

Contents

Contributors	vii
Preface	xi
1. Introduction to Cancer Biology	1
<i>Richard P. Hill and Ian F. Tannock</i>	
2. Epidemiology of Cancer	6
<i>John R. McLaughlin and Norman F. Boyd</i>	
3. Methods of Genetic Analysis	26
<i>Jeremy A Squire and Robert A. Phillips</i>	
4. Genetic Basis of Cancer	48
<i>Jeremy A. Squire, Gordon F. Whitmore, and Robert A. Phillips</i>	
5. Viruses, Oncogenes, and Tumor Suppressor Genes	79
<i>Sam Benchimol and Mark D. Minden</i>	
6. Growth Factors and Intracellular Signaling	106
<i>Brent W. Zanke</i>	
7. Cell Proliferation and Cell Death	134
<i>Joyce M. Slingerland and Ian F. Tannock</i>	
8. Chemical and Radiation Carcinogenesis	166
<i>Allan B. Okey, Patricia A. Harper, Denis M. Grant, and Richard P. Hill</i>	
9. The Extracellular Environment and Cancer	197
<i>Shoukat Dedhar, Gregory E. Hannigan, Janusz Rak, and Robert S. Kerbel</i>	
10. Tumor Progression and Metastasis	219
<i>Ann F. Chambers and Richard P. Hill</i>	
11. Immunology Related to Cancer	240
<i>David Spaner, Laszlo Radvany, and Richard G. Miller</i>	
12. Hormones and Cancer	263
<i>Paul E. Goss and Lesley M. Tye</i>	
13. Molecular and Cellular Basis of Radiotherapy	295
<i>Robert G. Bristow and Richard P. Hill</i>	
14. Experimental Radiotherapy	322
<i>C. Shun Wong and Richard P. Hill</i>
