GESCHWIND	
Diagnostic Procedures	690
Therapeutic Interventions	692

SECTION 5 *Ultrasound* 708

ULRIKE M. HAMPER	
Ultrasonography Applications	708
Urologic Oncology	708
Gynecologic Oncology	709
Medical Oncology	710
Ultrasonographically Guided Interventional Procedures	712
Summary	713

SECTION 6 *Radionuclide Imaging* 714

E. EDMUND KIM	
Indirect Radionuclide Tumor Imaging	714
Direct Radionuclide Tumor Imaging	716

28

<i>Cancer Diagnosis: Endoscopy</i>	721
ROBERT C. KURTZ	
ROBERT J. GINSBERG	
Upper Gastrointestinal Endoscopy	721
Endoscopic Ultrasonography	722
Sigmoidoscopy	724
Colonoscopy	725
Laparoscopy	726
Endoscopic Retrograde Cholangiopancreatography	727
Small Intestinal Endoscopy: Enteroscopy	729
Percutaneous Endoscopic Gastrostomy	729
Bronchoscopy	729
Mediastinoscopy	733
Thoracoscopy	734

29*Specialized Techniques in Cancer Management* **739****SECTION 1 Laparoscopy 739**

ALAN T. LEFOR

Laparoscopic Physiology 740

Port-Site Metastases 741

Laparoscopy in the Diagnosis of Malignancy 742

Laparoscopy in the Staging of Malignancy 743

Laparoscopy in the Treatment of Malignancy 750

Laparoscopy in the Palliation of Malignancy 756

The Future of Laparoscopy in the Care of the Patient

with Cancer 757

**SECTION 2 Vascular Access and Specialized Techniques
of Drug Delivery 760**

STEVEN K. LIBUTTI

MCDONALD K. HORNE III

Catheter Types 760

Insertion Technique 762

Selecting the Appropriate Catheter 764

Catheter-Related Complications 765

SECTION 3 Isolation Perfusion 769

H. RICHARD ALEXANDER

Principles of Isolation Perfusion 769

Results of Isolation Perfusion 771

Conclusions 775

SECTION 4 Intensity-Modulated Radiation Therapy 777

C. CLIFTON LING

CHEN CHUI

THOMAS LOSASSO

CHANDRA BURMAN

MARGIE HUNT

GIGAS MAGERAS

HOWARD IRA AMOLS

MICHAEL J. ZELEFSKY

ZVI Y. FUKS

SECTION 1 Molecular Biology of Gynecologic Cancers 1519

SETSUKO KUKI CHAMBERS	
Endometrial Cancer 1519	
Ovarian Cancer 1520	
Cervical and Vulvar Cancer 1522	

SECTION 2 Cancer of the Cervix, Vagina, and Vulva 1526

PATRICIA J. EIFEL	
JONATHAN S. BEREK	
JAMES T. THIGPEN	
Carcinoma of the Cervix 1526	
Carcinoma of the Cervical Stump 1549	
Carcinoma of the Vagina 1550	
Carcinoma of the Vulva 1556	

SECTION 3 Cancers of the Uterine Body 1573

THOMAS W. BURKE	
PATRICIA J. EIFEL	
FRANCO M. MUGGIA	
Endometrial Carcinoma 1573	
Uterine Sarcomas 1586	

SECTION 4 Gestational Trophoblastic Diseases 1594

FRANCO M. MUGGIA	
PATRICIA J. EIFEL	
THOMAS W. BURKE	
Epidemiology 1594	
Pathology and Biology 1594	

Clinical Diagnosis and Human Chorionic Gonadotropin	1594
Choriocarcinoma	1595

SECTION 5 *Ovarian Cancer, Fallopian Tube Carcinoma, and Peritoneal Carcinoma* 1597

ROBERT F. OZOLS
PETER E. SCHWARTZ
PATRICIA J. EIFEL

Ovarian Cancer	1597
Borderline Tumors	1624
Sex Cord–Stromal Tumors	1624
Extraovarian Peritoneal Carcinoma	1625
Germ Cell Tumors of the Ovary	1626
Nondysgerminomatous Germ Cell Tumors	1627
Fallopian Tube Cancer	1628

