Acknowledgments	x
Introduction	xi
Part I: Trauma, Effects, and Assessment	1
1. What Is Trauma?	3
Major Types of Trauma	4
Natural Disasters	5
Mass Interpersonal Violence	5
Large-Scale Transportation Accidents	6
House or Other Domestic Fires	6
Motor Vehicle Accidents	6
Rape and Sexual Assault	7
Stranger Physical Assault	7
Partner Battery	8
Torture	8
War	9
Child Abuse	9
Emergency Worker Exposure to Trauma	9
The Problem of Combined and Cumulative Traumas	10
Suggested Reading	11
2. The Effects of Trauma	13
What Makes Trauma Responses More Likely, More Intense, or More Complicated?	14
Victim Variables	14
The Role of Gender and Race	15
Characteristics of the Stressor	16
Social Response, Support, and Resources	16
Types of Posttraumatic Responses	17
Depression	17
Anxiety	19

Stress Disorders	21
Dissociation	25
Somatoform Responses	27
Brief Psychotic Disorder With Marked Stressor	28
Drug and Alcohol Abuse	30
Complex Posttraumatic Presentations	31
“Complex PTSD”	31
Borderline Personality Disorder	32
Medical Sequelae of Trauma	33
Trauma Syndromes in Non-Western Cultures	34
Suggested Reading	34
3. Assessing Trauma and Posttraumatic Outcomes	37
Assessment in the Clinical Interview	37
Immediate Concerns	37
Assessing Trauma Exposure	40
Evaluating the Effects of Trauma	44
Psychosis in the Context of Posttraumatic Response	56
The Structured Interview	57
The Clinician-Administered PTSD Scale (CAPS)	57
The Acute Stress Disorder Interview (ASDI)	58
The Structured Interview for Disorders of Extreme Stress (SIDES)	58
The Structured Clinical Interview for DSM-IV Dissociative Disorders-Revised (SCID-D)	58
The Brief Interview for Posttraumatic Disorders (BIPD)	58
Psychological Tests	59
Generic Tests	59
Trauma-Specific Tests	60
Assessment of Physical Health	62
Suggested Reading	63
Part II: Clinical Interventions	65
4. Central Issues in Trauma Treatment	67
A Basic Philosophy of Trauma, Recovery, and Growth	67
Respect and Positive Regard	69
Hope	69
Central Treatment Principles	70
Provide and Ensure Safety	71
Provide and Ensure Stability	72

Maintain a Positive and Consistent Therapeutic Relationship	74
Tailor the Therapy to the Client	75
Take Gender Issues Into Account	78
Be Aware of—and Sensitive to—Sociocultural Issues	80
Monitor and Control Countertransference	82
Suggested Reading	84
5. Psychoeducation	87
Handouts	88
Books	89
Verbal Information During Therapy	89
General Focus	90
Constraints	92
Suggested Reading	93
6. Distress Reduction and Affect Regulation Training	95
Dealing With Acute Intrusion: Grounding	96
Intervening in Chronic Affect Dysregulation	98
A Note on Medication	98
Relaxation and Breath Control	99
Increasing General Affect Regulation Capacity	101
Suggested Reading	107
7. Cognitive Interventions	109
Cognitive Processing	109
Developing a Coherent Narrative	115
Cognitive Changes Arising From	
Non-Overwhelming Emotional Activation	116
Cognitive Interventions and Insight	117
Suggested Reading	119
8. Emotional Processing	121
Reexperiencing as Trauma Processing	123
The Therapeutic Window	125
Intensity Control	126
Constraints on Trauma Processing	127
The Components of Trauma Processing	128
Exposure	128
Activation	132
Disparity	138
Counterconditioning	139
Desensitization/Resolution	140

Processing “Hot Spots”	140
An Example of Hot Spot Processing	143
Emotional Processing and Substance Dependence	144
Emotional Processing From Another Perspective: EMDR	146
Sequence and Session-Level Structure of Memory Processing	147
Suggested Reading	148
9. Increasing Identity and Relational Functioning	149
Identity Problems	150
Intervention	151
Relational Disturbance	153
Intervention	155
Suggested Reading	164
10. Treating the Effects of Acute Trauma	165
Research on Acute Traumatic Stress	166
Acute Symptoms and Risk for PTSD	166
The Literature on Interventions for Acute Stress	167
Cognitive-Behavioral Intervention	170
Intervention in Acute Posttraumatic Stress	171
Immediate Assessment	172
Referral	174
Treatment	174
Suggested Reading	183
11. Biology and Psychopharmacology of Trauma	185
The Psychobiology of Trauma	186
The HPA Axis and the Adrenergic System	187
Other Biological Correlates of PTSD	189
Findings From Neuroimaging Studies	189
Integrating Biological Models With the Self-Trauma Model	190
Trauma Psychopharmacology	192
Psychotherapy and Psychopharmacology	193
Treatment Outcome Studies and the Limitations of Medications in Posttraumatic Stress	194
Pregnancy and Lactation	195
Alternative Therapy and Psychotropic Medications	196
A Note on the Uses and Limitations of This Chapter	198
Medications for PTSD	199
Antidepressants	199

Benzodiazepines	207
Mood Stabilizers	210
Adrenergic Agents	213
Antipsychotics	216
Medications for Trauma-Related Psychosis	220
Medications for Acute Traumatic Stress	221
Benzodiazepines	222
Antidepressants	222
Adrenergic Agents	223
Other Agents	223
Medications for Sleep	223
Strategy for Medicating Sleep	
Disturbances in Posttraumatic Stress	226
Medications for Dissociation	227
Medications for Other Comorbid Disorders	228
Suggested Reading	229
12. Conclusions	231
References	233
Appendix 1: Initial Trauma Review-3 (ITR-3)	263
Appendix 2: Brief Interview for Posttraumatic Disorders (BIPD)	269
Appendix 3: Breath Training Protocol	279
