<i>Preface</i>	xv
<i>Notation conventions</i>	xx
 UNIT I INTRODUCTION	 1
1 One human language or two?	3
1.1 Separating the code from the mode: the role of linguistic theory	4
1.1.1 <i>The word and its structure</i>	6
1.1.2 <i>Sublexical units</i>	8
1.1.3 <i>The sentence</i>	11
1.2 The mode and its implications for the study of language	16
 UNIT II MORPHOLOGY	 19
2 Morphology: introduction	21
3 Inflectional morphology	23
3.1 Verb agreement	23
3.1.1 <i>Sign language verb agreement – basic description</i>	24
3.1.2 <i>Sign language verb agreement – additional complexities</i>	29
3.1.3 <i>Sign language verb agreement – accounting for verb classes</i>	31
3.1.4 <i>Determining agreement from nominal controllers</i>	34
3.1.5 <i>Determining agreement based on the thematic structure of verbs</i>	35
3.1.6 <i>Number agreement</i>	39

3.1.7	<i>Non-manual marking of agreement</i>	42
3.1.8	<i>Verb agreement summary</i>	46
3.2	Verbal aspect	47
3.3	Pluralization	50
3.4	Models of templatic morphology	51
4	Derivational morphology	55
4.1	Templatic derivational morphology in sign languages	55
4.1.1	<i>Templatic derivational morphology in ASL</i>	55
4.1.2	<i>Allomorphy</i>	58
4.1.3	<i>An ASL morpheme</i>	59
4.1.4	<i>Morphemes realized on the face</i>	60
4.2	Morpheme sequences: non-templatic derivational morphology in sign languages	63
4.2.1	<i>Sequential morphology in ASL</i>	64
4.2.2	<i>Sequential morphology in Israeli Sign Language</i>	69
4.3	Compounds	72
4.3.1	<i>Lexicalized and novel compounds</i>	72
4.3.2	<i>Coordinate compounds</i>	73
4.4	Interim summary	74
5	Classifier constructions	76
5.1	A basic description	77
5.2	Verbal classifiers and Noun Incorporation	83
5.2.1	<i>Properties of classifiers that evolved from Noun Incorporation</i>	85
5.3	Classifier constructions: bound morphemes combined postlexically	89
5.4	Understanding classifier constructions through poetry	92
5.5	Conclusion	93
6	Entering the lexicon: lexicalization, backformation, and cross-modal borrowing	94
6.1	Classifier constructions: from postlexical to lexical and back again	95
6.1.1	<i>Prosodic transformation under lexicalization</i>	97
6.2	Productivity and lexicalization: the case of SAUNTER	98
6.2.1	<i>Spatial verbs as lexicalized classifier constructions</i>	102
6.3	Foreign vocabulary	104
6.3.1	<i>Mouthing is sign, not speech</i>	104

6.3.2	<i>Borrowing through fingerspelling: structure, meaning, and iconicity</i>	105
7	Morphology: conclusion	108
UNIT III	PHONOLOGY	111
8	Meaningless linguistic elements and how they pattern	113
9	Sequentiality and simultaneity in sign language phonology	120
9.1	Liberation of the segment: excursus on non-linear theories of phonology and morphology	122
9.2	Sequential Structure in the sign	123
9.3	The Move–Hold model: sequential segments in sign language	128
9.4	The Hand Tier model: hand configuration as an autosegment	132
9.5	The phonology of non-linear morphology in sign language: prosodic templates	139
9.6	Conclusion	142
10	Hand configuration	144
10.1	Parameters of contrast	145
10.2	Hierarchical representation of feature classes: handshape	151
10.2.1	<i>Feature Geometry in spoken language phonology</i>	152
10.2.2	<i>The geometry of selected fingers and finger position</i>	152
10.2.3	<i>The representation of internal movement</i>	154
10.3	Orientation and the hand configuration hierarchy	156
10.4	Terminal features	159
10.4.1	<i>Unariness and markedness in handshapes</i>	160
10.4.2	<i>Orientation features</i>	166
10.4.3	<i>Phonetic redundancy and other predictable properties</i>	168
10.5	Where is hand configuration in the overall phonological model?	169
10.6	Summary and conclusion	171
11	Location: feature content and segmental status	174
11.1	Two classes of location features	174

11.2	A 3-D hierarchy of signing spaces	179
11.3	Summary and unresolved issues	181
12	The non-dominant hand in the sign language lexicon	182
12.1	The two-role theory	183
12.2	The one-role theory: a dependency model	189
12.3	Advantages and disadvantages of each theory of h2	192
12.4	Phonology vs. phonetics, and the central consensus	194
12.5	The roles of the non-dominant hand beyond the lexicon	195
13	Movement	196
13.1	The movement category: preliminary description	197
13.2	Evidence for a movement category	199
13.3	Representation of movement as a sequential segment	202
13.4	Another proposal: movement as prosody	206
	13.4.1 Discussion	210
13.5	Movement in words is constrained	214
14	Is there a syllable in sign language?	216
14.1	The sign language syllable: preliminary description	217
14.2	Theoretical background: the syllable in spoken language	218
14.3	The sign language syllable as a timing unit	219
14.4	Distinguishing the sign language syllable, the morpheme, and the word: constraints on structure	220
	14.4.1 Constraints on the syllable	221
	14.4.2 Morpheme structure constraints	223
	14.4.3 The word	226
14.5	The monosyllable conspiracy and other syllable level generalizations	227
	14.5.1 The monosyllable conspiracy	228
	14.5.2 Stress	231
	14.5.3 Final syllable reduplication	232
14.6	Sonority in sign language	235
	14.6.1 Sonority in a sequentially organized syllable	236
	14.6.2 Other theories of sonority	238
	14.6.3 Sonority versus loudness	241
	14.6.4 Sonority summary: assessing the relation between visual salience and linguistic sonority	243
14.7	Syllables and sonority: conclusion	244