37

Cancer of the Breast. **1633**

SECTION 1 *Molecular Biology of Breast Cancer* 1633

ROBERT B. DICKSON
MARC E. LIPPMAN

Genetics	1633
Steroid and Growth Factor Pathways of Cellular Regulation	1635
The Cell Cycle and Cell Death	1641
Process of Malignant Progression	1643
Implications of Molecular Biology for Tumor Prevention, Early Detection, Prognosis, and Response to Therapy	1645

SECTION 2 *Malignant Tumors of the Breast* 1651

ERIC P. WINER
MONICA MORROW
C. KENT OSBORNE
JAY R. HARRIS

Risk Factors for Breast Cancer	1652
Management of the High-Risk Patient	1655
Breast Cancer Prevention	1656
Biopsy Techniques for Suspicious Breast Lesions	1657
Ductal Carcinoma <i>In Situ</i>	1659
Lobular Carcinoma <i>In Situ</i>	1663
Staging of Breast Cancer	1664
Local Management of Invasive Breast Cancer	1667
Local Recurrence	1680
Breast Reconstruction	1682
Special Therapeutic Problems	1683
Prognostic and Predictive Factors	1687
Adjuvant Drug (Systemic) Therapy	1688
Adjuvant Chemotherapy	1692
Therapy of Locally Advanced and Inflammatory Breast Cancer	1697
Follow-Up after Primary Treatment	1698
Management of Patients with Metastatic Breast Cancer	1699

SECTION 3	<i>Rehabilitation after Treatment for Cancer of the Breast</i>	1717
	JOSEPH J. DISA	
	JEANNE A. PETREK	
	Delayed versus Immediate Reconstruction	1717
	Prosthetic Reconstruction	1718
	Autologous Tissue Reconstruction	1719
	Postmastectomy after Breast Irradiation	1721
	Skin-Sparing Mastectomy with Immediate Reconstruction	1721
	Lymphedema	1722

38

Cancer of the Endocrine System 1727

SECTION 1	<i>Molecular Biology of Endocrine Tumors</i>	1727
------------------	---	-------------

TERRY C. LAIRMORE	
SAMUEL A. WELLS, JR.	
JEFFREY F. MOLEY	
Multiple Endocrine Neoplasia Syndromes	1727
Molecular Pathogenesis of Sporadic Thyroid Neoplasms	1733
Genetic Abnormalities in Parathyroid Neoplasms	1735
Other Genetic Loci Implicated in Familial Hypercalcemic Syndromes	1736
Parathyroid Carcinoma	1737
Genetic Abnormalities in Adrenal Neoplasms	1737
Summary	1737

SECTION 2	<i>Thyroid Tumors</i>	1740
------------------	------------------------------	-------------

DOUGLAS L. FRAKER	
MONICA SKARULIS	
VIRGINIA LIVOLSI	
Thyroid Nodules	1741
Well-Differentiated Thyroid Carcinoma	1742
Anaplastic Thyroid Cancer	1755
Medullary Thyroid Cancer	1756
Thyroid Lymphoma	1759
Secondary Thyroid Malignancy	1759

SECTION 3	<i>Parathyroid Tumors</i>	1763
------------------	----------------------------------	-------------

DOUGLAS L. FRAKER	
Primary Hyperparathyroidism	1763

SECTION 4	<i>Adrenal Tumors</i>	1770
------------------	------------------------------	-------------

JEFFREY A. NORTON	
HOP N. LE	
Pathology of the Adrenal Cortex	1770
Adrenal Cortical Adenoma	1770
Adrenal Cortical Carcinoma	1770
Clinical Presentations of Adrenal Cortical Neoplasms	1771
Treatment of Adrenal Cortical Neoplasms	1777

