

## CONTENTS

Sponsoring Organizations .....	v
Committee Members .....	vi
Preface .....	vii
Acknowledgements .....	viii

### **I. GENERAL LECTURE**

Some Applications of Finite Element Techniques to Nonlinear Free Surface Fluid Flow Problems K. WASHIZU .....	3
Finite Element Methods for the Transient Navier-Stokes Shallow Water Wave Equations O. C. ZIENKIEWICZ, K. MORGAN, and S. NAKAZAWA.....	17
A Stable Second-Order Accurate, Finite Element Scheme for the Analysis of Two-Dimensional Incompressible Viscous Flows J. T. ODEN and O. JACQUOTTE.....	19
Methods in Numerical Weather Prediction: Where Finite Element Methods Stand? Y. K. SASAKI and L. P. CHANG .....	27

### **II. MATHEMATICAL ANALYSIS**

Analysis of Three-Dimensional Incompressible Flows by a Penalty-Finite-Element Method J. N. REDDY .....	37
On a Smoothing Scheme of Penalty/Finite Element Methods for Stokes Flow Analysis N. KIKUCHI .....	45
A Mathematical Analysis of a Finite Element Scheme for a Linearized Viscous Shallow-Water System H. KANAYAMA and T. USHIJIMA .....	51
The Asymptotic $L^\infty$ -Error Estimates for the Finite Element Approximations of Navier-Stokes Equations S.-J. CHENG .....	59
Characteristics and the Finite Element Method M. BERCOVIER and O. PIRONNEAU .....	67
A Numerov-Galerkin Technique Applied to a Finite Element Shallow-Water Equations Model with Exact Conservation of Integral Constraints I. M. NAVON.....	75
On the Stability of Fluid Motion by Finite Element Method M. M. CECCHI .....	87

### III. VISCOUS FLOW

Streamline Upwind Formulations for Advection-Diffusion, Navier-Stokes, and First-Order Hyperbolic Equations T. J. R. HUGHES, T. E. TEZDUYAR, and A. N. BROOKS . . . . . 97
Application of the Penalty Function Finite Elements to Viscous, Incompressible Flow Problems S. NAKAZAWA . . . . . 105
Penalty-Finite Element Analysis of Time-Dependent Two-Dimensional Free Surface Film Flows H. S. KHESHGI and L. E. SCRIVEN . . . . . 113
Two Step Explicit Finite Element Method for High Reynolds Number Viscous Fluid Flow H. HIRANO, H. HARA, and M. KAWAHARA . . . . . 121
Current Topics on Finite Element Analysis for Flows with Large Reynolds Number A. J. BAKER and M. O. SOLIMAN . . . . . 129
Finite Element Analysis of Convective and Viscous Flows A. ECER, P. WARD, and H. U. AKAY . . . . . 137
Finite Element Analysis of Flow Development in the Entrance Region of a Tube at Moderate Reynolds Numbers with Different Inlet Velocity Profiles Q. HASAN, R. NATARAJAN, and V. SESHA DRI . . . . . 145
Recent Progress in the Solution of the Time-Dependent, Three-Dimensional, Incompressible Navier-Stokes Equations P. M. GRESHO, C. D. UPSON, S. T. CHAN, and R. L. LEE . . . . . 153
Finite Element Methods for Viscous Stratified Flow Over a Semi-Circular Barrier R. R. HWANG . . . . . 163
A Space-Time Finite Element Based Analysis of Two-Phase Channel Flow H. NGUYEN and J. REYNEN . . . . . 171
On the Solution of the Incompressible Navier-Stokes and Boussinesq Equations via a Penalty Galerkin Finite Element Method R. L. SANI . . . . . 179
Finite Element Analysis of Rotating Flow Problems P. BAR-YOSEPH . . . . . 185
The Accelerating Convergence Method of the Finite Element Solution of the Navier-Stokes Equations S.-J. CHENG . . . . . 193
Solution of the Multi-Dimensional, Incompressible Navier-Stokes Equations Using Low-Order Finite Elements and One-Point Quadrature S. T. CHAN and P. M. GRESHO . . . . . 201
Computation of Coupled Turbulent Flow and Sediment Transport B. A. DEVANTIER and B. E. LAROCK . . . . . 211
On a Numerical Solution of Incompressible Turbulent Boundary Layer Flow C.-C. HSU and T.-H. CHANG . . . . . 219
A Treatment of Wall Boundaries for $(k-\epsilon)$ Turbulence Modelling within an Integral (Finite Element) Formulation G. D. TONG . . . . . 227

