

Table of Contents

1. Introduction	1
1.1 The concept and intention of this work	1
1.2 Relevance of this project for the field of information science	18
1.3 The <u>Nietzsche-Network</u>	21
2. Working definitions of the key terms	34
2.1 Information – knowledge – communication	34
2.2 Computer-mediated communication	40
2.3 Interactivity	42
2.4 Hypertext	46
3. Building a hypertext	48
3.1 The adaptation of linear texts	48
3.2 Different hyperlink types	52
3.3 Link patterns in hypertext	55
4. Presence in virtual reality	64
4.1 Different conceptualizations of presence	64
4.2 Effects of presence	70
4.3 Application: How to create a sense of presence	71
4.3.1 Causes of presence in an invisible medium	71
4.3.2 Causes of presence in a transformed medium	74
5. Nietzsche's Homepage – A thought experiment	76
5.1 The motley scenery and open sea	76
5.2 Body and life	77
5.3 "For Intellectuals Only"	78
5.4 Masks and veils (aesthetics)	79
5.5 Teachings and prophecy	80
5.6 Nietzsche's understanding of science	82
5.7 The philosopher and truth	83
5.8 Getting too close to Nietzsche?	83

5.9 “Nietzsche’s Homepage” as one possible approach among others: Introducing other scientific and philosophical concepts	85
---	----

6. Positivism	87
6.1 Introduction to positivism	87
6.2 Positivistic literary theory	87
6.3 Application of positivism to an I&C system	88
7. Critical rationalism	90
7.1 Introduction to critical rationalism and Popper’s legacy	90
7.2 Questioning critical rationalism: the utopia of scientific communication versus the theory of information withholding	93
7.3 Application of critical rationalism to an I&C system	97
8. Hermeneutics	101
8.1 Introduction	101
8.2 The interpretation of historical texts	106
8.3 Gadamer’s concept of “higher objectivity” with regard to historicity	107
8.4 Theories of communication applied to hermeneutics	109
8.5 Habermas’ theory of communicative action	109
8.6 Application of hermeneutics to an author-centered I&C system	111
8.7 Practical example: The application of Dilthey’s historical hermeneutics to the <u>Nietzsche-Network</u>	121
9. Constructivism	127
9.1 Introduction to constructivism	127
9.2 Is science possible in constructivism?	130
9.3 The concept of socially shared cognition and the question of historicity	131
9.4 Glasersfeld’s constructivism and learning theory	132
9.5 Alternative definition of constructivism by Siegfried J. Schmidt – criticism of Glasersfeld’s learning theory	135
9.6 The application of constructivist concepts to an I&C system	137
9.6.1 Practical principles for developing instructional environments	137
9.6.2 Educational hypertext	145

10. Reflecting upon the preceding approaches from the point of view of contemporary discourse ethics	147
10.1 Introduction to Holger Burckhart's discourse ethics	147
10.1.1 The universal validity claim in dialogue or discourse situations	147
10.1.2 The real and the anticipated ideal communication community	152
10.1.3 The role of language	155
10.2 Language as the topic of hermeneutics	159
10.3 Applying Burckhart's discourse ethics to hermeneutics (criticism of Gadamer)	162
10.3.1 Introduction to the revision of Gadamer's hermeneutics	162
10.3.2 Re-defining the dialogical aspect	163
10.3.3 Extending Gadamer's hermeneutics through the dimension of inter-subjectivity	164
10.3.4 Against the equation of comprehension and consent which makes the interpreter subservient to the authority of the interpretandum	166
10.3.5 Kuhlmann: The answer as the paradigm for the hermeneutic pursuit	168
10.4 Reflection upon aspects of constructivism	169
10.4.1 The problem of applying the concept of 'Autopoiesis' to instructional situations	169
10.4.2 Reich's dialogical, interactional constructivism	171
10.4.3 Using the systemic-interactional-constructivist model for teaching-learning	173
10.4.4 Problems and proposed corrections of Reich's model	175
10.4.5 Burckhart's dialogical-discursive teaching-learning model	179
10.5 Application: The "Power Map" (PowerPoint Tour) as the Explorer's Journal	184

