

Table of Contents

Part 1

Disassembly Practice..... 1

Chapter 1	Introduction	3
1.1	Assembly and Disassembly History	3
1.1.1	General	3
1.1.2	End-of-Life Disassembly	8
1.2	Levels of Aggregation.....	10
1.3	Disassembly Optimization	12
1.4	Basic Terminology	14
1.4.1	The Product.....	14
1.4.2	The Process	15
1.4.3	The End-of-Life Process Chain	16
1.5	Product Modeling.....	18
1.6	Summary of the Chapters	19
1.6.1	Part 1 Disassembly Practice	19
1.6.2	Part 2 Disassembly Sequencing.....	19
1.6.3	Part 3 Disassembly Planning	20
References		20

Chapter 2 Context of End-of-Life Disassembly..... 23

2.1	Introduction	23
2.2	Industrial Ecology	23
2.2.1	Introduction	23
2.2.2	Product Life Cycle	24
2.2.2.1	General.....	24
2.2.2.2	Product-Process Chains	25
2.2.2.3	Design for Life Cycle.....	28
2.2.2.4	Life Cycle Assessment and Eco-Indicators.....	28
2.2.3	Product Recovery	28
2.2.4	Cascading	30
2.3	Complex Products	31
2.3.1	General	31
2.3.2	Production of Complex Products.....	32
2.3.3	Recovery of Complex Products	32
2.3.4	Selective Disassembly.....	34

2.3.5	Bulk Recycling.....	37
2.3.5.1	Modeling.....	37
2.3.5.2	A Typical Recycling Plant.....	38
2.3.5.3	Typical Bulk Recycling Sequence.....	40
2.3.6	Typical Costs and Revenues.....	41
2.3.7	Epilogue.....	41
2.4	Complex Products Waste.....	46
2.4.1	General Waste Streams.....	46
2.4.2	Data on Complex Products Waste.....	47
2.4.2.1	Introduction.....	47
2.4.2.2	Buildings and Infrastructure.....	47
2.4.2.3	Ordinary Complex Products.....	48
2.4.2.4	Vehicles.....	49
2.4.2.5	Electric and Electronic, and Small Mechanical Products.....	50
2.4.2.6	Statistics on Electric and Electronic Products.....	52
2.5	Breakdown Analyses of Some Prominent Complex Products.....	54
2.5.1	Introduction.....	54
2.5.2	Houses.....	55
2.5.3	Cars.....	55
2.5.4	Electric and Electronic Products.....	59
2.5.4.1	Aggregate Figures.....	59
2.5.4.2	White Goods.....	59
2.5.4.3	Brown Goods.....	60
2.5.4.4	Grey Goods.....	61
2.5.4.5	Elemental Analysis of a PC Configuration.....	62
2.5.4.6	Complex Components in Electronic Products.....	62
2.5.5	Hazardous Materials in Electronic Products.....	66
2.6	Conclusion.....	68
	References.....	68

Chapter 3 The Disassembly Process..... 73

3.1	Introduction.....	73
3.2	The Product.....	73
3.2.1	Introduction.....	73
3.2.2	Components.....	74
3.2.3	Connections.....	75
3.2.4	Fasteners.....	77
3.2.5	Distribution of Components' Masses in a Product.....	77
3.2.6	Aggregate Approach.....	80
3.2.7	Design Issues.....	83
3.2.8	Materials Breakdown Analyses.....	85
3.2.9	Connection Diagrams and Connectivity Matrices.....	86
3.3	The Process.....	88
3.3.1	Basic Approaches.....	88

3.3.2	Disassembly Task Typology	89
3.3.3	Disassembly Tools	91
3.3.4	Disassembly Process Analysis	92
3.4	Cost Metrics	93
3.4.1	Introduction	93
3.4.2	Technical Approach.....	95
3.4.3	Work Measurement Approach	95
3.4.4	Fixed and Variable Costs	97
3.5	Revenue Metrics.....	98
3.5.1	Introduction	98
3.5.2	Financial Revenues	98
3.5.3	Environmental Benefits.....	99
3.5.3.1	Introduction.....	99
3.5.3.2	Life Cycle Assessment	99
3.5.3.3	Eco-Indicator.....	101
3.5.3.4	Environmental Constraints	101
3.6	Economic Optimization	102
3.6.1	Introduction	102
3.6.2	The Profit Function	102
3.6.3	Return on Investment and Profit Rate	106
3.7	Economic-Ecological (Eco-Eco) Models	108
3.8	Example: Disassembly of Discarded Cars	109
3.9	Conclusion.....	111
	References.....	112

