1 Introduction and Overview	1
1.1 The orthodox view of unemployment and economic growth	3
1.2 Stylized facts of economic growth and unemployment	6
1.3 A survey of the related literature	10
1.4 Overview of the book	18
Part I Theory	23
2 Efficiency Wages	25
2.1 Motivation	25
2.2 The household problem	27
2.3 Manufacturing	28
2.4 The innovation sector	30
2.5 The labor market	32
2.6 Equilibrium unemployment	33
2.7 Equilibrium growth	34
2.8 Conclusions	35
3 A Model of Economic Growth and Structural Change	37
3.1 Motivation	37
3.2 The demand side	39
3.3 Manufacturing	41
3.4 The service sector	41
3.5 The innovation sector	42
3.6 The new economy	44
3.7 Conclusions	49

4	Structural Change and Search Frictions	51
4.1	Motivation	51
4.2	The demand side	53
4.3	Manufacturing	56
4.4	The service sector	57
4.5	The innovation sector	58
4.6	Search unemployment	60
4.7	Endogenous growth	62
4.8	Unemployment and growth dynamics	63
4.9	Comparative dynamics	66
4.10	Conclusions	69
5	Can Long-Term Wage Accords Promote Growth and Employment?	71
5.1	Introduction	71
5.2	Related literature	73
5.3	Households and unions	74
5.4	The product market	76
5.5	Industry unions and employment	77
5.6	Equilibrium	79
5.7	Economic growth and the innovation sector	80
5.8	Unemployment and union size	82
5.9	Externalities, social optimum and long-term union policy	85
5.10	Conclusions	88
6	Aggregate Demand and Keynesian Unemployment	90
6.1	Motivation	90
6.2	Households	92
6.3	Firms, wage contracts and entry	96
6.4	Technical determinants of market entry	99
6.5	The market for consumer products and aggregate demand failures	100
6.6	Unemployment and the labor market	102
6.7	Economic growth and venture capital markets	104
6.8	Equilibrium unemployment and economic growth	107
6.9	Is it Keynesian unemployment?	110
6.10	Conclusions	111

Part II Evidence	113
7 Job Creation and Destruction?	115
7.1 Motivation	116
7.2 A simple theoretical framework	118
7.3 Related empirical literature	123
7.4 The data	124
7.5 Does economic growth determine unemployment?	125
7.6 Does economic growth exert a different impact on exits and entries?	131
7.7 Conclusions	134
8 On the Causality between Economic Growth and Unemployment	136
8.1 Introduction	136
8.2 Three very stylized theoretical models	139
8.3 The data	144
8.4 Does slow economic growth cause unemployment, or vice versa?	146
8.5 Conclusions	152
9 The Dynamics of Economic Growth and Unemployment	154
9.1 Motivation	154
9.2 Related literature	155
9.3 A simple theoretical framework	157
9.4 The data	160
9.5 The dynamic system in a vector error correction representation	161
9.6 Testing for cointegration	164
9.7 Cointegration and dynamic adjustment	167
9.8 Conclusions	170
10 Conclusions and Policy Recommendations	172
10.1 The orthodox view of unemployment and economic growth	174
10.2 Innovation-driven endogenous growth models and the resource constraint	176
10.3 Labor market imperfections and the incentive condition	178
10.4 The dynamics of economic growth and unemployment	184

9.2	Johansen cointegration test	168
9.3	Optimal number of lags in a bivariate unrestricted VECM for growth and unemployment	168
9.4	Vector error correction models for growth and unemployment in Europe	169

10.5 The scope for economic policy	186
10.6 The focus of economic policy	189
10.7 Traditional policy instruments	190
10.8 Concluding remarks	194

Appendixes

1 <i>Augmented Dickey–Fuller test statistics</i>	196
2 <i>Optimal lag length in a bivariate unrestricted VAR</i>	204
3 <i>Johansen cointegration tests</i>	206
4 <i>Optimal lag length in a bivariate unrestricted VECM</i>	208
5 <i>VECM: Germany, 4 lags and a reunification dummy</i>	210

List of Figures and Tables

Figures

1.1	The orthodox model of equilibrium unemployment and economic growth: short-run dynamics and long-run neutrality	7
4.1	The resource constraint (RC) and the incentive condition (IC)	65
4.2	The comparative dynamics of an increase in the firing rate δ	67
4.3	The comparative dynamics of an increase in innovation productivity ϕ	68
5.1	The unemployment to economic growth space	84
10.1	The orthodox model of equilibrium unemployment and economic growth: short-run dynamics and long-run neutrality	175
10.2	Resource constraint (RC) and incentive condition (IC) in the determination of the equilibrium unemployment rate and steady-state rate of economic growth	181
10.3	The dynamics of unemployment and economic growth: resource constraint (RC), incentive condition (IC), and the solution to the cointegrating relation (CR*)	185

Tables

4.1	The unemployment experience in selected OECD countries	53
7.1	Change in individual unemployment experiences due to economic growth	129
7.2	Change in exits and entries to employment due to economic growth	132
8.1	Summary statistics	145
8.2	Dickey–Fuller tests	147
8.3	Optimal number of lags in a bivariate unrestricted VAR for growth and unemployment	150
8.4	Granger causality tests	151
9.1	Optimal number of lags in a bivariate unrestricted VAR for growth and unemployment	165