15	Prosody	246
15.1	The Prosodic Word	247
15.2	The Phonological Phrase	250
15.3	The Intonational Phrase and intonation in sign language	253
15.4	Superarticulation: facial expression as intonation	257
15.4.1	<i>Superarticulation is linguistic</i>	258
15.4.2	<i>Superarticulation is componential</i>	259
15.4.3	<i>The physical instantiation of intonation versus superarticulation</i>	260
15.4.4	<i>Grammaticization and language specificity of superarticulation</i>	261
15.4.5	<i>Linguistic and nonlinguistic superarticulation</i>	262
15.5	Nonisomorphism	264
15.6	Summary, conclusion, and future research	265
16	Phonology: theoretical implications	266
16.1	Consensus and unresolved issues	266
16.2	The architecture of the phonological component: lexical, postlexical, and non-lexical	268
16.2.1	<i>Lexical and postlexical phenomena in sign language</i>	269
16.2.2	<i>A non-lexical level in sign language</i>	271
16.3	Universals and modality effects in both modalities	272
UNIT IV	SYNTAX	279
17	Syntax: introduction	281
17.1	Unit overview	281
17.2	The generative approach	284
18	Clausal structure	288
18.1	Basic word order	289
18.2	Embedding	298
18.3	Phrase structure	300
18.3.1	<i>Generative approaches to phrase structure</i>	301
18.3.2	<i>Do sign language sentences have structure?</i>	304
18.3.3	<i>Mini-topicalization</i>	308

18.3.4	<i>Split headedness</i>	309
18.3.5	<i>Non-manual markers as key to phrase structure</i>	310
18.3.6	<i>Modals provide evidence for phrase structure</i>	315
18.4	Summary and conclusion	318
19	Clausal structure across sign languages	320
19.1	Auxiliary signs	321
19.2	LSB phrase structure	323
19.2.1	<i>A universal theory of phrase structure</i>	323
19.2.2	<i>Verb types in LSB</i>	325
19.3	LSB compared with ASL	332
20	Variations and extensions on basic sentence structures	334
20.1	DP structure	335
20.1.1	<i>Determiners</i>	339
20.1.2	<i>Adjectives and quantifiers</i>	341
20.2	The syntax of classifier constructions	344
20.2.1	<i>A Noun Incorporation analysis</i>	344
20.2.2	<i>Classifiers as agreement</i>	348
20.3	Verb sandwiches and object shift	352
20.4	Negatives	358
20.4.1	<i>Phrase structure of negation</i>	359
20.4.2	<i>Negative headshake</i>	364
21	Pronouns	369
21.1	Overt pronouns	371
21.1.1	<i>Personal pronoun system – description</i>	371
21.1.2	<i>Personal pronoun system – issues</i>	374
21.1.3	<i>Point of view and logophoricity</i>	379
21.2	Two kinds of null arguments in ASL?	389
21.2.1	<i>Null arguments and agreement</i>	389
21.2.2	<i>Null arguments without agreement</i>	390
21.2.3	<i>Null arguments in ASL</i>	393
21.2.4	<i>Are null arguments in ASL uniformly licensed by agreement?</i>	398
22	Topic and focus	404
22.1	Information packaging	404
22.2	Topics in sign languages	406

22.3	Information packaging in ASL	413
22.4	Double constructions	416
	22.4.1 <i>Focus doubling in ASL</i>	416
	22.4.2 <i>Focus doubling in LSB</i>	423
	22.4.3 <i>Doubles versus tags</i>	425
22.5	Clefting: so-called rhetorical questions	427
23	WH-questions	431
23.1	A cross-linguistic look at WH-questions	432
23.2	Is WH-movement to left or right?	435
	23.2.1 <i>WH-questions with more than one WH-phrase</i>	437
	23.2.2 <i>Sentence-initial WH-objects</i>	445
	23.2.3 <i>Sentence-final WH-subjects</i>	448
	23.2.4 <i>Spread of WH-question non-manual marker</i>	449
	23.2.5 <i>Indirect questions</i>	452
23.3	Interim summary	454
23.4	LSB WH-movement	455
23.5	WH-questions and intonation	459
	23.5.1 <i>Sentence structure and presence of WH-question non-manual marker</i>	464
	23.5.2 <i>Sentence structure and spread of WH-question non-manual marker</i>	468
23.6	Conclusions	470
24	Syntax: summary and directions	472
24.1	Summary	472
24.2	Future research	473
24.3	Modality effects	474
UNIT V	MODALITY	475
25	The effects of modality: linguistic universals and sign language universals	477
25.1	Signed languages and linguistic universals	477
25.2	The use of space	479
	25.2.1 <i>Pronouns and the use of space</i>	481
	25.2.2 <i>Verb agreement and the use of space: linguistic and extralinguistic aspects</i>	482
	25.2.3 <i>Other uses of space</i>	488

25.3	Simultaneity	489
25.3.1	<i>Motivatedness and simultaneity</i>	491
25.3.2	<i>Production/perception and simultaneity</i>	492
25.3.3	<i>Processing and simultaneity</i>	492
25.4	Iconicity/motivatedness	493
25.4.1	<i>Iconic motivation at the lexical level</i>	496
25.4.2	<i>Iconic motivation in morphological processes of all sign languages</i>	500
25.4.3	<i>Motivatedness can penetrate phonology</i>	501
25.5	Language age and language structure	503
25.5.1	<i>Resolving the contradiction</i>	504
25.5.2	<i>Diachronic development of sign-language- typical morphology</i>	507
25.6	Conclusion, implications, and directions for future research	508