Part 2

Disassembly Sequencing 117

Chapter 4 Disassembly Network Features 119

4.1	Introduction	119
4.2	Disassembly Process Representation.....	120
4.2.1	Disassembly Precedence Graph.....	120
4.2.2	Disassembly Tree	122
4.2.3	State Diagrams	123
4.2.4	AND/OR Graphs.....	124
4.3	Unconstrained Products	125
4.3.1	Components and Connections	126
4.3.2	Subassemblies, Connection States, and Subassembly States.....	126
4.3.3	Intermediate States and Nonmonotone Products	128
4.3.4	Cut-Sets and Disassembly Operations.....	128
4.3.4.1	Cut-Sets.....	128
4.3.4.2	Disassembly Operations in a State Diagram	129
4.3.4.3	Disassembly Operations in an AND/OR Graph	131
4.3.4.4	Ternary Operations	132

4.3.5	Complete Disassembly Sequences.....	132
4.3.5.1	Complete Sequential Sequences.....	133
4.3.5.2	Complete Sequences in the State Diagram.....	134
4.3.5.3	Complete Sequences in the AND/OR Graph.....	135
4.3.6	Incomplete Disassembly Sequences.....	136
4.3.6.1	Incomplete Sequential Sequences.....	136
4.3.6.2	Incomplete Sequences in the State Diagram.....	137
4.3.6.3	Incomplete Sequences in the AND/OR Graph.....	138
4.3.7	Alternative Approaches.....	139
4.4	Topologically Constrained Products.....	140
4.5	Weakly Connected Products.....	142
4.5.1	Introduction.....	142
4.5.2	Connections, Subassemblies, Connection States, and Subassembly States.....	144
4.5.3	Cut-Sets and Disassembly Operations.....	146
4.5.3.1	Cut-Sets.....	146
4.5.3.2	Disassembly Operations in a State Diagram.....	146
4.5.3.3	Disassembly Operations in an AND/OR Graph.....	147
4.5.4	Complete Sequential Sequences.....	148
4.5.5	Complete Sequences in the State Diagram.....	149
4.5.6	Complete Sequences in the AND/OR Graph.....	149
4.5.7	Incomplete Disassembly Sequences.....	150
4.5.7.1	Incomplete Sequential Sequences.....	150
4.5.7.2	Incomplete Sequences in the State Diagram.....	151
4.5.7.3	Incomplete Sequences in the AND/OR Graph.....	151
4.5.8	Tree Configurations.....	151
4.6	Geometrically Constrained Products.....	153
4.6.1	Subassembly Selection in Topologically Constrained Products.....	153
4.6.2	Geometric Constraints.....	154
4.6.3	Graphical Methods.....	156
4.6.3.1	State Diagrams.....	156
4.6.3.2	AND/OR Graphs.....	157
4.7	Conclusion.....	158
	Appendix 4A Binomial Coefficients, Stirling Numbers of the Second Kind, Bell Numbers, and Catalan Numbers.....	159
4A.1	Binomial Coefficients.....	159
4A.2	Stirling Numbers of the Second Kind.....	160
4A.3	Bell Numbers.....	160
4A.4	Catalan Numbers (Also Known as Segner Numbers).....	160
	Appendix 4B: Tables of Binomial Coefficients, Stirling Numbers of the Second Kind, and Bell Numbers.....	161
	Appendix 4C: Tables of Maximum Number of Features for Unconstrained Products.....	162
	Appendix 4D: Tables of Maximum Number of Features for String and Star Configurations.....	164
	References.....	165