Ectopic Adrenocorticotrophic Hormone Syndrome	1780	
Pheochromocytoma	1780	
SECTION 5	Pancreatic Endocrine Tumors	1788
H. RICHARD ALEXANDER		
ROBERT T. JENSEN		
Introduction	1788	
Pathogenesis, Pathologic Features, and Tumor Biology	1788	
Clinical Presentation and Diagnosis	1792	
Imaging and Localization of Pancreatic Endocrine Tumors	1796	
Treatment of Resectable Disease	1798	
Treatment of Metastatic Disease	1806	

SECTION 6	Carcinoid Tumors and the Carcinoid Syndrome	1813
ROBERT T. JENSEN		
GERARD M. DOHERTY		
Pathology and Tumor Histology	1813	
Molecular Pathogenesis	1816	
Clinical Features	1816	
Carcinoid Syndrome	1817	
Treatment of the Carcinoid Tumor	1826	

SECTION 7	Multiple Endocrine Neoplasias	1834
GERARD M. DOHERTY		
ROBERT T. JENSEN		
Multiple Endocrine Neoplasia Type 1	1834	
Familial Medullary Thyroid Carcinoma and Multiple Endocrine Neoplasia Types 2A and 2B	1836	

39

Sarcomas of the Soft Tissue and Bone **1841**

SECTION 1	Soft Tissue Sarcoma	1841
MURRAY F. BRENNAN		
KALED M. ALEKTIAR		
ROBERT G. MAKI		
Incidence	1841	
Etiology and Genetics	1841	
Distribution	1843	
Pathologic Classification	1844	
Grading of Sarcoma	1847	
Differential Diagnosis	1848	
Clinicopathologic Features of Specific Types of Benign and Malignant Soft Tissue Tumors	1848	
Clinical Presentation	1855	
Differential Diagnosis	1856	
Management of Extremity and Superficial Truncal Soft Tissue Sarcoma	1860	
Radiation Therapy	1861	
Special Considerations	1864	

Definitive Radiation	1865
Adjuvant Chemotherapy	1865
Preoperative Chemotherapy	1870
Intraarterial Chemotherapy	1870
Hyperthermia and Limb Perfusion	1871
Special Features of the Management of Sarcomas of Nonextremity Sites	1871
Management of Head and Neck Sarcoma	1873
Management of Breast Sarcoma	1873
Serious Complications of Primary Treatment	1874
Prognostic Factors for Outcome	1874
Quality of Life and Functional Outcome	1875
Treatment of Local Recurrence	1875
Management of Advanced Disease	1876
Systemic Therapy for Advanced Disease	1876
Response by Histologic Subtype and Site	1880
Recommendations for Patients with Advanced Disease	1883
Future Directions	1883

SECTION 2 Sarcomas of Bone 1891

MARTIN M. MALAWER
MICHAEL P. LINK
SARAH S. DONALDSON

Classification and Types of Bone Tumors	1891
Radiographic Evaluation and Diagnosis	1892
Natural History	1893
Staging Bone Tumors	1894
Preoperative Evaluation	1895
Biopsy Technique and Timing	1896
Restaging after Preoperative Chemotherapy	1896
Surgical Management of Skeletal Tumors	1898
Principles and Techniques of Limb-Sparing Surgery	1898
Amputations	1900

Summary	2507

47

<i>Paraneoplastic Syndromes</i>	2511
SUSANNE M. ARNOLD	
ROY PATCHELL	
ANDREW M. LOWY	
KENNETH A. FOON	
Endocrinologic Manifestations of Cancer	2511
Hematologic Manifestations of Cancer	2516
Gastrointestinal Manifestations of Cancer	2518
Renal Manifestations of Nonrenal Cancer	2520
Cutaneous Paraneoplastic Syndromes	2521
Neurologic Manifestations of Cancer	2525
Miscellaneous Paraneoplastic Syndromes	2531

