### **The Geologic Hazards of Living on Earth 1**

---

**Geohazards—Natural 1**

**Geohazards—Human 3**

**Population and Pollution 3**

**Population Growth Strains Earth's Resources 4**

**The Urban Concentration Factor 4**

**Expansion of Populations into Hazardous Areas 5**

**Hazard Management 6**

Accepting Hazard Losses | Restrictive Zoning | Engineering  
Solutions | Hazard Warning and Evacuation | Abandonment  
and Public Use of Hazardous Areas

**Some Environmental Principles 10**

Earth Is a Closed System | Throwing the Trash over the Fence:  
Displaced Problems | Recurrence Interval: It Hasn't Happened  
in Years, So . . . | Disturbing Dynamic Equilibrium

**Looking Ahead, 13 | Summary, 13 | Key Terms, 14 |  
Review Questions, 14 | Further Readings, 14**

## 2

---

### Earth's Interior 17

---

**Matter 18**

**Nuclear Reactions 19**

**Heat Energy and its Movement**

**Inside and Outside Earth 20**

Conduction | Convection | Radiation

**Chemical Reactions and Compounds 21**

**Minerals 22**

**Rocks 24**

Igneous Rocks | Sedimentary Rocks | Metamorphic Rocks

**Reactions of Rocks to Stress 29**

Strain | Relationship Between Stress and Strain | Strength

**Rock Structures 33**

Pore Spaces in Rocks | Solution Cavities in Rocks | Joints in Rocks | Faults in Rocks

**Internal Structure of Earth—**

**Core, Mantle, Crust 36**

**Plate Tectonics—How Continents "Drift" 38**

Plate Tectonics Theory | Ocean Basins and Seafloor Spreading | Earth's Lithospheric Plates | Divergent Margins | Convergent Margins | Transform Margins

**Plate Tectonics and other Earth Cycles 42**

**Looking Ahead, 43 | Summary, 44 | Key Terms, 45 | Review Questions, 46 | Further Readings, 46**

## 3

---

### Earth's Surface 49

---

**Earth's External Energy System 49**

**The Hydrologic Cycle 51**

Humans and the Hydrologic Cycle | Evaporation, Infiltration, and Runoff | Groundwater

**Weathering 52**

Physical Weathering | Chemical Weathering | Products of Weathering and Their Significance

**Erosion 56**

**Sediments 56**

Composition | Size | Kinetic Energy and Viscosity | Sorting | Roundness | Color

**Streams 60**

Stream Energy at Work | Stream Sediment Transport and Deposition | Stream Channels | Floodplains and Levees | Deltas

**Glaciers 64**

Growth and Movement of Glaciers | Glacier Types | Glacial Erosion and Transport | Glacial Deposition | Moraines

**Wind 68**

Wind Erosion | Wind Deposition

**Surface Processes and People 70**

**Looking Ahead, 71 | Summary, 71 | Key Terms, 72 | Review Questions, 73 | Further Readings, 73**

## 4

### Volcanic Hazards 75

---

**Volcanic Eruptions: Some Explosive, Some Gentle** 75

**Erupting Magma into Lava, Tephra, and Gases** 77  
Lava | Tephra | Lava Flows or Tephra? | Volcanic Gases

**Volcano Forms** 79

Shield Volcanoes | Stratovolcanoes | Cinder Cones | Lava Domes | Calderas

**Volcanic Hazards** 85

Lava Flows | Tephra | Pyroclastic Flows (Nuées Ardentes) | Lahars (Volcanic Mudflows) | Poisonous Gases

**BOX 4-1 Magma to Magma: Tephra Hazard Aloft!** 88

**Predicting Volcanic Eruptions** 97

Ground Tilt and Displacement | Increase in Surface Temperatures | Monitoring Earthquakes | Changes in Volcanic Gas Composition | Prediction Success: Mt. Pinatubo, 1991

**BOX 4-2 The Restless "Ring of Fire" in the Summer of 1991** 102

**Volcanic Hazard Mitigation** 107

Lava Diversion by Explosion and Barriers | Cooling Lava Fronts with Water

**Looking Ahead, 110 | Summary, 110 | Key Terms, 110 | Review Questions, 111 | Further Readings, 111**

## 5

### Earthquake Hazards 113

---

**Origin of Earthquakes** 113

**Types of Earthquakes** 114

Divergent-Margin Earthquakes | Convergent-Margin Earthquakes | Transform-Margin Earthquakes | Intraplate Earthquakes | Earthquakes Triggered by Human Activity  
**BOX 5-1 The 1994 Northridge Fault: A New Type of Seismic Hazard in the Los Angeles Basin** 118

