Purpose of the Book	5
A Basic Model of Business and the Ecosystem	5
The Earth Is a Small Planet	8
The Need for New Economic Models	13
Influencing Strategic Decision Makers	16
Plan of the Book	18
2. The Issue Wheel	20
Population and the Growth Mentality at the Hub	22
Resource Depletion and Pollution Radiating From the Hub	26
The Wheel of Misfortune	33
Conclusions	41
3. Management Happens on Earth	42
The Earth Is a Living System	43

Gaia Theory: A Metaphor for Future Survival	48
Thermodynamics and Economic Activity	52
Industrial Metabolism	56
Conclusions	57
Part II: Frameworks for a Small Planet	59
4. Searching for Enoughness	61
The Biophysical and Socioeconomic Dimensions of Sustainability	62
The Moral Dimensions of Sustainability	71
Conclusions	80
5. We Are How We Think	82
Perceptions, Values, and Strategic Decision Making	84
Valuing the Commons in Strategic Decisions	93
Thinking in Circles	95
Conclusions	101
6. Economics As If the Planet Mattered	103
Current Economic Assumptions: Shoes That Don't Fit	104
Why Don't the Shoes Fit? Misplaced Concreteness	111
New Economic Models	116
Conclusions	126
7. Values for a Small Planet	128
The Manager's Divergent Dilemma	129
Sustainability: The Transcendent Core Value	130
Instrumental Values for a Small Planet	131
Conclusions	146
Part III: Managing on a Small Planet	147
8. Nature's Stake in Organizations	149
Stakeholder Management: Attending to the Strands in the Web	150
Earth: The Ultimate Stakeholder	151
The Green Stakeholders	152
Conclusions	177

9. Strategic Management for a Small Planet	179
Ecocentric Management: A Philosophy of Sustainability	181
Enterprise Strategy: Standing for Sustainability	183
Sustainability Strategies: Fulfilling Green Visions	185
Industrial Ecosystems: Aligning Production With Nature	191
Learning Organizations: Structures for Sustainability	194
Fundamental Change: Creating Sustainability Cultures	197
Conclusions	200
10. Creating Environmental Management Systems	201
Environmental Management Systems: Closing the Value Chain	201
Life-Cycle Analysis: Foundation for Cradle-to-Grave Management	204
Process-Driven Sustainability Strategies: Preventing Pollution Before It Happens	206
Market-Driven Sustainability Strategies: Differentiation Through Product Stewardship	217
Supporting the Closed-Loop Value Chain	226
Seeking Sustainability Beyond the Closed-Loop Value Chain	231
Conclusions	233
11. Changing the Myth	234
Myths, Archetypes, and Paradigms: Spiritual Guides From the Unconscious	239
Toward the "Society of the Planet"	240
References	244