**Thermodynamical Variational Inequalities in Non-Equilibrium Processes  
and Application to Turbulent Flow Problem**

S. NIISEKI ..... 237

**IV. THERMAL CONVECTION**

**A Finite Element Model for Environmental Problems Involving Complex  
Terrain**

R. L. LEE, J. M. LEONE, Jr., P. M. GRESHO, and S. T. CHAN ..... 247

**A Transient Finite Element Analysis of Natural Convection—Approach  
Based on Stream Function and Vorticity**

M. MASUDA, Y. MIYAUCHI, M. SHIMIZU, and T. SHIMIZU ..... 255

**Computation of Consistent Boundary Quantities in Finite Element  
Thermal-Fluid Solutions**

E. A. THORNTON ..... 263

**Numerical Studies of Unsteady Free Convection Flow Past a Vertical  
Porous Flat Plate in Presence of Viscous Dissipation Heat**

A. R. BESTMAN ..... 271

**A Stream Function Finite Element Solution for Two-Dimensional  
Natural Convection**

P. L. BETTS and V. HAROUTUNIAN ..... 279

**Finite Element Analysis of Natural Convection with Penalty Function  
Method**

Y. MIYAUCHI, M. MASUDA, M. SHIMIZU, M. OHTA, K. FUJITA,  
and G. YAGAWA ..... 287

**A New Finite Element Method for Navier-Stokes Equations Coupled with  
a Temperature Equation**

J. P. BENQUÉ, G. LABADIE, and J. RONAT ..... 295

**Finite Element Analysis of Geothermal Heat Storage Problems**

N.-E. WIBERG ..... 303

**A New Finite Element Technique for the Analysis of Heat Transfer Problems**

M. IKEGAWA ..... 311

**Computational Technique for a Condensing Flow Analysis**

H. SHIDA and T. ADACHI ..... 319

**Finite Element Analysis of Free Convection in Enclosures**

H. S. KUSHWAHA and A. KAKODKAR ..... 327

**V. POLYMER FLOW**

**Simulation of Non-Isothermal Polymeric Flows in the Injection Molding  
Process**

S.-F. SHEN ..... 337

**Finite Element Analysis of Nonisothermal Polymer Processing Operations**

C. DOUGLAS and D. ROYLANCE ..... 347

**Finite Element and Boundary Element Methods in Polymer Processing  
Operations**

R. I. TANNER ..... 355

**Mathematical Modeling of Polymer Flows**

B. A. FINLAYSON and N. Y. TUNA ..... 363

**Creep Analysis of Floating Plates Using Finite Element Technique**

A. M. VINOGRADOV and M. J. LOIKKANEN ..... 371

**VI. COMPRESSIBLE FLOW**

Finite Element Methods for Compressible Flows G. J. FIX .....	381
Solvability of the Partial Differential Equation Satisfied by the Stream Function in Compressible Flow and the Error Bound in the Finite Element Solution K.-T. LI and A.-X. HUANG .....	387
Nonsimilar Solution of Compressible Laminar Boundary Layer Flows by a Semi-Discretization Method C.-C. HSU and A. LIAKOPOULOS .....	395
Finite Element Formulation of Transonic Flow Problems H. U. AKAY and A. ECER .....	403
Time-Dependent Sweep Finite Element Analysis of Transonic Flow H. SHEN, M. KEE, Q. DONG, and N. LI .....	411
Convergence of Iterations to Spurious Transonic Flow Solutions M. J. O'CARROLL .....	419
Finite Element Method Applied to Solving the Transonic Integral Equations of Three Dimensional Thin Wings Z.-S. YANG .....	425

