-----------------------------	-----

Introduction

1 Introduction to Nanotechnology	
<i>Bharat Bhushan</i>	1
1.1 Nanotechnology – Definition and Examples	1
1.2 Background and Research Expenditures	4
1.3 Lessons from Nature (Biomimetics)	6
1.4 Applications in Different Fields	7
1.5 Various Issues	8
1.6 Research Training	8
1.7 Organization of Handbook	9
References	9

Part A Nanostructures, Micro/Nanofabrication and Materials

2 Nanomaterials Synthesis and Applications: Molecule-Based Devices	
<i>Françisco M. Raymo</i>	13
2.1 Chemical Approaches to Nanostructured Materials	13
2.2 Molecular Switches and Logic Gates	18
2.3 Solid State Devices	26
2.4 Conclusions and Outlook	38
References	39

3 Introduction to Carbon Nanotubes	
<i>Marc Monthieux, Philippe Serp, Emmanuel Flahaut, Manitra Razafinimanana, Christophe Laurent, Alain Peigney, Wolfgang Bacsá, Jean-Marc Broto</i>	43
3.1 Structure of Carbon Nanotubes	44
3.2 Synthesis of Carbon Nanotubes	49
3.3 Growth Mechanisms of Carbon Nanotubes	65
3.4 Properties of Carbon Nanotubes	69
3.5 Carbon Nanotube-Based Nano-Objects	74
3.6 Applications of Carbon Nanotubes	80
3.7 Concluding Remarks	95
References	95

4	Nanowires	
	<i>Mildred S. Dresselhaus, Yu-Ming Lin, Oded Rabin, Marcie R. Black, Jing Kong, Gene Dresselhaus</i>	113
4.1	Synthesis	115
4.2	Characterization and Physical Properties of Nanowires	124
4.3	Applications	145
4.4	Concluding Remarks	152
	References	153
5	Template-Based Synthesis of Nanorod or Nanowire Arrays	
	<i>Huamei (Mary) Shang, Guozhong Cao</i>	161
5.1	Template-Based Approach	162
5.2	Electrochemical Deposition	163
5.3	Electrophoretic Deposition	167
5.4	Template Filling	172
5.5	Converting from Reactive Templates	174
5.6	Summary and Concluding Remarks	174
	References	175
6	Three-Dimensional Nanostructure Fabrication by Focused Ion Beam Chemical Vapor Deposition	
	<i>Shinji Matsui</i>	179
6.1	Three-Dimensional Nanostructure Fabrication	180
6.2	Nanoelectromechanics	183
6.3	Nanooptics: Brilliant Blue from a <i>Morpho</i> Butterfly Scale Quasi-Structure	190
6.4	Nanobiology	191
6.5	Summary	194
	References	195
7	Introduction to Micro/Nanofabrication	
	<i>Babak Ziaie, Antonio Baldi, Massood Z. Atashbar</i>	197
7.1	Basic Microfabrication Techniques	197
7.2	MEMS Fabrication Techniques	210
7.3	Nanofabrication Techniques	222
7.4	Summary and Conclusions	233
	References	233
8	Nanoimprint Lithography	
	<i>Helmut Schiff, Anders Kristensen</i>	239
8.1	Emerging Nanopatterning Methods	241
8.2	Nanoimprint Process	244
8.3	Tools and Materials for Nanoimprint	255
8.4	Applications	262
8.5	Conclusion and Outlook	268
	References	270