**Seismic Waves** 124

Types of Seismic Waves

**Detecting, Measuring, and Locating Earthquakes** 126

How Big Was That Earthquake? | Earthquake Intensity Perception | Earthquake Magnitude Measurement | Locating Earthquakes | Checking Earth's Pulse

**Earthquake Damage Susceptibility** 132

Surface Geology | Integrity of Structures | Population, Building Density, and Time of Day | Integrity of Utilities | Aftershocks and the Reliability of Evacuation Routes

**Earthquake Damage** 137

Buildings—Swaying and Pancaking | Fire and Explosion from Pipelines and Storage Tanks | Shearing and Subsidence of Sand Fills | Quicksand, Sand Boils, and Sand Volcanoes | Quickclays | Landslides | Regional-Scale Tectonic Deformation

**Tsunami** 141

Generating Tsunami | Characteristics and Movements of Tsunami | Damage from Tsunami | Evidence for Ancient Tsunami | Tsunami Hazard Mitigation

**BOX 5-2 Laupahoehoe: A Needless Tragedy** 144

**Earthquake Forecasting** 147

Changes in Rocks | Seismic Gaps | Anomalous Animal Behavior | Statistics | Dating Faults and Disturbances in Sediment

**Fluid Injection to Trigger Earthquakes** 150

**Looking Toward the "Big One"** 151

**Looking Ahead, 151 | Summary, 152 | Key Terms, 152 | Review Questions, 152 | Further Readings, 153**

---

**Soil Erosion and Sediment Pollution 155**

---

**What Is Soil? 155****Why Are Soils Important? 156****Factors Favoring Soil Development 156****Soil Horizons 156****Soil Characteristics 158**Texture | Color | Cohesion | Moisture Content and  
Engineering Properties | Compressibility | Fertility | Porosity  
and Permeability | Reactivity**Soil Classification 160****Soil Erosion 161**

Rainfall and Vegetation | Slope | Wind | Land Use

**Sediment Pollution 167**Aesthetic Problems | Increase in Water Treatment Cost |  
Health Hazards | Hazards to Plants and Animals | Increased  
Flooding Risk**Reducing Sediment Pollution 170**

Siting | Construction Practices | Land Usage

**Looking Ahead, 171 | Summary, 173 | Key Terms,  
173 | Review Questions, 173 | Further Readings,  
174**

---

**Streams 177**

---

**Streamflow 178**Discharge | Velocity | Relation Between Streamflow and  
Channel Variables**Stream Channels 180**

Straight Channels | Meandering Channels | Braided Channels

**Stream Geohazards: Floods 182**Conditions that Cause Floods | Different Kinds of Flooding:  
Upstream and Downstream**Flood Severity 183**Rainfall and Infiltration Rates | Slope, Vegetation, Climate, and  
Time of Year | Urbanization**Flooding Effects 185**Regional Disruption and Economic Loss | Health Problems |  
Biologic Effects**BOX 7-1 The Missouri-Mississippi  
Valley Flood of 1993 186****Flood Control 190**Floodways and Diversions | Floodwalls | Dams | Levees |  
Levee Failure | Levee Breaching During the 1993 Flood |  
How the Levees Held in 1993 | Channelization**BOX 7-2 New Orleans—A City and Its River 194****Clues to Past Floods 202**Physical Clues | Biologic Clues | Geologic Clues | Dating  
Former Floods by Geologic Methods**BOX 7-3 What Is a 50-Year Flood? 204****Predicting Floods 206**

Flood Hazard Maps

**Looking Ahead, 207 | Summary, 207 | Key Terms,  
207 | Review Questions, 208 | Further Readings,  
208**

## 8

---

### Groundwater 211

---

#### Groundwater Accumulation and Migration 211

Permeability of Rock, Soil, and Sediment | Aquifers and Aquicludes

#### Groundwater and the Water Table 212

Groundwater Flow Rate | Shape of the Water Table | Springs | Depressions in the Water Table | Confined and Unconfined Aquifers and Artesian Wells

#### Relation Between Surface

#### Water and Groundwater 216

Effluent and Inluent Streams | Perennial, Intermittent, and Ephemeral Streams

#### Water Resource Development 218

Individual Water Supplies | Aquifers of Fractured Rock | Limestone Aquifers | Island Aquifers | Confined Aquifer Systems | Continental Aquifers | Coastal Aquifers | Importing Water by Aqueduct

#### Groundwater Geohazards 222

Water Table Depression | Increasing Groundwater Temperature | Groundwater Pollution

*BOX 8-1 Water for the Florida Keys—Paradise Lost?* 223

#### Protecting and Monitoring

#### Groundwater Quality 227

Preventing Contaminant Spills, Ruptures, and Leaks | Monitoring Groundwater Quality