**VII. WAVE**

New Hybrid Element Approach to Wave Hydrodynamic Loadings on Offshore Structures H. SETO.....	435
A Wave Envelope Finite Element Scheme for Acoustical Radiation R. J. ASTLEY.....	443
Dissipative Finite Element Models for Harbor Resonance Problems M. B. GANABA, L. C. WELLFORD, Jr., and J.-J. LEE.....	451
Finite Element Analysis of Diffraction and Radiation Problems of Water Waves Due to the Wave Power Absorber K. MASUDA and W. KATO .....	461
Acoustic Field Analysis by Finite Element Method T. SUZUKI .....	469

**VIII. FREE SURFACE FLOW**

Finite Element Computation of Inertia Dominated Free-Surface Flow N. D. KATOPODES.....	479
Finite Element Analysis of Finite Gravity Surges R. A. MERIC, B. TABARROK, and W. D. BAINES .....	487
A Method for the Computation of Viscous Flow by Finite Elements with Free Boundaries and Surface Tension F. DUPRET.....	495
Coating Flow Theory by Finite Element and Asymptotic Analysis of the Navier-Stokes System L. E. SCRIVEN and S. F. KISTLER.....	503

**IX. SHALLOW WATER FLOW**

A Three Dimensional Finite Element Model for Stratified Flow I. P. KING .....	513
The Influence of Boundaries on Numerical Solutions of the Shallow Water Equations N. PRAAGMAN .....	521
Three-dimensional Finite Elements for the Calculation of Circulations in a Deep Lake J. TRÖSCH .....	529
On the Behavior of a Semi-Analytic and Layered Galerkin Model for 3D Flows in Lakes with Variable Eddy Viscosity J. P. LAIBLE .....	535
An Analysis on Finite Element Methods for the Linearized Shallow Water Equations M. G. G. FOREMAN .....	547
Two-Dimensional Time Dependent Simulations of Hydro-Mass Behaviour in the Sea of Harima J. MATSUNASHI .....	555
River and Estuary Flows by a New Penalty Finite Element J. F. COCHET, G. DHATT, G. HUBERT, and G. TOUZOT .....	563
Finite Element Analysis of Coastal Process M. KAWAHARA, K. KASHIYAMA, and Y. IRIYE .....	571
Finite Element Modeling of Breaking Wave Induced Nearshore Currents C.-S. WU and P. L.-F. LIU .....	579
Modelling Impoundments During Winter Conditions L. D. SPRAGGS and S. CAMATEROS .....	587
Numerical Models and Their Calibration for the Analysis of Flow and Heat Transport Problems in Rivers U. MEISSNER, M. NARTEN, and R. RATKE .....	595
A Three Dimensional Numerical Model of Circulation and Diffusion-Advection Processes for Estuarine and Coastal Application by Finite-Element Method S. R. SIGNORINI .....	603
Two-Step Explicit Finite Element Method for Two-Layer Flow Analysis K. KASAHARA, H. HARA, W. FUJIWARA, and M. KAWAHARA .....	611

**X. SEEPAGE FLOW**

Transient Free Surface Flow Through Porous Media Using a Residual Procedure C. S. DESAI and G. C. LI .....	621
Numerical Analysis of a Fully-Coupled Problem in Ground Freezing Phenomenon Y. ICHIKAWA .....	633
Discharge of a Group of Shallow Tubewells Operating under Falling Water Table Conditions B. ANJANEYULU and S. K. SAMANTARAI .....	641
Fluid Flow and Associated Response Simulations of Hydraulic Fracturing Processes S. H. ADVANI, J. K. LEE, H. KHATTAB, and O. GURDOGAN .....	649