9 Stamping Techniques for Micro- and Nanofabrication	
<i>Etienne Menard, John A. Rogers</i>	279
9.1 High-Resolution Stamps	280
9.2 Microcontact Printing	282
9.3 Nanotransfer Printing	284
9.4 Applications	288
9.5 Conclusions	295
References	295
10 Material Aspects of Micro- and Nanoelectromechanical Systems	
<i>Christian A. Zorman, Mehran Mehregany</i>	299
10.1 Silicon	299
10.2 Germanium-Based Materials	306
10.3 Metals	307
10.4 Harsh-Environment Semiconductors	309
10.5 GaAs, InP, and Related III-V Materials	314
10.6 Ferroelectric Materials	316
10.7 Polymer Materials	317
10.8 Future Trends	318
References	319
11 Complexity and Emergence as Design Principles for Engineering Decentralized Nanoscale Systems	
<i>David Wendell, Dean Ho, Carlo D. Montemagno</i>	323
11.1 Definitions	324
11.2 Examples and Experimental Analysis of Decentralized Systems in Nature	331
11.3 Engineering Emergent Behavior into Nanoscale Systems: Thematic Examples of Synthetic Decentralized Nanostructures	334
11.4 Conclusion	343
References	343
12 Nanometer-Scale Thermoelectric Materials	
<i>Joseph P. Heremans</i>	345
12.1 The Promise of Thermoelectricity	347
12.2 Theory of Thermoelectric Transport in Low-Dimensional Solids	349
12.3 Two-Dimensional Thermoelectric Transport in Quantum Wells	359
12.4 One-Dimensional Thermoelectric Transport in Quantum Wires	360
12.5 Quasi-Zero-Dimensional Systems, Solids Containing Quantum Dots	366
12.6 Conclusions	370
References	370
13 Nano- and Microstructured Semiconductor Materials for Macroelectronics	
<i>Yugang Sun, Seung-Hyun Hur, John A. Rogers</i>	375
13.1 Classes of Semiconductor Nanomaterials and their Preparation	377

13.2	Generation of Thin Films of Ordered Nanostructures on Plastic Substrates	384
13.3	Applications for Macroelectronics	389
13.4	Outlook	395
	References	395

Part B MEMS/NEMS and BioMEMS/NEMS

14 Next-Generation DNA Hybridization and Self-Assembly Nanofabrication Devices

	<i>Michael J. Heller, Benjamin Sullivan, Dietrich Dehlinger, Paul Swanson, Dalibor Hodko</i>	401
14.1	Electronic Microarray Technology	403
14.2	Electric Field-Assisted Nanofabrication Processes	409
14.3	Conclusions	411
	References	411

15 MEMS/NEMS Devices and Applications

	<i>Darrin J. Young, Christian A. Zorman, Mehran Mehregany</i>	415
15.1	MEMS Devices and Applications	417
15.2	Nanoelectromechanical Systems (NEMS)	436
15.3	Current Challenges and Future Trends	439
	References	440

16 Nanomechanical Cantilever Array Sensors

	<i>Hans Peter Lang, Martin Hegner, Christoph Gerber</i>	443
16.1	Technique	443
16.2	Cantilever Array Sensors	445
16.3	Modes of Operation	446
16.4	Microfabrication	450
16.5	Measurement Set-Up	450
16.6	Functionalization Techniques	453
16.7	Applications	455
16.8	Conclusions and Outlook	455
	References	456

17 Therapeutic Nanodevices

	<i>Stephen C. Lee, Mark Ruegsegger, Philip D. Barnes, Bryan R. Smith, Mauro Ferrari</i>	461
17.1	Definitions and Scope of Discussion	462
17.2	Synthetic Approaches: "Top-Down" Versus "Bottom-Up" Approaches for Nanotherapeutic Device Components	467
17.3	Technological and Biological Opportunities	470
17.4	Applications of Nanotherapeutic Devices	488
17.5	Concluding Remarks: Barriers to Practice and Prospects	496
	References	499