#### Maintaining Groundwater Supply 229

Water Conservation | Preserving Infiltration Areas | Other Recharge Methods

Looking Ahead, 229 | Summary, 230 | Key Terms, 230 | Review Questions, 230 | Further Readings, 231

## 9

---

### Landslides 233

---

#### Factors Affecting Mass Movement 234

Gravity as a Driving Force | Role of Rock Structures | Water as a Driving Force | Water as a Resisting Force | Angle of Repose | Particle Packing

#### Types of Mass Movement 238

Rockfalls | Slides | Flows

*BOX 9-1 The Vaiont Dam Disaster* 242

#### Predicting Mass Movement 250

Slopes and Seismic Activity | Geology and Structure | Surface Water Buildup | Topographic and Vegetational Features | Accelerated Creep and Associated Features | Landslide Potential Maps

#### Mass Movement Prevention and Mitigation 253

Slope Drainage | Slope Reduction | Engineering Methods to Resist Mass Movement | Engineering Structures to Mitigate Damage

Looking Ahead, 255 | Summary, 255 | Key Terms, 255 | Review Questions, 255 | Further Readings, 256

## 10

---

### **Subsidence and Collapse 259**

---

#### **Subsidence at or Near the Surface 260**

Subsidence Above Compressible Deposits | Subsidence in Areas Underlain by Expandable Clays | Subsidence in Areas Having Organic Soils

#### **Subsidence Caused by Withdrawing Oil or Water 264**

#### **Subsidence Caused by Mine Collapse 265**

Underground Mining Methods and Surface Subsidence Patterns | Mining and Overlying Rocks | Subsidence Damage | Coal Mine Fires | A Matter of Rights | Mitigating Mine Subsidence  
**BOX 10-1 Subsidence in Spacetown 266**

#### **Subsidence and Collapse Caused by Dissolving of Limestone 275**

Factors Controlling Limestone Solution | Factors Promoting Subsidence and Collapse | Sinkhole Development from Limestone Solution

#### **Human Activities That Trigger Sinkholes 279**

Recognition and Mitigation of Sinkholes

**Looking Ahead, 280 | Summary, 282 | Key Terms, 283 | Review Questions, 283 | Further Readings, 283**

## 11

---

### **Atmospheric Geohazards 285**

---

#### **Acid Precipitation 286**

Rain and Snow Acidity | Effects of Acid Precipitation | Sensitivity to Acid Precipitation | Mitigating Acid Precipitation

#### **The Greenhouse Effect 289**

Origin of Greenhouse Gases | Effects of Increasing Greenhouse Gases on Atmospheric Temperature | Consequences of the Greenhouse Effect | Mitigating the Greenhouse Effect

#### **Ozone Depletion 294**

The Ozone Layer and Its Significance | Destruction of the Ozone Layer by CFC Compounds | Geohazards of Ozone Depletion | Extent of Ozone Depletion | Mitigating Ozone Depletion

#### **Smog—Origins and Types 296**

Inversion Layers | Industrial Smog | Photochemical Smog | Air Pollution Legislation

#### **Radon 299**

Radon Levels and Risks | How Radon Gas Enters the Environment | Variations in Radon Emission | Radon Levels Within Homes | Mitigating Radon Problems | Assessing Radon Risk

**BOX 11-1 The Los Angeles Basin: Three Annual Geohazards 300**

**Looking Ahead, 306 | Summary, 306 | Key Terms, 307 | Review Questions, 307 | Further Readings, 308**

# 12

## Waste Disposal 311

### The Garbage Explosion 311

*BOX 12-1 Solid Waste—Not Just  
a Problem on Land 312*

### Solid Waste 314

Reducing Solid Waste Bulk

### Recycling 316

### Composting 316

### Incinerating 316

### Landfills 317

Sanitary Landfills | Sanitary Landfill Hazards | Sanitary Landfill  
Design to Eliminate Hazards | Geologic Siting of Sanitary  
Landfills | Monitoring Sanitary Landfills

*BOX 12-2 Garbology—A Scientific  
Look at Solid Waste 318*

### Nontoxic Organic Liquid Waste 323

Biological Oxygen Demand (BOD) and Dissolved Oxygen (DO)  
Level | Factors Controlling BOD and DO | Sewage | Urban  
Sewage Treatment

### Acid Drainage from Mines 328

Mitigating Acid Drainage

### Hazardous Liquid Waste 329

### Toxic Liquid Waste 330

A Legacy, Past and Present | Liquid Toxic Waste Disposal |  
Incinerating Liquid Waste | Injecting Liquid Waste into Wells |  
Evaporating Liquid Waste in Lined Surface Ponds | Landfilling  
Liquid Waste