48

<i>Cancer of Unknown Primary Site</i>	2537
FRANK A. GRECO	
JOHN D. HAINSWORTH	
Poorly Differentiated Neoplasms of Unknown Primary Site	2538
Adenocarcinoma of Unknown Primary Site	2540
Squamous Carcinoma of Unknown Primary Site	2545
Poorly Differentiated Carcinoma (with or without Features of Adenocarcinoma) of Unknown Primary Site	2546
Neuroendocrine Carcinoma of Unknown Primary Site	2552
Special Issues	2554
Conclusion: Future Trends	2556

49

<i>Peritoneal Carcinomatosis</i>	2561
DAVID L. BARTLETT	
Pathophysiology	2561
Diagnosis	2562
Histologic Subtypes	2563
Treatment	2567

50

<i>Immunosuppression-Related Malignancies</i>	2575
SECTION 1 AIDS-Related Malignancies	2575
ROBERT YARCHOAN	
RICHARD F. LITTLE	
Kaposi's Sarcoma	2576
Acquired Immunodeficiency Syndrome-Associated Lymphomas	2581
Primary Central Nervous System Lymphoma in Acquired Immunodeficiency Syndrome	2587
Effect of Antiretroviral Therapy on Primary Central Nervous System Lymphoma Incidence	2588
Hodgkin's Disease	2588
Anogenital Cancers in Human Immunodeficiency Virus Infection	2589
Future Directions	2591

SECTION 2 Transplantation-Related Malignancies	2597
STANLEY R. RIDDELL	
Immune Surveillance and Tumor Development	2597
Hematopoietic Stem Cell Transplant Recipients	2597
Organ Transplant Recipients	2602

51

<i>Oncologic Emergencies</i>	2609
SECTION 1	<i>Superior Vena Cava Syndrome</i> 2609
	JOACHIM YAHALOM
	<i>Anatomy and Pathophysiology</i> 2609
	<i>Etiology and Natural History</i> 2609
	<i>Diagnostic Procedures</i> 2611
	<i>Management</i> 2612
	<i>Treatment</i> 2613
	<i>Recommendations</i> 2615
SECTION 2	<i>Spinal Cord Compression</i> 2617
	BRIAN G. FULLER
	JOHN D. HEISS
	EDWARD H. OLDFIELD
	<i>Epidemiology</i> 2617
	<i>Pathophysiology</i> 2617
	<i>Clinical Presentation</i> 2622
	<i>Diagnostic Evaluation</i> 2623
	<i>Treatment</i> 2624
	<i>Pediatric Spinal Cord Compression</i> 2630
	<i>Conclusion</i> 2630
SECTION 3	<i>Metabolic Emergencies</i> 2633
	RAYMOND P. WARRELL, JR.
	<i>Hypercalcemia</i> 2633
	<i>Treatment of Cancer-Related Hypercalcemia</i> 2635
	<i>General Approach to Treatment of Hypercalcemia</i> 2638
	<i>Hyperuricemia</i> 2639
	<i>Tumor Lysis Syndrome</i> 2640
	<i>Lactic Acidosis</i> 2640
	<i>Hypoglycemia</i> 2641
	<i>Adrenal Failure</i> 2642
SECTION 4	<i>Urologic Emergencies</i> 2645
	McCLELLAN M. WALTHER
	<i>Urinary Tract Infection</i> 2645
	<i>Cystitis</i> 2645
	<i>Bladder Hemorrhage</i> 2648
	<i>Urinary Obstruction</i> 2649
	<i>Priapism</i> 2650
	<i>Paraphimosis</i> 2651

52**Treatment of Metastatic Cancer 2655****SECTION 1 Metastatic Brain Cancer 2655**

PATRICK Y. WEN
PETER MCLAREN BLACK
JAY S. LOEFFLER

- Incidence and Epidemiology 2655
Method of Spread and Distribution 2655
Clinical Manifestations 2656
Diagnosis 2656
Brain Metastases without a Known Primary Tumor 2657
Management 2657
Prognosis 2667

SECTION 2 Metastatic Cancer to the Lung 2670

JOE B. PUTNAM, JR.

