

CONTENTS

Preface	x
Contributors	xi
Parametrization for Data Approximation	
<i>Laurent Alt</i>	1
A Vector Spline Approximation with Application to Meteorology	
<i>L. Amodei and M. N. Benbourhim</i>	5
Kernel Estimation in Change-Point Hazard Rate Models	
<i>A. Antoniadis and G. Grégoire</i>	11
Spline Manifolds	
<i>Marc Attéia</i>	17
Use of Simulated Annealing to Construct Triangular Facet Surfaces	
<i>G. Baszenski and Larry L. Schumaker</i>	27
G^1 and G^2 Continuity Between (SBR) Surfaces	
<i>J. L. Bauchat, J. C. Fiorot and P. Jeannin</i>	33
Ray Tracing Rational Parametric Surfaces	
<i>Luc Biard and Patrick Chenin</i>	37
Energy-Based Segmentation of Sparse Range Data	
<i>Terrance E. Boulton and Mark Lerner</i>	43
Error Estimates for Multiquadric Interpolation	
<i>M. D. Buhmann and N. Dyn</i>	51
A Geometrical Analysis for a Data Compression	
of 3D Anatomical Structures	
<i>V. Burdin, F. Ghorbel, J. L. de Bougrenet de la Tocnaye and C. Roux</i>	59
C^k Continuity of (SBR) Surfaces	
<i>J. C. Canonne, J. C. Fiorot and P. Jeannin</i>	67
A Note on Piecewise Monotonic Bivariate Interpolation	
<i>R. E. Carlson and F. N. Fritsch</i>	71
Real-Time Signal Analysis with Quasi-Interpolatory	
Splines and Wavelets	
<i>A. K. Chan and C. K. Chui</i>	75

Polynomial Expansions for Cardinal Interpolants and Orthonormal Wavelets <i>C. K. Chui, J. Stöckler and J. D. Ward</i>	83
Realtime Pipelined Spline Data Fitting for Sketched Curves <i>Elaine Cohen</i>	91
Remarks on Digital Terrain Modelling Accuracy <i>Y. Correc and A. Le Méhauté</i>	103
Convexity and Bernstein-Bézier Polynomials <i>Wolfgang Dahmen</i>	107
How to Draw a Curve Using Geometrical Data <i>J. P. Dedieu and Ch. Favardin</i>	135
The Generation of an Aerodynamical Propeller Using Partial Differential Equations <i>C. Dekanski, M. I. G. Bloor and M. J. Wilson</i>	139
Fast Computation of Cross-Validated Robust Splines and Other Non-linear Smoothing Splines <i>L. N. Deshpande and D. Girard</i>	143
Szasz-Mirakyan Quasi-Interpolants <i>A. Tidjane Diallo</i>	149
Statistical Check on the Smoothing Parameter of a Method for Inversion of Fourier Series <i>M. Di Natale, L. Gotusso, R. Pavani, and D. Roux</i>	157
A General Method of Treating Degenerate Bézier Patches <i>Wen-Hui Du and Francis J. M. Schmitt</i>	161
G^1 Smooth Connection Between Rectangular and Triangular Bézier Patches at a Common Corner <i>Wen-Hui Du and Francis J. M. Schmitt</i>	165
Regularity Conditions for a Class of Geometrically Continuous Curves and Surfaces <i>N. Dyn, D. Levin and I. Yad-Shalom</i>	169
Splines and Digital Signal Processing <i>L. A. Ferrari, D. Pang, and K. F. Ustuner</i>	177
B-Rational Curves and Surfaces, N-Rational Splines <i>J. C. Fiorot and P. Jeannin</i>	181
Reparametrizations of Polynomial and Rational Curves <i>J. C. Fiorot and S. Taleb</i>	185
Numerical Stability of Geometric Algorithms <i>Steven Fortune</i>	189