18 G-Protein Coupled Receptors: Surface Display and Biosensor Technology	
<i>Edward J. McMurchie, Wayne R. Leifert</i>	505
18.1 The GPCR:G-Protein Activation Cycle	507
18.2 Preparation of GPCRs and G-proteins	509
18.3 Measurement of GPCR Signaling	509
18.4 GPCR Biosensing	511
18.5 Protein Engineering in GPCR Signaling	517
18.6 The Future of GPCRs in Nanobiotechnologies	520
References	520
19 Microfluidics and Their Applications to Lab-on-a-Chip	
<i>Chong H. Ahn, Jin-Woo Choi</i>	523
19.1 Materials for Microfluidic Devices and Micro/Nanofabrication Techniques	524
19.2 Active Microfluidic Devices	527
19.3 Smart Passive Microfluidic Devices	532
19.4 Lab-on-a-Chip for Biochemical Analysis	540
References	545
20 Centrifuge-Based Fluidic Platforms	
<i>Jim Zoval, Guangyao Jia, Horacio Kido, Jitae Kim, Nahui Kim, Marc J. Madou</i>	549
20.1 Why Centripetal Force for Fluid Propulsion?	550
20.2 Compact Disc or Micro-Centrifuge Fluidics	552
20.3 CD Applications	556
20.4 Conclusion	567
References	568
21 Micro/Nanodroplets in Microfluidic Devices	
<i>"Mike" Yung-Chieh Tan, Abraham "Abe" Lee</i>	571
21.1 Active or Programmable Droplet System	572
21.2 Passive Droplet Control Techniques	575
21.3 Applications	582
21.4 Conclusion	584
References	584

Part C Scanning Probe Microscopy

22 Scanning Probe Microscopy – Principle of Operation, Instrumentation, and Probes	
<i>Bharat Bhushan, Othmar Marti</i>	591
22.1 Scanning Tunneling Microscope	593
22.2 Atomic Force Microscope	597
22.3 AFM Instrumentation and Analyses	613
References	630

23 Probes in Scanning Microscopies	
<i>Jason H. Hafner</i>	637
23.1 Atomic Force Microscopy	638
23.2 Scanning Tunneling Microscopy.....	648
References	649
24 Noncontact Atomic Force Microscopy and Related Topics	
<i>Franz J. Giessibl, Yasuhiro Sugawara, Seizo Morita, Hirotaka Hosoi, Kazuhisa Sueoka, Koichi Mukasa, Akira Sasahara, Hiroshi Onishi</i>	651
24.1 Atomic Force Microscopy (AFM)	652
24.2 Applications to Semiconductors	657
24.3 Applications to Insulators	663
24.4 Applications to Molecules	670
References	673
25 Low-Temperature Scanning Probe Microscopy	
<i>Markus Morgenstern, Alexander Schwarz, Udo D. Schwarz</i>	679
25.1 Microscope Operation at Low Temperatures	680
25.2 Instrumentation	681
25.3 Scanning Tunneling Microscopy and Spectroscopy	685
25.4 Scanning Force Microscopy and Spectroscopy.....	698
References	710
26 Higher-Harmonic Force Detection in Dynamic Force Microscopy	
<i>Ozgur Sahin, Calvin F. Quate, Olav Solgaard, Franz J. Giessibl</i>	717
26.1 Modeling of Tip-Sample Interaction Forces in Tapping-Mode AFM	718
26.2 Enhancing a Specific Harmonic of the Interaction Force Using a Flexural Resonance.....	721
26.3 Recovering the Time-Resolved Tip-Sample Forces with Torsional Vibrations	724
26.4 Application Examples	727
26.5 Higher Harmonic/Atomic Force Microscopy with Small Amplitudes	731
References	735
27 Dynamic Modes of Atomic Force Microscopy	
<i>A. Schirmeisen, B. Anczykowski, Harald Fuchs</i>	737
27.1 Motivation: Measurement of a Single Atomic Bond	737
27.2 Harmonic Oscillator: A Model System for Dynamic AFM	741
27.3 Dynamic AFM Operational Modes.....	743
27.4 Q-Control.....	754
27.5 Dissipation Processes Measured with Dynamic AFM	758
27.6 Conclusion	762
References	762