11. Modernist and postmodernist thinking	192
11.1 Introduction to modernist and postmodernist concepts	192
11.2 Characteristics and concepts of postmodernity	195
11.2.1 The departure from Grand Narratives and authentic representation: The ideal of simulation, the art of citation, plurality of views, fragmentation and discontinuity	195
11.2.2 The postmodernist approach to history	197
11.2.3 The orientation problem – narration as orientation in postmodern essay writing	199
11.2.4 Communication problems	201
12. Postmodern practices of text interpretation	204
12.1 From structuralism to poststructuralism	204
12.2 The theory of deconstruction	207
12.3 Applying the theory of deconstruction to the <i>Nietzsche-Network</i>	210
13. The realization of poststructuralist concepts in a hypertextual I&C system	214
13.1 Overview	214
13.2 The role of the author in hypertext – “death of the author”?	217
13.3 Roland Barthes: readerly text versus writerly text	218
13.4 Narration in hypertext	
13.5 Problems of hypertext: The fragmented, dispersed, borderless text	225
14. Implementing postmodern media characteristics into an I&C system	227
14.1 Psychological suggestion and discomfort	227
14.2 Distrust (“Misstrauensvotum”)	229
14.3 Desire for coherence and contextualization	231
14.4 Suspicion of the media and of seduction	232
14.5 Disappointment and frustration	233
14.6 Parasites	234
14.7 Leaping across precipices	234
14.8 Hurried transfer	235
14.9 Application to the <i>Nietzsche-Network</i>	236

15. The expression of the postmodern culture in online communication systems	243
15.1 The postmodern culture of simulation and visualization	243
15.2 Multi-User-Domains (MUDs)	245
15.3 Play and performance in computer-mediated communication	246
15.4 Application to the <i>Nietzsche-Network</i>	252
16. The characteristics and problems of online discourse communities	256
16.1 The relational aspects of computer-mediated communication	256
16.2 Language in computer-mediated communication	259
17. Strategies to reduce or solve the problems in online discourse communities	264
17.1 Netiquette and conduct control	264
17.2 Appointing a moderator	269
17.3 Factors related to participation in bulletin boards	276
17.4 Participation by self-selection: the formation of in-groups	283
17.5 The problem of in-groups: conflict evasion	284
18. The structural design and visualization of chat and bulletin board systems	287
18.1 Interactional coherence in computer-mediated communication	287
18.1.1 Problems with sequential coherence	288
18.1.2 Implementing structural features that support interactional coherence	290
18.2 Implementing collaborative discourse structures into a bulletin board system	293
18.2.1 Defining the goals	293
18.2.2 Implementation of a classification system	296
18.3 Detailed design for the bulletin board of the <i>N-N</i>	299
18.3.1 The typification of postings based on the KHS	299
18.3.2 Example: The Unesco-Forum run by "ComFor" based on the KHS	301

19. Visualizing computer-mediated conversation	303
19.1 Defining the goals and basic rules	303
19.2 The mapping of discourse structures in bulletin boards	304
19.2.1 Example: Visualize voting in bulletin board systems	305
19.2.2 Example: “Loom” – Visualize bulletin board discussions	306
19.3 The visualization of synchronous computer-mediated communication – Example: The conversational interface of “Chat Circles”	308
 20. Discussion of selected state-of-the-art Internet Websites featuring Nietzsche	 311
 Bibliography	 327

German Version (Kurzfassung):

Eine Auseinandersetzung mit Nietzsche im Internet

Inhaltsverzeichnis

1. Anlass und Aufgabenstellung der Arbeit	347
2. Das Nietzsche-Netzwerk	352
3. Die Vorgehensweise dieser Arbeit	353
4. Informationswissenschaftliche Vorüberlegungen	355
5. Nietzsches Homepage	363
6. Positivismus	367
7. Kritischer Rationalismus	369
8. Hermeneutik	371
8.1 Die Geschichte der Hermeneutik	371
8.2 Kunstregeln des Verstehens	372
8.3 Die Metapher der Zeitreise als mögliche Umsetzung von Heideggers Hermeneutik und der „Neuen Kritik“	375
8.4 Die Anwendung von Diltheys historisch-hermeneutischem Ansatz auf das Nietzsche-Netzwerk	376
9. Konstruktivismus	385
9.1 Radikaler und gemäßigter Konstruktivismus	385
9.2 Informationswissenschaftliche Einwände gegen Konstruktivismus und Konsorten	389
10. Dialog und Diskurs	391
11. Moderne und Postmoderne	394
12. Dekonstruktion	396
13. Poststrukturalismus	398

14. Spielen mit Identitäten	400
15. Eine Problemlösung (Pazzini)	403
16. Die Konzipierung eines online Diskussions-Forums	407
17. Schlussfolgerungen für das Projekt „Nietzsche-Netzwerk“	412
Literatur	414