Fluid Flow in Fractured-Porous Rock Masses by Finite-Element Techniques R. G. BACA and R. C. ARNETT .....	657
Finite Elements and Variational Inequalities Applied to Certain Canal Seepage Problems J. C. BRUCH, Jr. and A. MIRNATEGHİ .....	665
Modelling of Transition in Regime in an Aquifer N. INDRASENAN and K. ELANGO .....	673
Analysis for Pore Pressure Response of Soil Masses in Seismic or Oceanic Environment M. S. RAHMAN and K. SADIGH .....	681
The Problem of Rebound in Subsidence Models B. A. SCHREFLER, R. W. LEWIS, and C. E. MAJORANA .....	689
Parameter Identification and Field Application of Transient Ground Water Model E. C. C. CHOI .....	697

## XI. SEDIMENT TRANSPORT

Finite Element Modeling of Sediment Transport—The State of the Art S. Y. WANG .....	707
The FE (Finite Element) and DP (Dynamic Programming) Method in Optimization of Field Problems T. FUTAGAMI .....	717
A Simple Finite Element Model to Predict Mesoscale Dispersion D. W. PEPPER .....	725
Sediment and Toxic Contaminant Transport Modeling in Coastal Waters Y. ONISHI, D. W. MAYER, and R. S. ARGO .....	733
On the Stable Finite Element Solutions of 1- and 2-Dimensional Diffusion-Convection Equations N. OKAMOTO, M. SAKAKIHARA, M. IKEUCHI, and H. NIKI .....	741

## XII. FURTHER APPLICATIONS

A Finite Element Method for Analysing the 3-D Flow in Turbomachines H. DAIGUJI .....	751
Blade-to-Blade Calculation by Finite Element: Comparison of Various Approaches F. MARTELLI .....	759
The Partial Differential Equation for the Stream Function on Any Stream Surface of Three Dimensional Flow in Turbomachine and It's Finite Element Approximation A.-X. HUANG and K.-T. LI .....	767
Approximate Solution with Compressible and Slip Boundary Conditions for a Narrow Slider Bearing Y. OTSUBO, N. KAWASHIMA, H. MARUMO, and K. OGISHIMA .....	775
Coupled Quasi-Eulerian Fluid-Structure Analyses T. BELYTSCHKO and R. MULLEN .....	783
A Numerical Treatment of Variational Problems with an Interface M. UTAMURA, S. NAKAZAWA, O. C. ZIENKIEWICZ, and N. KIKUCHI .....	789
Free Vibration Analysis of Coupled Fluid-Structure Systems K. K. GUPTA .....	797

Numerical Approximations of Coupled Fluid-Structure Systems N. TOSAKA and K. KAKUDA.....	803
Finite Element Analysis of Equilibria of Ideal MHD Plasmas in Torus Regions F. KIKUCHI and T. AIZAWA.....	811
Up-Wind Finite Element Solution of Saturated Travelling Magnetic Field Problems M. ODAMURA and M. ITO .....	819
Source and Sink Flows for a Model Gas Centrifuge Equation Using Finite Elements J. E. AKIN and M. H. BERGER.....	827
A Review of the Application of the Finite Element Method to Meteorological Flows A. STANIFORTH .....	835
Recent Advances in the Galerkin Finite Element Method as Applied to the Meteorological Equations on Variable Resolution Grids D. E. HINSMAN, R. T. WILLIAMS, and E. WOODWARD.....	843
Initializations for Numerical Weather Prediction Based on Finite Element Method W.-J. LIANG, C.-C. WANG, and C.-S. SHIEH .....	851
A Logarithmic-Linear Element for Modeling Geophysical Boundary-Layer Flows E. S. TAKLE and J. M. LEONE, Jr. ....	859
A Theoretical Model for the Exchange of Gases in the Systemic Capillaries and the Surrounding Tissues under Compression—An Application in Underwater Physiology M. P. SINGH, M. SHARAN, R. K. SAXENA, and I. MALHOTRA....	867
Thermal Modelling of Femur—Acrylic Grout—Prosthesis System by Finite Element Technique S. VALLIAPPAN, N. L. SVENSSON, and F. I. SOLIMAN.....	877