28 Molecular Recognition Force Microscopy: From Simple Bonds to Complex Energy Landscapes	
<i>Peter Hinterdorfer, Ziv Reich</i>	767
28.1 Ligand Tip Chemistry	768
28.2 Immobilization of Receptors onto Probe Surfaces	770
28.3 Single-Molecule Recognition Force Detection	771
28.4 Principles of Molecular Recognition Force Spectroscopy	773
28.5 Recognition Force Spectroscopy: From Isolated Molecules to Biological Membranes	775
28.6 Recognition Imaging	782
28.7 Concluding Remarks	784
References	784

Part D Nanotribology and Nanomechanics

29 Nanotribology, Nanomechanics and Materials Characterization	
<i>Bharat Bhushan</i>	791
29.1 Description of AFM/FFM and Various Measurement Techniques	793
29.2 Surface Imaging, Friction and Adhesion	804
29.3 Wear, Scratching, Local Deformation, and Fabrication/Machining	829
29.4 Indentation	837
29.5 Boundary Lubrication	841
29.6 Closure	852
References	853

30 Surface Forces and Nanorheology of Molecularly Thin Films	
<i>Marina Ruths, Jacob N. Israelachvili</i>	859
30.1 Introduction: Types of Surface Forces	860
30.2 Methods Used to Study Surface Forces	862
30.3 Normal Forces Between Dry (Unlubricated) Surfaces	866
30.4 Normal Forces Between Surfaces in Liquids	870
30.5 Adhesion and Capillary Forces	880
30.6 Introduction: Different Modes of Friction and the Limits of Continuum Models	886
30.7 Relationship Between Adhesion and Friction Between Dry (Unlubricated and Solid Boundary Lubricated) Surfaces	887
30.8 Liquid Lubricated Surfaces	898
30.9 Effects of Nanoscale Texture on Friction	909
References	913

31 Interfacial Forces and Spectroscopic Study of Confined Fluids	
<i>Y. Elaine Zhu, Ashis Mukhopadhyay, Steve Granick</i>	925
31.1 Hydrodynamic Force of Fluids Flowing in Micro- to Nanofluidics: A Question About No-Slip Boundary Condition	926
31.2 Hydrophobic Interaction and Water at a Hydrophobicity Interface ...	932
31.3 Ultrafast Spectroscopic Study of Confined Fluids: Combining Ultra-Fast Spectroscopy with Force Apparatus	938

31.4	Contrasting Friction with Diffusion in Molecularly Thin Films	941
31.5	Diffusion of Confined Molecules During Shear	945
31.6	Summary	946
	References	946
32	Scanning Probe Studies of Nanoscale Adhesion Between Solids in the Presence of Liquids and Monolayer Films	
	<i>Robert W. Carpick, James Batteas, Maarten P. de Boer</i>	951
32.1	The Importance of Adhesion at the Nanoscale	951
32.2	Techniques for Measuring Adhesion	952
32.3	Calibration of Forces, Displacements, and Tips	957
32.4	The Effect of Liquid Capillaries on Adhesion	959
32.5	Self-Assembled Monolayers	968
32.6	Concluding Remarks	973
	References	974
33	Friction and Wear on the Atomic Scale	
	<i>Enrico Gnecco, Roland Bennewitz, Oliver Pfeiffer, Anisoara Socoliuc, Ernst Meyer</i>	981
33.1	Friction Force Microscopy in Ultrahigh Vacuum	982
33.2	The Tomlinson Model.....	986
33.3	Friction Experiments on the Atomic Scale	988
33.4	Thermal Effects on Atomic Friction	992
33.5	Geometry Effects in Nanocontacts	996
33.6	Wear on the Atomic Scale	999
33.7	Molecular Dynamics Simulations of Atomic Friction and Wear.....	1001
33.8	Energy Dissipation in Noncontact Atomic Force Microscopy	1004
33.9	Conclusion	1006
	References	1007
34	Velocity Dependence of Nanoscale Friction, Adhesion and Wear	
	<i>Nikhil S. Tambe, Bharat Bhushan</i>	1011
34.1	Bridging Science and Engineering for Nanotribological Investigations	1012
34.2	Instrumentation.....	1014
34.3	Velocity Dependence of Nanoscale Friction and Adhesion.....	1017
34.4	Dominant Friction Regimes and Mechanisms	1020
34.5	Nanoscale Friction Mapping.....	1035
34.6	Wear Studies at High Sliding Velocities	1037
34.7	Identifying Materials with Low Friction and Adhesion for Nanotechnological Applications	1043
34.8	Closure	1045
	References	1046

