CONTENTS

Series Editor's Introduction v

Preface vii

1. The Logic of Logistic Regression 1

Regression with a Dummy Dependent Variable 1
Transforming Probabilities into Logits 10
Linearizing the Nonlinear 14
Summary 18

2. Interpreting Logistic Regression Coefficients 18

Logged Odds 19
Odds 21
Probabilities 23
Tests of Significance 30
Standardized Coefficients 32
An Example 35
Summary 39

3. Estimation and Model Fit 39

Maximum Likelihood Estimation 40
Log Likelihood Function 43
Estimation 44
Tests of Significance Using Log Likelihood Values 45
Model Evaluation 48
An Example 51
Summary 53

4. Probit Analysis 54

Another Way to Linearize the Nonlinear 54
Probit Analysis 58
Interpreting the Coefficients 60
Maximum Likelihood Estimation 64

An Example 65
Summary 68

5. Conclusion **68**

Notes **71**

Appendix: Logarithms **74**

The Logic of Logarithms 74
Properties of Logarithms 76
Natural Logarithms 79
Summary 82

References **83**

About the Author **85**

Acknowledgments **86**