- Historical Perspective 2670
Identification of Pulmonary Metastases 2670
Selection of Patients for Surgery 2672
Preparation of the Patient for Metastasectomy 2673
Surgical Incisions 2673
Resection of Pulmonary Metastases 2674
Survival Analysis 2674
Results of Resection of Sarcomatous Pulmonary Metastases 2675
Colorectal Neoplasms 2677
Breast Carcinoma 2678
Testicular Neoplasms 2679
Gynecologic Neoplasms 2679
Renal Cell Carcinoma 2680
Melanoma 2680
Squamous Cell Carcinoma 2680
Wilms' Tumor 2680
Metastasis or Primary Bronchogenic Carcinoma? 2681
Recurrent Pulmonary Metastases 2681
Extended Resection of Pulmonary Metastases 2681
Prognostic Indicators 2683
Resectability 2685
Multivariate Analysis of Prognostic Indicators 2686
Novel Treatment Strategies 2686

SECTION 3 Metastatic Cancer to the Liver 2690

H. RICHARD ALEXANDER
CARMEN J. ALLEGRA
THEODORE S. LAWRENCE

- Natural History of Liver Metastases 2690
Imaging of Hepatic Metastases 2691
Resection of Hepatic Metastases 2692
Infusional Therapy for Hepatic Metastases 2697

Local Ablative Therapy	2702
Conclusions	2709

SECTION 4 *Metastatic Cancer to the Bone* 2713

HOLLY K. BROWN	
JOHN H. HEALEY	
Presentation	2713
Pathogenesis	2714
Diagnostic Evaluation	2714
Treatment Goals	2715
Imaging of Bone Lesions	2716
Therapeutic Modalities	2717
Specific Anatomic Sites	2724

SECTION 5 *Malignant Pleural and Pericardial Effusions* 2729

DAVID S. SCHRUMP	
DAO M. NGUYEN	
Malignant Pleural Effusion	2729
Malignant Pericardial Effusion	2736

SECTION 6 *Malignant Ascites* 2745

FRANCESCO M. MARINCOLA	
DOUGLAS J. SCHWARTZENTRUBER	
Diagnosis and Workup	2745
Treatment of Malignant Ascites	2746

53*Hematopoietic Therapy* 2753**SECTION 1** *Transfusion Therapy* 2753

PETER L. PERROTTA	
EDWARD L. SNYDER	
Blood Component Therapy	2754
Transfusion Reactions and Complications	2759
Transfusion-Transmitted Disease	2762
Use of Special Blood Products in Oncology	
Patients	2763
Apheresis	2764
Conclusions	2765

SECTION 2 *Autologous Stem Cell Transplantation* 2767

DENNIS L. COOPER	
STUART SEROPIAN	
History	2767
Stem Cell Mobilization	2768
Inadequate Mobilization of Stem Cells	2770
Tumor Contamination	2771
Practical Considerations for the Potential High-Dose Therapy	
and Autologous Stem Cell Rescue Patient	2772

High-Dose Therapy Regimens: New Directions	2773
Late Toxicity: Myelodysplasia	2775
Future Directions	2775

SECTION 3 Allogeneic Stem Cell Transplantation	2779
RICHARD W. CHILDS	
Historical Perspective	2779
Allogeneic Hematopoietic Stem Cell Transplantation for Hematologic Malignancies	2779
Allogeneic Hematopoietic Stem Cell Transplantation for Nonmalignant Disorders	2779
Preparative Regimens	2780
Graft-versus-Leukemia Effect	2780
Mechanisms	2782
Complications of Allogeneic Hematopoietic Stem Cell Transplantation	2782
Sources of Allogeneic Hematopoietic Stem Cells	2786
Nonmyeloablative Allogeneic Stem Cell Transplantation	2788
Results of Conventional Allogeneic Transplantation for Hematologic Malignancies	2791
Future Prospects	2792

SECTION 4 Hematopoietic Growth Factors	2798
JAMES D. GRIFFIN	
Overview of Hematopoietic Growth Factors	2798
Biologic Features of the Major Hematopoietic Growth Factors in Clinical Use	2800
Clinical Applications of Hematopoietic Growth Factors in Cancer Therapy	2802
Long-Term Effects of Growth Factor Administration	2809
Conclusions	2809