*BOX 12-3 America's Only River Fire Hazard—A  
Turning Point in the Environmental Movement 332*  
*BOX 12-4 Who's Watching the Store? 333*

### Radioactive Waste 337

Radioactive Waste Disposal

### The Waste Problem Ahead 339

Looking Ahead, 340 | Summary, 340 | Key Terms,  
342 | Review Questions, 342 | Further Readings,  
342

# 13

## Estuarine and Wetland Problems 345

### Estuaries 345

How Do Estuaries Form? | How Salty Is an Estuary? | Life in  
an Estuary | Flocculation and Bioagglomeration of Sediments in  
Estuaries

### Estuarine Problems 351

Fertility, Cooling, Waste, and Transportation | Organic Loading  
| Toxic Pollution | Dredging Problems | Anthropogenic  
Changes in Stream Flow

*BOX 13-1 San Francisco's Former Wetlands 358*

### Wetlands, Fresh and Tidal 358

Freshwater Wetlands | Tidal Wetlands | Exchanges Between  
Tidal Wetlands and the Ocean

### Importance of Wetlands 361

Nutrient Productivity and Wildlife Habitats | Flood Mitigation  
| Pollution Control

### Wetlands Elimination 364

Looking Ahead, 364 | Summary, 364 | Key Terms,  
365 | Review Questions, 365 | Further Readings,  
365

# 14

---

## Problems of Mangrove Wetlands and Coral Reefs 367

---

### Mangrove Wetlands 367

Mangrove Reproduction | Mangroves and the Food Chain | Mangrove Wetland Destruction

### Coral Reefs 371

Corals Are Symbiotic Animals | Conditions Necessary for Coral Growth | Types of Coral Reefs | Zonation of Coral Reefs | Reef Development in the United States

#### *BOX 14-1 Louisiana's Vanishing*

#### *Coastal Wetlands 374*

### Coral Reef Destruction 383

Visitors Threaten Reefs | Sewage and Organic Waste Threaten Reefs | Changes in Water Temperature and Salinity Threaten Reefs | Sediment Pollution and Toxic Pollution Threaten Reefs | Coral Mining Threatens Reefs | Even Reef Custodians Are Threatened

#### *BOX 14-2 Can We Save the Everglades? 386*

### Reefs as Hurricane Barriers 389

The Threat to Southern U.S. Coastal Environments

Looking Ahead, 391 | Summary, 391 | Key Terms, 391 | Review Questions, 391 | Further Readings, 392

# 15

---

## Coastal Problems 395

---

### Coastal Processes 396

Waves | Wave Refraction | Longshore Drift | Tidal Currents

### Coastal Zone 400

Estuaries, Bays, and Tidal Wetlands | Beaches | Clifed Coasts | Barrier Islands

### Coastal Storms 403

Characteristics of Coastal Storms | Beach and Dune Recession | Dune Breaching and Washovers | Barrier Island Breaching and Inlet Formation

### Coastal Recovery After Storms 404

Natural Beach Recovery | Artificial Beach Restoration Methods

### Changing Sea Level 408

Causes of Sea Level Change | Results of Sea Level Change

### Human Interference with Coastal Processes 411

Dune Elimination | Seawalls | Groins | Jetties

### Are America's Beaches All Washed up? 414

Looking Ahead, 416 | Summary, 416 | Key Terms, 417 | Review Questions, 417 | Further Readings, 417

---

**Severe Weather Hazards 419**

---

**Tornadoes 422**

**Northeasters 424**

**Hurricanes 426**

Origin of Hurricanes | Hurricane Structure | Hurricane Effects on the Ocean | Hurricane Intensity and Frequency | Monitoring and Tracking Hurricanes | Changes in Hurricane Tracks and Intensities | Angle of Hurricane Approach to Coast

**BOX 16-1 Andrew, Omar, and Iniki—World-Class Weather Hazards of 1992 436**

**Hurricane Storm Surge 444**

Measuring and Calculating Storm Surge Levels | Causes of Storm Surge | Two Surge Types—Flood and Ebb | Storm Surge Damage

**Hurricane Wind Damage 447**

**Hurricane Disruption of Vital Services 449**

**Predicting Hurricane Frequency and Intensity 450**

Hurricane Frequency, Intensity, and the African Connection

**Reducing Hurricane Damage 452**

Adequate Warning and Evacuation | Maintaining Beach Width and Dune Height | Engineering Solutions | Construction Codes | Zoning/Land Use Practices

**Summary, 454 | Key Term, 455 | Review Questions, 455 | Further Readings, 455**

**Appendix A Conversion of English and Metric Units 458**

**Appendix B Soil Classification 460**

**Glossary 463**

**Index 475**
