PREFACE	7
U. AMATO and C. SERIO: Retrieving a Periodic Function from its Fourier Finite Transform Corrupted by Error	9
M. AVDISPAHIĆ: Besov Spaces and Generalized Lipschitz Spaces on Vilenkin Groups are Identical	41
C. BADEA and C. COTTIN: Korovkin-type Theorems for General- ized Boolean Sum Operators	51
M. W. BARTELT and J. J. SWETITS: New Classes of Local Lipschitz Constants for the Best Approximation Operator on Finite Sets	69
N. L. BASSILY: Duality of the Burkholder-Davis-Gundy Inequality and the Generalized Fefferman-Garsia Inequality I.	85
P. BOJADZIEV and V. HADZIJSKI: Jentzsch Type Theorem for the Zeros of a Sequence of Best Rational Approximants	97
M. BUNTINAS and N. TANOVIĆ-MILLER: New Integrability and L^1 -Convergence Classes for Even Trigonometric Series II	103
P. L. BUTZER and M. SCHMIDT: Central Factorial Numbers and their Role in Finite Difference Calculus and Approximation	127
G. CRISCUOLO, B. DELLA VECCHIA and G. MASTROIANNI: Ap- proximation by Extended Hermite-Fejér and Hermite Interpolat- tion	151
M. CRNJAC and H. I. MILLER: On Several Classes of Sets III	179
B. DELLA VECCHIA and LJ. M. KOCIC': The Degeneracy of Bernstein-Bézier Polynomials over Simplices	187
M. M. DERRIENNIC: Linear Combinations of Derivatives of Bern- stein Type Polynomials on a Simplex	197
K. A. DRIVER and D. S. LUBINSKY: Convergence of Padé Approx- imants for Wynn's Power Series II	221
V. ECHANDIA: Interpolation Between Spaces $\mathbb{H}^p$ of Dyadic Martin- gales of Two Indices. The Complex Method	241
P. ERDŐS: Problems and Results on Polynomials and Interpolation ..	253
P. ERDŐS and G. HALÁSZ: On the Arithmetic Means of Lagrange Interpolation	263

A. FISCHER and R. L. STENS: Generalized Sampling Approximation of Multivariate Signals; Inverse Approximation Theorems	275
S. FRIDLI: Embedding Theorems Involving Dyadic Hardy and VMO Spaces	287
T. GANELIUS: Ikehara's Theorem in Several Dimensions	303
G. GÁT: Vilenkin-Fourier Series and Limit Periodic Arithmetic Functions	315
J. GRÓF: Approximation on the whole plane	333
A. K. GUPTA and I. VINCZE: Approximation of Higher Order Derivatives of a Real Function	339
K. GUSTAFSON and K. HALASI: The Flow Semigroup Approximation Problem	343
T. HERMANN: On the Operator of Bleimann, Butzer and Hahn	355
N. Q. HOA and N. X. KY: On Imbedding Theorems in Connection with Freud's Weight	361
Á. P. HORVÁTH: Characterisation of Hermite-Fourier Series	367
V. H. HRISTOV and K. G. IVANOV: Characterization of Best Approximations from Below and from Above	377
L. C. HSU: Power-type Generating Functions	405
H. JOHANSSON, L. MALIGRANDA and L. E. PERSSON: Inequalities for Moduli of Continuity and Rearrangements	413
T. KILGORE: On Simultaneous Approximation	425
N. KIRCHHOFF and R. J. NESSEL: Some Negative Results Concerning a Pointwise Comparison of a Trigonometric Convolution Process with its Discrete Analogue	433
H.-B. KNOOP: On Hermite-Fejér Interpolation at the Zeros of Hermite Polynomials	443
W. LENSKI: On the Rate of Pointwise Strong (C, α) -summability of Fourier Series	453
B. LENZE: Bernstein-Baskakov-Kantorovič Operators and Lipschitz-type Maximal Functions	469
E. MALKOWSKY: Matrix Transformations in Some Spaces of Strongly Bounded Sequences	497
F. MÓRICZ: Lebesgue Integrability and L^1 -convergence of Trigonometric Series with Special Coefficients	513
J. NÉMETH: Strong Approximation and Classes H^ω	537

Z. NÉMETH: On the Generalized Cesaro Summability	549
L. PICK: A Remark on Continuous Imbeddings Between Banach Function Spaces	571
J. PRESTIN: Best Approximation and Interpolation in Algebraic Hölder Norms	583
R. SAKAI: Hermite-Fejér Interpolation	591
F. SCHIPP: On Sidon type Inequalities	603
M. A. SKOPINA: The Generalized Lebesgue Sets of Function of Two Variables	615
H. STAHL: Best Rational Approximants to Markov Functions	627
I. SZALAY: On the Connection among the Ordinary, Strong and Absolute Cesaro Summabilities of Double Series	645
V. TOTIK: Polynomial Approximation with Locally Geometric Rate .	663
B. UHRIN: An Elementary Constructive Approach to Discrete Lin- ear l_p -approximation, $0 < p \leq \infty$	673
A. K. VARMA: Markoff Type Inequalities for Curved Majorants in L_2 Norm	689
W. R. WADE: Vilenkin-Fourier Series and Approximation	699
F. WEISZ: Two-parameter Martingale Hardy Spaces	735
Y. XU: On Mean Convergence of Interpolating Polynomials	749
V. A. ZHELUDEV: Spline-operational Calculus and Inverse Problem for Heat Equations	763
X. L. ZHOU: Weighted Approximation by Hermite-Fejér Interpola- tion	785