54

<i>Infections in the Cancer Patient</i>	2815
BRAHM H. SEGAL	
THOMAS J. WALSH	
STEVEN M. HOLLAND	
Factors Predisposing to Infection in Patients with Cancer	2815
Bacterial Pathogens in Cancer Patients	2820
Fungal Infections	2825
Viral Infections	2833
Parasitic Infections	2839
Evaluation and Management of Febrile Neutropenia	2841
Manifestations and Therapy of Infections	2848
Immune Augmentation Strategies	2858

55

<i>Adverse Effects of Treatment</i>	2869
SECTION 1 Nausea and Vomiting 2869	
ANN M. BERGER	
REBECCA A. CLARK-SNOW	
<i>Nature of the Problem</i> 2869	
<i>Pathophysiology of Nausea and Vomiting</i> 2869	
<i>Emetic Syndromes</i> 2871	
<i>Control of Emesis and Patient Characteristics</i> 2872	
<i>Antiemetic Agents</i> 2873	
<i>Delayed Emesis</i> 2875	
<i>Anticipatory Nausea and Vomiting</i> 2875	
<i>Radiation-Induced Nausea and Vomiting</i> 2876	
<i>Nausea and Vomiting Secondary to Comorbid Conditions</i> 2877	
<i>Cost and Benefit of Antiemetic Therapy</i> 2877	
SECTION 2 Oral Complications 2881	
ANN M. BERGER	
THOMAS J. KILROY	
<i>Direct Stomatotoxicity</i> 2881	
<i>Pathophysiology of Mucositis</i> 2882	
<i>Risk Factors</i> 2882	
<i>Assessment of the Oral Mucosa</i> 2883	
<i>Remedies for the Prevention and Treatment of Mucositis</i> 2883	
<i>Oral Complications in Radiotherapy</i> 2889	
<i>Conclusion</i> 2892	
SECTION 3 Pulmonary Toxicity 2894	
DIANE E. STOVER	
ROBERT J. KANER	
<i>Radiation-Induced Pulmonary Toxicity</i> 2894	
<i>Radiation-Related Bronchiolitis Obliterans with Organizing Pneumonia</i> 2896	
<i>Chemotherapy-Induced Pulmonary Toxicity</i> 2897	
SECTION 4 Cardiac Toxicity 2904	
LAUREL J. STEINHERZ	
JOACHIM YAHALOM	
<i>Chemotherapy</i> 2904	
<i>Radiation-Induced Heart Disease</i> 2912	
<i>Conclusion</i> 2916	
SECTION 5 Hair Loss 2922	
CLAUDIA A. SEIPP	
<i>Head Covering</i> 2922	
<i>Prevention of Alopecia</i> 2923	

SECTION 6	<i>Gonadal Dysfunction</i>	2923
MARVIN L. MEISTRICH		
RENA VASSILOPOULOU-SELLIN		
LARRY I. LIPSHULTZ		
Effects of Cytotoxic Agents on Adult Men 2924		
Effects of Cytotoxic Agents on Adult Women 2926		
Effects of Cytotoxic Agents on Children 2930		
Gonadal Dysfunction after Cranial Irradiation 2930		
Preservation of Fertility, Hormone Levels, and Sexual Function 2931		
Genetic Concerns 2934		
Counseling 2935		

SECTION 7	<i>Second Cancers</i>	2939
FLORA E. VAN LEEUWEN		
LOIS B. TRAVIS		
Methods to Assess Second Cancer Risk 2940		
Carcinogenicity of Individual Treatment Modalities 2941		
Risk of Second Malignancy in Patients with Selected Primary Cancers 2944		
Conclusion 2960		

SECTION 8	<i>Miscellaneous Toxicities</i>	2964
RAYMOND B. WEISS		
Neurotoxicity 2964		
Nephrotoxicity 2968		
Hepatotoxicity 2970		
Hypersensitivity Reactions 2972		
Vascular Toxicity 2973		