35 Computer Simulations of Nanometer-Scale Indentation and Friction	
<i>Susan B. Sinnott, Seong-Jun Heo, Donald W. Brenner, Judith A. Harrison ..</i>	1051
35.1 Computational Details	1052
35.2 Indentation	1057
35.3 Friction and Lubrication	1072
35.4 Conclusions	1096
References	1097
36 Nanoscale Mechanical Properties – Measuring Techniques and Applications	
<i>Andrzej J. Kulik, Andras Kis, Gérard Gremaud, Stefan Hengsberger, Gustavo S. Luengo, Philippe K. Zysset, László Forró.....</i>	1107
36.1 Local Mechanical Spectroscopy via Dynamic Contact AFM	1108
36.2 Static Methods – Mesoscopic Samples, Shear and Young's Modulus ..	1113
36.3 Scanning Nanoindentation as a Tool to Determine Nanomechanical Properties of Biological Tissue Under Dry and Wet Conditions	1121
36.4 General Summary and Perspectives	1132
References	1133
37 Nanomechanical Properties of Solid Surfaces and Thin Films	
<i>Adrian B. Mann</i>	1137
37.1 Instrumentation	1138
37.2 Data Analysis	1144
37.3 Modes of Deformation	1152
37.4 Thin Films and Multilayers	1156
37.5 Developing Areas.....	1161
References	1161
38 Scale Effect in Mechanical Properties and Tribology	
<i>Bharat Bhushan, Michael Nosonovsky</i>	1167
38.1 Nomenclature	1167
38.2 Introduction	1169
38.3 Scale Effect in Mechanical Properties	1171
38.4 Scale Effect in Surface Roughness and Contact Parameters.....	1175
38.5 Scale Effect in Friction	1178
38.6 Scale Effect in Wear	1190
38.7 Scale Effect in Interface Temperature.....	1190
38.8 Closure	1191
38.A Statistics of Particle Size Distribution	1192
References	1196
39 Mechanics of Biological Nanotechnology	
<i>Rob Phillips, Prashant K. Purohit, Jané Kondev</i>	1199
39.1 Science at the Biology–Nanotechnology Interface	1200
39.2 Scales at the Bio–Nano Interface	1206
39.3 Modeling at the Nano–Bio Interface	1212

39.4	Nature's Nanotechnology Revealed: Viruses as a Case Study	1215
39.5	Concluding Remarks	1220
	References	1220
40	Structural, Nanomechanical and Nanotribological Characterization of Human Hair Using Atomic Force Microscopy and Nanoindentation	
	<i>Bharat Bhushan, Carmen LaTorre, Guohua Wei</i>	1223
40.1	Human Hair, Skin and Hair Care Products	1226
40.2	Experimental Techniques	1235
40.3	Structural Characterization Using an AFM	1246
40.4	Nanomechanical Characterization Using Nanoindentation and Nanoscratch	1252
40.5	Macroscale Tribological Characterization	1266
40.6	Nanotribological Characterization Using an AFM	1269
40.7	Closure	1300
40.A	Conditioner Thickness Approximation	1302
	References	1302
41	Mechanical Properties of Nanostructures	
	<i>Bharat Bhushan</i>	1305
41.1	Experimental Techniques for Measurement of Mechanical Properties of Nanostructures	1307
41.2	Experimental Results and Discussion	1312
41.3	Finite Element Analysis of Nanostructures with Roughness and Scratches	1326
41.4	Closure	1332
	References	1333

