

Contents

1. Obstruction Sets, Minimal Rambling Sets
and Their Applications(1)
Liao Shantao
2. A Survey of Developments
of Mathematics Mechanization in China(15)
Wu Wen-tsun
3. Critical Groups, Morse Theory and Application
to Semilinear Elliptic BVPs(41)
Chang Kung-ching
4. Some Notes on Kähler-Einstein Metrics
with Positive Scalar Curvature(67)
Gang Tian
5. A Brief Introduction to Kolmogorov Complexity
and Its Applications(85)
Ming Li and Paul M.B. Vitányi
6. A Tale of Gradient Projection Methods
in Nonlinear Programming(141)
Xiang-Yun Gui and Ding-Zhu Du
7. The C^1 Closing Lemma
of 2-dimensional Non-singular Endomorphisms(155)
Lan Wen
8. Non-complete Algebraic Surfaces(171)
De-Qi Zhang

9. Using the Singularity-Separating Method to Study
How to Decrease the Pressure at the End of a Tube (185)
Xionghua Wu and Youlan Zhu
10. Remarks on Measure Branching Processes (193)
Song Shiqi
11. Yang-Mills Functional on P_3 (205)
Shuguang Wang
12. Study on Reflection of Shock Waves (217)
Chen Shuzing
13. General Form of Nondegenerate Darboux Matrices
of First Order for 1+1 Dimensional Unreduced Lax Pairs .. (231)
Zhou Zi-xiang
14. The First Nonzero Eigenvalue for Manifolds
with Ricci Curvature Having Positive Lower Bound (243)
Xia Changyu
15. Comparison between Maximal Function and Square
Function on Positively Curved Product Manifolds (251)
Chen Jie-cheng and Wang Si-lei
16. Surfaces of General Type with $\chi(O_S) = 1$
and Fibrations of Genus Two (VII) (277)
Weng Lin
17. The Tail Probability for the Kolmogorov Distance
in the Worst Direction (284)
Zhu Li-xing
