Preface	ix
<i>Steven Greenberg</i>	

I INTRODUCTION

1 Auditory Processing of Speech	3
<i>William Ainsworth and Steven Greenberg</i>	

II ACOUSTIC AND PERCEPTUAL CUES GERMANE TO THE PERCEPTION OF SPEECH

2 Perception of Highly Dynamic Properties in Speech	21
<i>Astrid van Wieringen and Louis Pols</i>	
3 The Significance of Temporal Modulation Frequencies for Speech Intelligibility	39
<i>Rob Drullman</i>	
4 Perception of Dynamic Properties of Speech: Peripheral and Central Processes	49
<i>Diane Kewley-Port and Amy Neel</i>	

III ANATOMICAL AND PHYSIOLOGICAL BASES OF SPEECH PERCEPTION

5 From Cochlea to Cortex: A Simple Anatomical Description	65
<i>Carole M. Hackney</i>	
6 Neuroanatomical Considerations of Speech Processing	79
<i>Joe C. Adams</i>	

7	Anatomy of the Auditory Cortex <i>Eike Budinger and Peter Heil</i>	91
8	Adequacy of Auditory-Nerve Rate Representations of Vowels: Comparison With Behavioral Measures in Cat <i>Murray B. Sachs, Brad J. May, G. S. Le Prell, and Robert D. Hienz</i>	115
9	Temporal Processing in Cat Primary Auditory Cortex: Dynamic Frequency Tuning and Spectro-Temporal Representation of Speech Sounds <i>Christoph E. Schreiner, Sarah W. Wong, and Hubert R. Dinse</i>	129
10	Anatomical and Physiological Bases of Speech Perception <i>Georg Meyer</i>	143

IV NEUROETHOLOGICAL PARALLELS TO SPEECH PROCESSING

11	Basic Acoustic Patterns and Neural Mechanisms Shared by Humans and Animals for Auditory Perception <i>Nobuo Suga</i>	159
12	Cross-Species Comparisons of Vocal Perception <i>Charles H. Brown and Joan M. Sinnott</i>	183
13	Contributions of Nonhuman Animal Models to Understanding Human Speech Perception <i>Keith R. Kluender, Andrew J. Lotto, and Lori L. Holt</i>	203

V ROBUSTNESS OF SPOKEN LANGUAGE IN ADVERSE ACOUSTIC ENVIRONMENTS AND ITS UTILITY FOR SPEECH RECOGNITION

14	The Perception of Speech Under Adverse Conditions: Contributions of Spectro-Temporal Peaks, Periodicity, and Interaural Timing to Perceptual Robustness <i>A. Quentin Summerfield, John F. Culling, and Peter F. Assmann</i>	223
15	Use of Temporal Codes Computed From a Cochlear Model for Speech Recognition <i>Li Deng and Hamid Sheikhzadeh</i>	237