### XIII. BOUNDARY ELEMENT METHOD

Hydrodynamics Calculations Using Boundary Elements J. A. LIGGETT .....	889
Boundary Methods: Development of Complete Systems of Solutions I. HERRERA .....	897
A Higher Order Boundary Element Method for Fluid Flow C. PATTERSON and M. A. SHEIKH.....	907
A Boundary Element Approach in the Incompressible Viscous Flow M. OKABE .....	915
Water Waves: A Time-Varying Unlinearized Boundary Element Approach P. L. BETTS and T. T. MOHAMAD.....	923
A Numerical Analysis of Unsteady Separated Flow by Discrete Vortex Model Using Boundary Element Method T. INAMURO, T. ADACHI, and H. SAKATA.....	931
Extension of Boundary Elements to Lifting Compressible Aerodynamics G. F. CAREY.....	939

#### XIV. COMPUTATIONAL TECHNIQUES

The Finite Element Method and Large-Scale Computation D. H. NORRIE .....	947
Asymmetric Finite Elements for Problems Arising in Mechanics of Incompressible Continuous Media V. R. SANTOS .....	955
Generalized Reynolds' Equation and Variational Inequality in Lubrication Theory K.-T. LI and A.-X. HUANG .....	965
A Modified Trefftz Method for Fluid Flow M. A. SHEIKH and C. PATTERSON.....	973
Analysis of Stokes Flow by a Hybrid Method C. BRATIANU, L.-A. YING, and S. N. ATLURI .....	981
On the Weighted Residual Method with Two Order Spline Functions J. YE .....	989
A Mixed Finite Element Method for the Dirichlet Problem of Fourth Order Elliptic Operators with Variable Coefficients S. BALASUNDARAM and P. K. BHATTACHARYYA .....	995
A Comparison of the Finite Element and Finite Difference Methods for Computational Fluid Dynamics C. A. J. FLETCHER .....	1003
New Method Combining Finite Element Method with Finite Difference Method for Tidal Flow Computation K. HARUMI, T. KANO, H. OKADA, and A. OOTSUKI.....	1011
Optimal Control Penalty Finite Elements—Applications to Integro- differential Equations T. J. CHUNG .....	1019
A Numerical Method of Unsteady Flow Through a Mixed Flow Impeller Using Finite Element Method and Discrete Vortex Method H. SHIRAHATA and H. DAIGUJI .....	1027
The Relation between the Observed Object and the Observing Subject in Computational Hydraulics M. B. ABBOTT .....	1035
Analysis of the High Reynolds Number Viscous Flow by Means of the Stream Function and a New First Order Triangular Element M. WATANABE and T. KAWAI .....	1041
The Singularity-Separating Method Y.-L. ZHU.....	1049
Finite Differences from a Finite Element Point of View M. M. GUPTA, R. P. MANOHAR, and J. W. STEPHENSON.....	1057
Principal Solutions and Finite-Element Procedures J. C. WU .....	1063
Finite Element Least Square Methods for Problems of Mixed-Type C. H. BRUNEAU, J. J. CHATTOT, J. LAMINIE, and J. GUIU-ROUX ..	1071
A Study of Numerical Solutions to Navier-Stokes Equations H. WENNERSTRÖM and A. SAMUELSSON .....	1079
Complimentary Stochastic Techniques in Numerical Modeling of Fluids S. K. LIU .....	1087
Index of Authors .....	1095