Part E Molecularly Thick Films for Lubrication

42	Nanotribology of Ultrathin and Hard Amorphous Carbon Films	
	<i>Bharat Bhushan</i>	1339
42.1	Description of Common Deposition Techniques	1343
42.2	Chemical and Physical Coating Characterization	1347
42.3	Micromechanical and Tribological Coating Characterization	1353
42.4	Closure	1374
	References	1375
43	Self-Assembled Monolayers (SAMs) for Controlling Adhesion, Friction, and Wear	
	<i>Bharat Bhushan</i>	1379
43.1	A Brief Organic Chemistry Primer	1382
43.2	Self-Assembled Monolayers: Substrates, Spacer Chains; and End Groups in the Molecular Chains	1386
43.3	Tribological Properties of SAMs	1389

43.4	Closure	1410
	References	1411
44	Nanoscale Boundary Lubrication Studies	
	<i>Bharat Bhushan, Huiwen Liu</i>	1417
44.1	Lubricants Details	1418
44.2	Nanodeformation, Molecular Conformation, and Lubricant Spreading	1420
44.3	Boundary Lubrication Studies	1422
44.4	Closure	1436
	References	1436
45	Kinetics and Energetics in Nanolubrication	
	<i>Rene M. Overney, George W. Tyndall, Jane Frommer</i>	1439
45.1	Background: From Bulk to Molecular Lubrication	1441
45.2	Thermal Activation Model of Lubricated Friction	1443
45.3	Functional Behavior of Lubricated Friction	1444
45.4	Thermodynamical Models Based on Small and Nonconforming Contacts	1446
45.5	Limitation of the Gaussian Statistics – The Fractal Space	1447
45.6	Fractal Mobility in Reactive Lubrication	1448
45.7	Metastable Lubricant Systems in Large Conforming Contacts	1450
45.8	Conclusion	1451
	References	1451

Part F Industrial Applications

46	The “Millipede” – A Nanotechnology-Based AFM Data-Storage System	
	<i>Gerd K. Binnig, G. Cherubini, M. Despont, Urs T. Dürig, Evangelos Eleftheriou, H. Pozidis, Peter Vettiger</i>	1457
46.1	The Millipede Concept	1459
46.2	Thermomechanical AFM Data Storage	1460
46.3	Array Design, Technology, and Fabrication	1462
46.4	Array Characterization	1463
46.5	x/y/z Medium Microscanner	1465
46.6	First Write/Read Results with the 32×32 Array Chip	1467
46.7	Polymer Medium	1469
46.8	Read Channel Model	1475
46.9	System Aspects	1479
46.10	Conclusions	1484
	References	1484
47	Nanotechnology for Data Storage Applications	
	<i>Dror Sarid, Brendan McCarthy, Ghassan E. Jabbour</i>	1487
47.1	Current Status of Commercial Data Storage Devices	1489

47.2	Opportunities Offered by Nanotechnology for Data Storage	1495
47.3	Conclusion	1506
	References	1507
48	Microactuators for Dual-Stage Servo Systems in Magnetic Disk Files	
	<i>Roberto Horowitz, Tsung-Lin (Tony) Chen, Kenn Oldham, Yunfeng Li, Xinghui Huang, Shih-Chung Kon, Ryoze Nagamune</i>	1509
48.1	Design of the Electrostatic Microactuator	1511
48.2	Fabrication	1520
48.3	Servo Control Design of MEMS Microactuator Dual-Stage Servo Systems	1528
48.4	Conclusions and Outlook	1541
	References	1542
49	Nanorobotics	
	<i>Bradley J. Nelson, Lixin Dong</i>	1545
49.1	Overview of Nanorobotics	1546
49.2	Actuation at Nanoscales	1547
49.3	Nanorobotic Manipulation Systems	1549
49.4	Nanorobotic Assembly	1555
49.5	Applications	1563
	References	1566