Solving Implicit ODEs by Simplicial Methods <i>Sergio de Freitas and Geovan Tavares</i>	193
On the Power of <i>a posteriori</i> Error Estimation for Numerical Integration and Function Approximation <i>Feng Gao</i>	197
Using the Refinement Equations for the Construction of Pre-Wavelets II: Powers of Two <i>Rong-Qing Jia and Charles A. Micchelli</i>	209
Elastica and Minimal-Energy Splines <i>Emery Jou and Weimin Han</i>	247
A Distributed Algorithm for Surface/Plane Intersection <i>A. Kaufmann</i>	251
Construction of Exponential Tension B-splines of Arbitrary Order <i>Per Erik Koch and Tom Lyche</i>	255
On the Almost Sure Limit of Probabilistic Recovery <i>Mark A. Kon</i>	259
A New Curve Tracing Algorithm and Some Applications <i>David J. Kriegman and Jean Ponce</i>	267
Pseudo-Cubic Weighted Spline Can Be C^2 or G^2 <i>Rekha Kulkarni and Pierre-Jean Laurent</i>	271
Composite C^r -Triangular Finite Elements of PS Type on a Three Direction Mesh <i>Mohammed Laghchim Lahlou</i>	275
Dynamic Segmentation: Finding the Edge with "Snake Splines" <i>F. Leitner, I. Marque, S. Lavallée, and P. Cinquin</i>	279
Recent Developments in the Strang-Fix Theory for Approximation Orders <i>William A. Light</i>	285
Aligning Frames with the Tangent Curve of a B-spline Curve <i>C. F. Louwe Kooijmans</i>	293
Error Estimates for Interpolation by Generalized Splines <i>W. R. Madych</i>	297
Varying the Shape Parameters of Rational Continuity <i>Dinesh Manocha and Brian A. Barsky</i>	307
Detecting Cusps and Inflection Points in Curves <i>Dinesh Manocha and John F. Canny</i>	315
Image-like Surfaces: Parallel Least Squares Approximation Methods <i>L. Bacchelli Montefusco, C. Guerrini and L. Puccio</i>	321

Local Kriging Interpolation: Application to Scattered Data on the Sphere <i>Pierre Montès</i>	325
Best Approximation of Circle Segments by Quadratic Bézier Curves <i>Knut Mørken</i>	331
A Procedure for Determining Starting Points for a Surface/Surface Intersection Algorithm <i>G. Müllenheim</i>	337
Norms of Inverses for Matrices Associated with Scattered Data <i>F. J. Narcowich and J. D. Ward</i>	341
2D Sampling in Tomography <i>F. Natterer</i>	349
Subdividing Multivariate Polynomials over Simplices in Bernstein-Bézier Form Without de Casteljau Algorithm <i>M. Neamtu</i>	359
Geometrically Smooth Interpolation by Triangular Bernstein-Bézier Patches with Coalescent Control Points <i>P. R. Pfluger and M. Neamtu</i>	363
Curve Fitting Using NURBS <i>Christine Potier, Mustapha Bel Guermah and Christine Vercken</i>	367
Univariate Multiquadric Interpolation: Some Recent Results <i>M. J. D. Powell</i>	371
Periodic Spline Interpolation of Functions of Bounded Variation <i>J. Prestin</i>	383
Least Squares Fitting by Linear Splines on Data Dependent Triangulations <i>Ewald Quak and Larry L. Schumaker</i>	387
How to Build Quasi-Interpolants: Application to Polyharmonic B-Splines <i>Christophe Rabut</i>	391
Algorithms for Local Convexity of Bézier Curves and Surfaces <i>Thomas Rando and John Roulrier</i>	403
Polynomial N-sided Patches <i>G. Renner</i>	407
Cubic Recursive Division with Bounded Curvature <i>M. A. Sabin</i>	411
ω -Convergence, A Criterion for Linear Approximation <i>M. A. Sabin</i>	415

Bernstein-type Quasi-Interpolants <i>Paul Sablonnière</i>	421
Extension of the Problem of Best Interpolating Parametric Curves to L-Splines <i>K. Scherer</i>	427
Adaptive G^1 Approximation of Range Data Using Triangular Patches <i>Francis Schmitt, Xin Chen, Wen-Hui Du, and Farouk Sair</i>	433
Universal Splines and Geometric Continuity <i>H.-P. Seidel</i>	437
Procedural Construction of Patch-Boundary Curves <i>Leon A. Shirman and Carlo H. Séquin</i>	445
Efficient Computation of Multiple Knots Nonuniform Spline Functions <i>M. J. Silberman, S. Y. Wang, and L. A. Ferrari</i>	449
Chebyshev Approximation in $\mathbb{R}^n$ by Curves and Linear Manifolds <i>Martin Streng and Wolfgang Wetterling</i>	453
A Building Method for Hierarchical Covering Spheres of a Given Set of Points <i>Leonardo Traversoni and Oscar Palacios</i>	457
The Variational Approach to Shape Preservation <i>Florencio I. Utreras</i>	461
Spline Fitting Numerous Noisy Data with Discontinuities <i>Christine Vercken and Christine Potier</i>	477
B-Spline Surfaces for Real-time Shape Design <i>J. S. M. Vergeest and C. G. C. van Dijk</i>	481
Conversion of a Composite Trimmed Bézier Surface into Composite Bézier Surfaces <i>A. E. Vries-Baayens</i>	485
Multivariate Model Building with Additive, Interaction and Tensor Product Thin Plate Splines <i>Grace Wahba</i>	491
Recursion Relations for 4×4 Determinants Related to Rational Cubic Bézier Curves <i>F. Yamaguchi, M. Niizeki and H. Fukunaga</i>	505
Lagrange Interpolation by Quadratic Splines on a Quadrilateral Domain of $\mathbb{R}^2$ <i>Fatma Zedek</i>	511