56

Supportive Care and Quality of Life **2977**

SECTION 1	<i>Management of Cancer Pain</i>	2977
KATHLEEN M. FOLEY		
Epidemiology 2977		
Definition and Types of Cancer Pain 2979		
Types of Pain 2980		
Temporal Aspects of Pain 2980		
Intensity of Pain 2981		
Measurement of Pain 2981		
Classification of Patients with Cancer Pain 2984		
Group I: Acute Cancer-Related Pain 2984		
Group II: Chronic Cancer-Related Pain 2984		
Group III: Preexisting Chronic Pain and Cancer-Related Pain 2985		
Group IV: Patients with a History of Drug Addiction and Pain 2985		
Group V: Dying Patients with Pain 2986		
Common Pain Syndromes 2986		
Clinical Assessment of Pain 2986		
Management of Cancer Pain 2989		

Analgesic Drug Therapy	2990
Classes of Drugs	2991
Principles of Opioid Drug Therapy	2994
Psychological Approaches	3001
Anesthetic and Neurosurgical Approaches	3002
Neurosurgical Approaches	3004
Psychiatric Approaches	3007
Sedation in the Imminently Dying	3007
Algorithm for Cancer Pain Management	3009
Future Directions	3009

SECTION 2 *Nutritional Support* 3012

J. STANLEY SMITH
WILEY W. SOUBA

Clinical Manifestations of Cancer Cachexia	3012
Causes and Consequences of Cancer Cachexia	3013
Nutritional Support of the Cancer Patient	3017
Techniques of Providing Nutritional Support	3028
Nutrition Support for Cancer Patients and Health Care Reform	3030

SECTION 3 *Sexual Problems* 3032

PATRICIA A. GANZ
MARK S. LITWIN
BETH E. MEYEROWITZ

Sexual Health and Physiology	3032
Sexual Problems and Their Prevalence among the General Population	3034
Impact of Cancer and Its Treatment on Sexual Health	3035
Sexual Problems Associated with Specific Cancers	3040
Strategies for Assessment and Intervention	3044
Conclusions	3046

SECTION 4 *Genetic Counseling* 3049

ELLEN T. MATLOFF
ALLEN E. BALE

Who Is a Candidate for Cancer Genetic Counseling?	3050
Components of the Cancer Genetic Counseling Session	3051
Issues in Cancer Genetic Counseling	3054
Future Directions	3056

SECTION 5 *Psychological Issues* 3058

MARY JANE MASSIE
LISA CHERTKOV
ANDREW J. ROTH

Psychiatric Disorders in Cancer Patients	3058
Psychiatric Symptoms in Cancer Patients with Pain	3063
Unconventional Cancer Treatments	3063
Psychotherapeutic Interventions with Cancer Patients	3064
Survivor Issues	3064

SECTION 6	<i>Community Resources</i>	3066
BONNIE A. INDECK		
PHYLLIS M. SMITH		
Initial Diagnosis of Cancer	3066	
Social Support Network	3066	
Emotional Support	3066	
Informational Support	3068	
Internet	3068	
Computer Groups	3069	
Instrumental Support	3069	
Trends Affecting Demand for Community Services	3071	
Survivorship	3072	
Appendix: Common Resources	3072	
Emotional Support	3074	
Financial Assistance	3074	
Home Health Care	3075	

SECTION 7 *Specialized Care of the Terminally Ill* 3077

FREDERICK A. FLATOW	
SCOTT LONG	
Overview of Hospice Care	3077
Symptom Management	3079
Conclusion	3086

57

Rehabilitation of the Cancer Patient **3089**

LYNN GERBER	
JEANNE HICKS	
JAY SHAH	
Cancer Rehabilitation Team	3090
Functional Assessment	3091
Common Functional Impairments in Oncology	3091
Tumor-Associated Myopathy	3093
Bone Replacement by Tumor	3094
Neuropathies and Plexopathies	3097
Lymphedema and Deep Venous Thrombosis	3098
Bowel and Bladder Disorders	3099
Psychosocial Aspects of Cancer Rehabilitation	3100
Rehabilitation and Management of Specific Tumors	3100
Conclusion	3109