Chapter 5	Geometrical Constraints and Precedence Relationships	167
5.1	Introduction	167
5.2	Earlier Research on Precedence Relationships	169
5.2.1	Connection-Oriented Precedence Relationships.....	169
5.2.2	Subassembly-Oriented Precedence Relationships	170
5.3	Bourjault's Method	171
5.3.1	Introduction	171
5.3.2	Primitive Tables.....	171
5.3.3	Bourjault's Tree.....	173
5.3.4	Reduction of Bourjault's Tree	175
5.3.5	Number of Queries.....	175
5.4	The Cut-Set Method.....	176
5.4.1	Connection-Oriented Approach: Superset and Subset Rules	176
5.4.2	Subassembly-Oriented Approach.....	178
5.4.3	Technical Constraints	183
5.4.4	Redundancy	185
5.4.5	The Sequential Method	185
5.4.6	Reverse Method	188
5.5	A Moderately Complex Example	190
5.5.1	Sequential Method	190
5.5.2	Reverse Method	191
5.5.3	Fasteners	194
5.6	<i>m</i> -Disassemblable Products	197
5.7	Complex AND/OR Relationships	200
5.8	Three-Dimensional Applications	202
5.9	Disassembly Precedence Graphs	206
5.9.1	General	206
5.9.2	Number of Sequences	208
5.9.2.1	Iterative Method.....	208
5.9.2.2	Direct Method.....	212
5.9.3	Number of Selection Rules.....	213
5.9.4	Construction of Disassembly Precedence Graphs.....	214
5.10	Constrained Connection Diagrams	219
5.11	Conclusion.....	222
	References.....	223

Chapter 6	Surface- and Direction-Oriented Analysis, and Modularity	227
6.1	Introduction	227
6.2	Product Representation and Classes.....	228
6.3	Surface-Oriented Analysis	230
6.3.1	General	230
6.3.2	Movability Analysis	230

6.3.3	Disassembly Direction	232
6.3.4	Detachability Analysis	236
6.3.5	Automated Derivation of Selection Rules with Arbitrary Surfaces	237
6.3.6	Destructive Disassembly	239
6.4	Direction-Oriented Approach	240
6.4.1	Obstruction Diagrams	240
6.4.2	Support of the Complete Cut-Set Method	241
6.4.3	Motion Analysis	244
6.4.4	Detachability Analysis and Disassembly Sequence Generation	251
6.4.5	Aggregation of Components	252
6.4.6	Alternative Matrix Representations	253
6.4.6.1	Disassembly Precedence Matrices	253
6.4.6.2	Reduced Disassembly Precedence Matrices	254
6.4.7	Parallel Disassembly Aimed at Component Recovery	255
6.4.8	Removing Redundancy	257
6.5	Interference Graphs	259
6.6	Modularity Analysis	261
6.6.1	Introduction	261
6.6.2	Weighted Connection Diagram	262
6.6.3	Graph Decomposition	264
6.6.3.1	Complete Separation	264
6.6.3.2	Merging	265
6.6.4	Biconnected Graph Analysis	265
6.6.4.1	Core Component Method	265
6.6.4.2	Biconnected Graph Disconnection	266
6.6.4.3	Fastener-Oriented Method	266
6.6.5	Functional Analysis	267
6.6.6	Stability-Oriented Analysis	269
6.6.7	Matrix-Based Modularity Analysis	270
6.6.8	Cluster Graph Analysis	271
6.6.9	Functionality Metrics	272
6.6.10	Concluding Remark	274
6.7	Stability Analysis	274
6.7.1	Introduction	274
6.7.2	Gravitation	274
6.7.3	Connections	275
6.7.4	Matrix-Based Stability Analysis	276
6.7.4.1	Stability Matrices and Stability-Directed Graphs	276
6.7.4.2	Modified Interference Matrices	278
6.7.5	Conclusion	279
6.8	Force-Flow Analysis	279
6.9	Conclusion	281
	References	281