Part G Micro/Nanodevice Reliability

50	Nanotribology and Materials Characterization of MEMS/NEMS and BioMEMS/BioNEMS Materials and Devices	
	<i>Bharat Bhushan</i>	1575
50.1	Introduction	1576
50.2	Tribological Studies of Silicon and Related Materials	1593
50.3	Lubrication Studies for MEMS/NEMS	1600
50.4	Tribological Studies of Biological Molecules on Silicon-Based Surfaces and of Coated Polymer Surfaces	1606
50.5	Nanopatterned Surfaces	1611
50.6	Component-Level Studies	1616
50.7	Conclusion	1627
50.A	Appendix Micro/Nanofabrication Methods	1628
	References	1631
51	Experimental Characterization Techniques for Micro/Nanoscale Devices	
	<i>Kimberly L. Turner, Peter G. Hartwell</i>	1639
51.1	Motivation	1639
51.2	Applications Utilizing Dynamic MEMS/NEMS	1640
51.3	Test/Characterization Techniques	1640

51.4	Example: Characterizing an In-Plane MEMS Actuator	1654
51.5	Design for Test	1659
	References	1659
52	Failure Mechanisms in MEMS/NEMS Devices	
	<i>W. Merlijn van Spengen, Robert Modlinski, Robert Puers, Anne Jourdain</i>	1663
52.1	Failure Modes and Failure Mechanisms	1663
52.2	Stiction and Charge-Related Failure Mechanisms	1665
52.3	Creep, Fatigue, Wear, and Packaging-Related Failures	1671
52.4	Conclusions	1681
	References	1681
53	Mechanical Properties of Micromachined Structures	
	<i>Harold Kahn</i>	1685
53.1	Measuring Mechanical Properties of Films on Substrates	1685
53.2	Micromachined Structures for Measuring Mechanical Properties	1686
53.3	Measurements of Mechanical Properties	1696
	References	1699
54	Thermo- and Electromechanical Behavior of Thin-Film Micro and Nanostructures	
	<i>Martin L. Dunn, Shawn J. Cunningham</i>	1703
54.1	Thermomechanics of Multilayer Thin-Film Structures	1705
54.2	Electromechanics of Thin-Film Structures	1726
54.3	Summary and Topics not Covered	1744
	References	1745
55	High Volume Manufacturing and Field Stability of MEMS Products	
	<i>Jack Martin</i>	1749
55.1	Manufacturing Strategy	1752
55.2	Robust Manufacturing	1754
55.3	Stable Field Performance	1769
	References	1772
56	Packaging and Reliability Issues in Micro/Nano Systems	
	<i>Jongbaeg Kim, Yu-Ting Cheng, Mu Chiao, Liwei Lin</i>	1777
56.1	Introduction to Micro-/Nano-Electromechanical (MEMS)/ (NEMS) Packaging	1777
56.2	Hermetic and Vacuum Packaging and Applications	1783
56.3	Thermal Issues and Packaging Reliability	1791
56.4	Future Trends and Summary	1798
	References	1799

Part H Technological Convergence and Governing Nanotechnology

57 Technological Convergence from the Nanoscale 1807

 William Sims Bainbridge 1807

 57.1 Nanoscience Synergy 1807

 57.2 Dynamics of Convergence from the Nanoscale 1810

 57.3 Ethical, Legal and Social Implications 1811

 57.4 Transformative Synthesis 1814

 57.5 Cultural Implications of Convergence 1816

 57.6 Conclusion 1819

 References 1819

58 Governing Nanotechnology: Social, Ethical and Human Issues 1823

 William Sims Bainbridge 1823

 58.1 Social Science Background 1823

 58.2 Human Impacts of Nanotechnology 1827

 58.3 Regulating Nanotechnology 1830

 58.4 The Cultural Context for Nanotechnology 1832

 58.5 Conclusions 1835