58

Advanced Practice Nurses and Physician Assistants in Oncology Care **3111**

M. TISH KNOBF	
SUSAN ANDERSON	
Physician Assistants	3111
Advanced Practice in Oncology Nursing	3112

59

<i>Ethical Issues in Oncology and Clinical Trials.</i>	3119
CHRISTOPHER DAUGHERTY	
MARK SIEGLER	
Ethical Issues in Cancer Clinical Care	3119
Ethical Issues in Cancer Clinical Trials	3126
Conclusions	3131

60

<i>Information Systems in Oncology</i>	3135
SUSAN MOLLOY HUBBARD	
National Cancer Institute's Information Services	3140
Conclusion	3146

61

<i>Complementary, Alternative, and Unproven Methods of Cancer Treatment</i>	3147
JEFFREY D. WHITE	
Definitions	3147
Phenomenology of Complementary and Alternative Medicine in Cancer	3147
Reasons for Cancer Patient Use of Complementary and Alternative Medicine Modalities	3148
Complementary and Alternative Medicine Therapies	3150
Supportive Care (Complementary Medicine)	3153
Complementary and Alternative Medicine Cancer Research	3154
Practical Issues in the Interface of Oncology and Complementary and Alternative Medicine	3154

PART 4**NEWER APPROACHES IN CANCER TREATMENT****62**

<i>Genetic Therapy</i>	3161
SECTION 1 Gene Therapy	3161
PATRICK HWU	
Methods of Gene Transfer	3161
Gene Marking Studies	3167
Genetic Modification of the Immune Response	3168
Modification of Tumors with Genes That Have Direct Antitumor Effects	3173

Selective Replication of Virus in Tumors	3175
Introduction of Genes into Hematopoietic Stem Cells to Decrease Toxicity from Chemotherapy	3175
Antiangiogenic Gene Therapy	3176

SECTION 2 Molecular Therapy 3180

ALBERT B. DEISSEROTH	
AMANDA PSYRRI	
DAVID J. AUSTIN	
Strategies of New Drug Design	3181
Approaches to Drug Design	3182
Summary and Future Directions	3187

63**Cancer Vaccines 3189****SECTION 1 Preventive Cancer Vaccines 3189**

DOUGLAS R. LOWY	
JOHN T. SCHILLER	
Infectious Agents and Cancer	3189
Prophylactic Versus Therapeutic Vaccination	3191
Hepatitis B Virus	3192
Human Papillomavirus	3193

SECTION 2 Therapeutic Cancer Vaccines 3195

NICHOLAS P. RESTIFO	
MARIO SZNOL	
WILLEM W. OVERWIJK	
Immune Mechanisms Underlying Vaccine Function	3196
Monitoring of Cancer Vaccine Trials	3198
Anticancer Vaccine Approaches Derived from Autologous and Allogeneic Tumor Cells	3199
Approaches Using Recombinant and Synthetic Anticancer Vaccines	3201
Enhancing Vaccine-Induced Immune Responses	3210
Future Challenges: Tumor Escape from Immune Recognition	3211
Conclusion	3212

64**Image-Guided Surgery. 3219**

NICK BRYAN
STEVEN K. LIBUTTI

Medical Imaging Techniques	3219
Image Guidance	3221
Specific Applications of Image-Guided Surgery	3222
Conclusions	3226

65

<i>Proton Beam Radiation Therapy</i>	3229
IRA J. SPIRO	
ALFRED R. SMITH	
ANTHONY LOMAX	
JAY S. LOEFFLER	
Physical Aspects of Protons 3229	
Proton Beam Radiation Treatment: Historical Note 3230	
Clinical Results 3230	
Design of Clinical Trials Using Proton Beams 3233	
Conclusions and Future Directions 3234