Chapter 7	Selecting the Optimum Disassembly Sequence	287
7.1	Introduction	287
7.2	Sequence Independent Costs	289
7.2.1	Introduction	289
7.2.2	Early Methods	289
7.2.3	Linear Programming (LP) Methods	293
7.2.3.1	Early LP Approach	293
7.2.3.2	Linear Programming Method, Network Approach.....	296
7.2.4	Applications	299
7.2.4.1	Optimum Solution	299
7.2.4.2	Suboptimum Solutions.....	300
7.2.4.3	Maximum Parallelism.....	301
7.2.4.4	Detaching Selected Component(s)	302
7.2.4.5	Detaching Selected Component(s) with Additional Constraints	303
7.2.5	Clustering	304
7.2.6	Further Work on Mathematical Programming	308
7.3	Sequence Dependent Costs, Heuristics, and Restricted Exact Methods	308
7.3.1	Heuristic Approaches	308
7.3.2	Exact Approaches Confined to Sequential Disassembly	311
7.4	Rigorous Exact Methods.....	314
7.4.1	Introduction	314
7.4.2	Unconstrained Problem.....	314
7.4.2.1	Rigorous Approach	314
7.4.2.2	Iterative Approach.....	316
7.4.3	Constrained Problem in Disassembly AND/OR Graph, Rigorous Approach	319
7.4.3.1	Introduction.....	319
7.4.3.2	Model Formulation	321
7.4.3.3	Alternative Formulations	323
7.4.3.4	Discussion	323
7.4.4	Constrained Problem in Disassembly AND/OR Graph, Iterative Approach	324
7.4.5	Constrained Problems with Disassembly Precedence Graphs	327
7.4.6	Conclusions	329
7.5	Demand-Dependent Problems	330
7.5.1	Introduction	330
7.5.2	Single-Product Case	333
7.5.3	Multiproduct Case.....	334
7.6	Conclusion.....	336
	References.....	336

Part 3

Disassembly Planning..... 339

Chapter 8 Disassembly to Order Problems: Multicriteria Methods 341

8.1	Introduction	341
8.2	Multicriteria Methodologies	342
8.3	Goal Programming	342
8.3.1	Introduction	342
8.3.2	Goal Programming Model for a DTO System	343
8.3.2.1	The Goals	343
8.3.2.2	Total Profit Value and Related Terms	344
8.3.2.3	The Constraints	347
8.3.2.4	The GP Model	349
8.3.2.5	Procedure to Solve the GP Model	349
8.3.3	A Case Example	350
8.3.3.1	Input Data for the Case Example	350
8.3.3.2	Results of the Case Example	351
8.4	Linear Physical Programming	353
8.4.1	Introduction	353
8.4.2	Procedural Overview of Linear Physical Programming	356
8.4.3	Linear Physical Programming Model for a DTO System	359
8.4.3.1	A Case Example	359
8.4.3.2	The Goals	361
8.4.3.3	The Constraints	367
8.4.3.4	Results of the Case Example	368
8.5	Conclusion	370
	References	370

Chapter 9 Disassembly Line Balancing Problems 373

9.1	Introduction	373
9.2	An Assembly Line vs. a Disassembly Line	373
9.2.1	Introduction	373
9.2.2	Challenges	374
9.2.2.1	Challenges Associated with the Product	374
9.2.2.2	Challenges Associated with the Disassembly Line	374
9.2.2.3	Challenges Associated with the Components	374
9.2.2.4	Operational Challenges	374
9.2.2.5	Demand Challenges	375
9.2.2.6	Assignment Challenges	376
9.2.2.7	Other Challenges	376
9.3	Balancing a Disassembly Line	376
9.4	Description of the DLBP	378
9.4.1	Introduction	378

9.4.2	The First Objective	378
9.4.3	The Second Objective	378
9.4.4	The Third Objective	380
9.4.5	The Fourth Objective	381
9.5	Heuristic and Metaheuristic Methods for Solving the DLBP.....	381
9.5.1	Introduction	381
9.5.2	Greedy Model Description and the Algorithm.....	382
9.5.3	2-Opt Description and the Algorithm.....	386
9.5.4	Ant Colony Optimization Metaheuristic Model Description.....	389
9.5.4.1	DLBP-Specific Qualitative Modifications.....	390
9.5.4.2	DLBP-Specific Quantitative Values and the DLBP ACO Algorithm	391
9.6	Conclusion.....	395
	References.....	396
	Author Index	399
	Subject Index	405
